Hazard Communication Standard Notice:

Effective June 1, 2015, Federal Standard No. 313-E, Material Safety Data, Transportation Data and Disposal Data for Hazardous Materials Furnished to Government Activities, establishes the requirement for preparation and submission of Safety Data Sheets (SDS) in lieu of Material Safety Data Sheets (MSDS) by suppliers who provide hazardous materials to government activities.

The Occupational Safety and Health Administration (OSHA) has modified its Hazard Communication Standard (HCS) to conform to the United Nations Globally Harmonized System of Classification and Labeling of Chemicals. As a result of this change, GSA revised Federal Standard No. 313-E requiring Safety Data Sheets for classifying chemicals and communicating the applicable information on labels.

In accordance with the revised standard after June 1, 2015:

1. Suppliers will be required to submit, to the contracting officer for review and approval prior to award, safety data sheets consistent with the requirements found at 29 C.F.R. 1910.1200 for hazardous materials delivered to the Government.

2. Suppliers will also be required to submit, to the contracting officer for review and approval prior to award, Hazardous Communication Standard (HCS) labels in accordance with 29 C.F.R. 1910.1200 requirements or current Consumer Product Safety Act (CPSA), Federal Hazardous Substance Act (FHSA) labels when subject to labeling requirements under those statutes. This product labeling is required for hazardous materials delivered to the Government.

3. Finally, suppliers must train their employees on the new safety data sheets, hazardous communication labels, and requirements of 29 C.F.R. 1910.1200.

For more information on SDS, refer to OSHAs website, available at:

https://www.osha.gov/law-regs.html

For information on 29 C.F.R. 1910.1200, refer to the below link:

GASOLINE,ETHANOL FREE
Hazard Communication Standard Notice:

Effective June 1, 2015, Federal Standard No. 313-E, Material Safety Data, Transportation Data and Disposal Data for Hazardous Materials Furnished to Government Activities, establishes the requirement for preparation and submission of Safety Data Sheets (SDS) in lieu of Material Safety Data Sheets (MSDS) by suppliers who provide hazardous materials to government activities.

The Occupational Safety and Health Administration (OSHA) has modified its Hazard Communication Standard (HCS) to conform to the United Nations Globally Harmonized System of Classification and Labeling of Chemicals. As a result of this change, GSA revised Federal Standard No. 313-E requiring Safety Data Sheets for classifying chemicals and communicating the applicable information on labels.

In accordance with the revised standard after June 1, 2015:

1. Suppliers will be required to submit, to the contracting officer for review and approval prior to award, safety data sheets consistent with the requirements found at 29 C.F.R. 1910.1200 for hazardous materials delivered to the Government.

2. Suppliers will also be required to submit, to the contracting officer for review and approval prior to award, Hazardous Communication Standard (HCS) labels in accordance with 29 C.F.R. 1910.1200 requirements or current Consumer Product Safety Act (CPSA), Federal Hazardous Substance Act (FHSA) labels when subject to labeling requirements under those statutes. This product labeling is required for hazardous materials delivered to the Government.

3. Finally, suppliers must train their employees on the new safety data sheets, hazardous communication labels, and requirements of 29 C.F.R. 1910.1200.

For more information on SDS, refer to OSHAs website, available at:
https://www.osha.gov/law-regs.html
For information on 29 C.F.R. 1910.1200, refer to the below link:
https://www.osha.gov/dsg/hazcom/index.html

Delivery Hours: 0730 THRU 1500HRS MONDAY THRU FRIDAY

Delivery Notes: POC David Archer, darcher@trcsolutions.com, ph 575-252-3568, Physical address is the building number and street name. Stallion # TRC Gov#t Services, Bldg. 34244 Stallion Range Camp Route 7, NM-380 White Sands Missile Range, NM 87832 575 252-3568 or 575 323-4967 Google Earth: 33.813630 -106.647570 Rhodes-TRC Gov#t Services, Bldg. 30724 Rhodes Canyon Route 6 White Sands Missile Range, NM 88002 575 252-3568 or 575 323-4967 Google Earth: 33.161760 -106.490530 Delivering to TRC at White Sands Missile Range WSMR It is important to make contact with the appropriate TRC ahead of time 4 hours initially, and then when near the Range to finalize directions and to set up the meet for escorting to the final delivery location. Without pre-arrangement an authorized escort may not be available and entry denied. Contact David Archer@ 575-252-3568; or Jake Castillo@ 575 323-4967. The Missile Range schedule can and does change daily. It is critical to know what portion is open for the area of the delivery. Time must be allowed to enter, drive to and depart from the delivery before range closing is to begin. Once on site, a sample will be obtained and quality determinations made prior to off loading. Stallion Range Camp and Rhodes Canyon: Note # the Rhodes Canyon site is 50 miles inside the Missile Range from either Highway 380 in the north, or Highway 70 in the south. Delivery is by appointment only as a TRC employee must escort the delivery truck both in and out, and also the Range Road may be closed due to missile firings. Ensure you contact the TRC Manager 24 hours prior to delivery.

