☐	D. OTHER *(Specify type of modification and authority)*

E. IMPORTANT: Contractor ☐ is not ☐ is required to sign this document and return _____ copies to the issuing office.

14. DESCRIPTION OF AMENDMENT/MODIFICATION (*Organized by UCF section headings, including solicitation/contract subject matter where feasible.)*

The purpose of this amendment is to revise the Performance Work Statement (PWS) to completely descope all physical repair work and transition the solicitation strictly to an Inspection, Testing, Certification, and Diagnostic Reporting requirement. Due to the unknown baseline condition of the crane systems, the Government has removed the requirement to price and perform unforeseen repairs. The resulting contract will establish the mechanical baseline and generate a Deficiency Correction Plan (DCP) for uncertifiable cranes, which the Government will use to formulate a separate, future procurement for repairs. As a result of this descope, the solicitation is extended from 22 Jun 2026 to 2 July 2026, 2:00 pm local time (Puerto Rico). All other terms and conditions, unless expressly specified in this amendment or future amendments, remain unchanged and in full effect.

Except as provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remains unchanged and in full force and effect.

Response Due Date	22 Jun 2026	02 Jul 2026

Miscellaneous text in this section has been added to:

SUMMARY OF PWS CHANGES:

Bidders are advised to review the revised PWS (Rev 16 Jun 2026) in its entirety. Key changes include:

(a) Change in Title and Scope (Sections 1.1 & 1.2): The solicitation title and scope have been changed from "Stationary Crane Maintenance Services" to "Stationary Crane Inspection Services." All requirements to perform actual repair services have been removed.

(b) Period of Performance (Section 1.4): The Period of Performance (PoP) has been revised from a 12-month Base Year to 90 Days After Receipt of Order (ARO), reflecting the removal of long-term maintenance and repair tasks.

(c) Introduction of the Deficiency Correction Plan (DCP) (Section 5.3): The "Detailed Maintenance & Parts Report" has been replaced with a requirement for a comprehensive Deficiency Correction Plan (DCP). For any crane that fails inspection or cannot be safely load-tested, the contractor shall provide a DCP detailing observed deficiencies, required corrective actions, an itemized parts list, and an estimated reconditioning cost. The DCP is a data deliverable only; no repair services are authorized.

(d) Organizational Conflict of Interest (OCI) Notification (Section 1.5.16): An OCI note has been added advising bidders that participation in developing the DCP (which will be used as the technical basis for a subsequent repair procurement) constitutes a potential informational OCI. The Contracting Officer will determine appropriate mitigation measures, which may restrict the successful contractor from competing on the future repair contract.

(e) Condition Codes Update (Section 5.2.2): The operational condition classifications have been expanded to include a "Yellow" code (Operable -- Certification Lapsed) for cranes that are mechanically functional but lack current certification.

(g) Load Testing Clarification (Section 5.4.1): The PWS now explicitly clarifies that load testing will only be conducted on eligible cranes (Green/Yellow condition codes or Contracting Officer-authorized Amber cranes) and is strictly prohibited for Red-coded cranes until a future repair contract is executed.

(h) Deliverables Schedule Update (Technical Exhibit 2): The schedule has been updated to reflect the new 90-day PoP and the transition from repair-based deliverables to the submission of the DCP and the Consolidated Inspection Completion Summary Report.

(i) The line item schedule structure has been updated to reflect these changes.

Continuation of Supplies or Services and Prices/Costs

The following CLIN(s) / SLIN(s) / ELIN(s) were modified:

Miscellaneous text in this section has been modified to:

Attachment listed herein are incorporated by reference and remain in full effect. Per Amendment 001, the all physical repair services have been descoped from this requirement and are reflected in Revision 1, Dated 16 June 2026, of the Performance Work Statement. The resulting Deficiency Correction Plans (DCP) will strictly serve as data deliverables used by the Government to facilitate a separate, future procurement for necessary repairs. All other terms and conditions, unless expressly specified in this amendment or future amendments, remain unchanged and in full effect.
