DEPARTMENT OF THE AIR FORCE
377TH MISSION SUPPORT GROUP (AFGSC)

23 June 2026

MEMORANDUM FOR RECORD

FROM: 377 MSG/PKB
8500 Gibson Blvd SE
Kirtland AFB NM 87117

SUBJECT: [redacted] IDS Memorandum; Intention to Limit Competition

1. The purpose of this memorandum is to document that quotations will be solicited directly from suppliers to furnish all parts, material, labor, equipment and supervision necessary to purchase and install a IDS and ACS System with OnGuard software produced by Lenel. According to two letters, one from the manufacture of the needed software and one from the commander of Security Forces on Kirtland AFB, there are only three federal Value Added Resellers (VARs) authorized to purchase equipment and licensing directly from Lenel for this installation. The authorized vendors are Paladin Technologies, Honeywell, and MC Dean. Lenel will not permit any other VARs to purchase equipment or dongle IDs against the base's alarm system account. Furthermore, no other vendors outside of the three listed above are authorized to install equipment, expand, or modify the existing Lenel alarm system. The purpose of this is to maintain system integrity and comply with licensing requirements.

2. This purchase will be made under Acquisition of Commercial Products and Commercial Service RFO Part 12 and Other Than Full and Open Competition, as authorized by RFO Part 6.103-1.