1	6000	ABOVE GROUND TANK(S)	ON THE AIRFIELD RAMP NEXT TO BUILDING 140

Delivery Hours: 0700 THRU 1500HRS MONDAY THRU FRIDAY CLOSED US FEDERAL HOLIDAYS

Delivery Notes: This tank is located on the airfield ramp and the driver/truck will have to be escorted through the airfield gate. The only hours this can be done is Monday - Friday 0700-1500. Fuel must be pumped from the tanker into our tank using tanker mounted pump. The fittings are standard fuel tank/tanker fittings and will require 10-15 feet of hose. The tank is an above ground, 6000 gallon tank.

Delivery Hours: 0730 THRU 1500HRS MONDAY THRU FRIDAY

Delivery Notes: POC David Archer, darcher@trcsolutions.com, ph 575-252-3568, Physical address is the building number and street name. Stallion # TRC Gov#t Services, Bldg. 34244 Stallion Range Camp Route 7, NM-380 White Sands Missile Range, NM 87832 575 252-3568 or 575 323-4967 Google Earth: 33.813630 -106.647570 Rhodes-TRC Gov#t Services, Bldg. 30724 Rhodes Canyon Route 6 White Sands Missile Range, NM 88002 575 252-3568 or 575 323-4967 Google Earth: 33.161760 -106.490530 Delivering to TRC at White Sands Missile Range WSMR It is important to make contact with the appropriate TRC ahead of time 4 hours initially, and then when near the Range to finalize directions and to set up the meet for escorting to the final delivery location. Without pre-arrangement an authorized escort may not be available and entry denied. Contact David Archer@ 575-252-3568; or Jake Castillo@ 575 323-4967. The Missile Range schedule can and does change daily. It is cridical to know what portion is open for the area of the delivery. Time must be allowed to enter, drive to and depart from the delivery before range closing is to begin. Once on site, a sample will be obtained and quality determinations made prior to off loading. Stallion Range Camp and Rhodes Canyon: Note # the Rhodes Canyon site is 50 miles inside the Missile Range from either Highway 380 in the north, or Highway 70 in the south. Delivery is by appointment only as a TRC employee must escort the delivery truck both in and out, and also the Range Road may be closed due to missile firings. Ensure you contact the TRC Manager 24 hours prior to delivery.

POC Plan supervisor ph719-333-2785 This request is to create an additional MoD for TSW ID CDFUSAFACA. This is a stand-by requirement in the event of primary fuel curtailment by the local public utility. Estimate 15,000 gallons daily non-capitalized fuel for approx. 2-3 day periods (throughout delivery period). Could be multiple events depending on the severity of the weather during the season. Vendor must deliver during periods of extreme inclement weather. Delivery will be made to the base central heating plant, 2560 Interior Drive (bldg. 2560). Delivery ticket for daily amount must be provided. Acceptance (WAWF) (alternate) Julie Mellinger julie.mellinger@us.af.mil (719) 333-3523
3/7/19-Mobile tank not fixed. TW w/pump, 100 foot issue hose with quick closing issue nozzle
3/7/19-Below ground (DAY) tank, vendor provide 6 foot hose 3/7/19-600,000 gallon above ground tank, vendor provide 6 foot hose

Natural gas: Curtailment Notice 24 hours of Shut Off Estimate 24,950 gallons weekly deliveries in support of Emergency Use Only
"8/16/22 Per customer-For our Emergency Electric Generators we would roughly need 14,950 gallons in a 7 day period. For the Hot water boilers roughly 10,000 gallons in a 7 day period. The estimated burn rate is the total of the two. 8/11/22 Additional teleconference done with customer. Customer will use contract for emergency use only. Customer is aware in non- emergencies they will not reach the 10K threshold. Testing is done in house and the annual maintenances done by private company-- customer will not order from DLA to test generators. TW preferred because of space. 8/8/22 Teleconference held. This product is used for ground equipment and generators. 7/26/22 Reached out to David.Platko@va.gov via email to set up teleconference. "

ACCESS: Sandia requests the name(s) of the current driver's that will be delivering fuel to Kirtland AFB. Identifying the names upfront will allow Sandia to pre-plan access so there is no delay during an emergency situation. Delivery of fuel to SNL: Meeting escort at the KAFB Contractor Gate, (Carlisle and Gibson intersection). Contractor must have clearance for access to KAFB and a Sandia badge to enter Sandia property. Sandia will provide badge and escort the driver(s) onto Sandia site.

EQUIPMENT REQUIREMENTS: Needed equipment for currently installed generators (all tanks have a 2 in cam direct fill): Building 810 100 ft hose Building 880 125 ft hose
Building 726 100 ft hose Two additional generators are in the process of being installed (all tanks have a 2 in cam direct fill and are estimated to require hoses less than 150 ft):
Building 814 Building 829
NOTE: The following is the estimated fuel requirements for 5 generators which includes 3 operational generators and 2 generators currently being installed: Emergency situation for 24/7/30 days for: Sandia will use/burn 18,528 gallons every 48 hours and 277,920 over 30 days. A fuel tank truck(s) will be required for this effort.
