PLACE OF PERFORMANCE: Great Smoky Mountains National Park
PLACE OF PERFORMANCE POSTAL CODE: Gatlinburg, TN 37738

Title of Project: GRSM – ROADWAY STRIPING

Great Smoky Mountains has approximately 238 miles of roads with some type of four-inch striping delineation along the road centerline and on some road along the edge of pavement. Due to the heavy volume of traffic (4 million vehicles annually), harsh weather conditions, the use of abrasives to remove snow and ice, and normal wear, portions of the roads need restriping annually. Incidents are occurring when vehicles cross the centerline and when tires drop off the edge of pavement onto road shoulders. Minor accidents from dropping off road edges to avoid oncoming traffic are occurring but difficult to document. This project would improve the service of the roadway for another year to three years depending upon the area applied. Roadways are the main access to all points of interest in the park including trail heads serving the backcountry. Completion of this work will improve the primary Park facility by providing visible pavement markings.
