Q: 340224-1 A/C unit track assy – what is working load limit?

A: Safe working load is 185lbs. Testing is in accordance with paragraph 6 on page 116 of NAVAIR 17-1-114.4.1.

Q: 3402245-1 refrigeration hoist unit – what is working load limit and is this hoist LPSTAPUHT?

A: Safe working load is 200lbs. We have 2, LPSTGENH1 and GENH2. APUHT is a different hoist, PN: 3402246-1. Testing is in accordance with paragraph 6 on page 122 of NAVAIR 17-1-114.4.1.

Q: 3402242-1 - what is work load limit

A: SWL is 190lbs. Testing is in accordance with paragraph 6 on page 108 of NAVAIR 17-1-114.4.1.

Q: 3401207-5 - what is work load limit, is it APC or GTC dolly?

A: SWL is 400lbs, test load is 800lbs. The APU and GTC are similar but these are used for APUs, the name in our system just didn't change.

Q: The paperwork states load testing 4 pieces at a time. Is this only once per year?

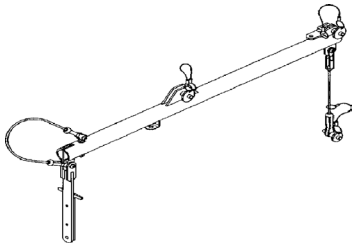
A: We have 16 total items that need to be weight certified once a year. Per the PWS, we will only send up to 4 at one time.

Q: Is Certex required to tag the equipment with the part number?

A: Unless otherwise specified, item labeling is on us to ensure and we will coordinate the PN and SN for items sent for certification.

Q: On the attached picture is the part number 3402242-1?

A: 3402242-1 is this



The attached picture is PN ES125155-1.
