SPECIAL USE PERMIT FOR
CAMPGROUND AND RELATED GRANGER-THYE CONCESSIONS

APPENDIX B
ANNUAL GRANGER THYE FEE OFFSET AGREEMENT

AUTHORITY: Section 7 of the Granger-Thye Act, 16 U.S.C. 580d
<Reference FSH 2709.11 chapter 50>

This Annual Granger-Thye (GT) Fee Offset Agreement (agreement) is made by [name] (the holder) and the U.S. Department of Agriculture, Forest Service, [name] National Forest (the Forest Service), under section 7 of the G-T Act, 16 U.S.C. 580d, and clause IV.E of the special use permit issued to the holder on [date] (the permit). The total estimated annual land use fee is [amount]. [ ] percent of that land use fee may be offset by the cost incurred by the holder for the Government maintenance, reconditioning, renovation, or improvement (MRRI) projects listed below in accordance with this agreement. Additionally, [ ] percent of that fee may be offset by the cost incurred by the Forest Service for the Government MRRI projects under a separate collection agreement. Projects to be performed by the holder shall be completed by the date specified and within the holder's fiscal year for the year the fee is due. The Forest Service may modify the projects and dates as necessary, after consultation with the holder.

1. Amount of Land Use Fee Subject to Offset. The actual cost of each project that is satisfactorily completed as determined by the Forest Service may be offset against the holder's land use fee. Due dates and cost estimates for completion of each project are enumerated below. Examples of allowable costs include salaries and wages, materials and supplies, and subcontracts that are direct costs of a G-T fee offset project and indirect costs based on an approved indirect cost rate. The total cost for Government MRRI projects to be performed under this agreement shall not exceed the holder's annual land use fee.

2. Projects and Project Costs Covered by This Agreement. Upon a determination by the Forest Service that a project has been satisfactorily completed by the holder, the holder shall submit documentation of its actual cost to the Forest Service and shall certify that the representations in that documentation are accurate and complete. The certification shall be signed and dated, and shall state that failure to sign the certification shall vitiate the fee offset claim. The Forest Service shall verify that documentation before giving any credit against the holder's land use fee, and reserves the right not to grant any fee offset if any representations in the documentation are inaccurate or incomplete.

The holder shall perform the work itemized below under this agreement.

Description of Project	Due Date	Estimated Cost	Completion Date	Actual Cost
[itemize projects]				

SAMPLE

The Forest Service or Forest Service contractor shall perform the work itemized below under this agreement.

Description of Project	Due Date	Estimated Cost	Completion Date	Actual Cost
[itemize projects]				

<USER NOTES FOR PARAGRAPH 3>
<Include paragraph 3 if the total estimated cost of Government MRRI projects to be performed under this agreement exceeds $2,000 and the holder is a private entity or a state or governmental entity that is contracting with a private entity to perform the Government MRRI projects. Otherwise delete paragraph 3, and re-number the remaining paragraph.>

3. Davis-Bacon Act Requirements. This agreement is subject to the Davis-Bacon Act, 40 U.S.C. 3141 *et seq*., and its implementing regulations at 29 CFR 5.5. These regulatory requirements are incorporated by reference into this agreement as if fully set forth in this agreement.

4. Documentation of Project Costs. Upon a determination by the Forest Service that a project has been satisfactorily completed by the holder, the holder shall submit documentation of its actual cost to the Forest Service and shall certify, using form FS-2700-4h, Appendix G, that the representations in that documentation are accurate and complete. The certification shall be signed and dated and shall state that failure to sign the certification shall vitiate the fee offset claim. The Forest Service shall verify that documentation before giving any credit against the holder's land use fee and reserves the right not to grant any land use fee offset if any representations in the documentation are inaccurate or incomplete.

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond, to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0596-0082. Response to this collection of information is mandatory. The authority to collect the information is the Organic Administration Act, 16 U.S.C. 551. The time required to complete this information collection is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

SAMPLE

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the State or local Agency or contact USDA through the Telecommunications Relay Service at 711(voice and TTY). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at How to File a Program Discrimination and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Mail Stop 9410, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

The Privacy Act of 1974 (5 U.S.C. 552a) and the Freedom of Information Act (5 U.S.C. 552) govern the confidentiality to be provided for information received by the Forest Service.

Appendix 12: Potential Government Maintenance, Reconditioning, Renovation, and Improvement Projects

Potential Government Maintenance, Reconditioning, Renovation or Improvement (MRRI) Projects

Included below are anticipated government maintenance, reconditioning, renovation or improvement projects. Items on this list could be changed, depending on use and condition of facilities, at the discretion of the Authorizing Officer.

Many of the future projects consist of bringing the sites into compliance with the National Quality Standards for Recreation Site Management, as described in Appendix 19. Projects may be derived from Appendix 3 – Inventory of Government Furnished Property. In addition, anticipate annual replacement of features that become irreparable or damaged. Items on this list could be changed, depending on use and condition of facilities, at the discretion of the Authorizing Officer. Note that costs are estimates and actual costs may vary.

NOTE: This table represents a sample list of potential Granger-Thye Fee Offset projects for facilities in this prospectus. The Forest Service may find a need for higher priority projects and revise this list at any time.

Table 1. Potential MRRI Project List

Item/Project	Quantity	Estimated Cost
Vault Toilet Replacement	TBD	$70,000-$100,000/each
Vault Toilet Exterior Painting and Concrete Repair/Sealing (Approx 10/yr)	10	$20,000
Vault Toilet Aprons (Approx. 3/year)	3	$20,000
Utilities Emergency Repairs (water electricity, sewer, etc.)	N/A	$30,000
Prosser Water System Replacement	1	$1,200,000
Food Storage Locker Purchase and Installation (Approx. 15/year)	15	$25,000
Horse Corral/Equestrian Improvements	N/A	$10,000
Kiosk Purchase and Installation (Approx 2-3/yr)	2-3	$15,000
Entry Sign Replacement (As Needed)	N/A	$5,000 each
Fire Rings Purchase and Installation (Approx. 30/year)	30	$25,000
Picnic Tables Purchase and Installation (Approx 30/year)	30	$50,000
Water System Line Replacement (As Needed)	N/A	$20,000
Host Site Renovation and Amenities (Approx. 1/year)	1	$40,000
Roads (Gates, speed bumps, etc.)	10	$50,000
Living space improvements (site leveling, spur, site definition, etc.) (Approx 5/yr.)	5	$7,500
Automated Fee Machine (Captain Roberts, or other sites as identified by FS)	TBD	$20,000/each
Fee Tube Purchase and Installation (New fee sites and as needed)	TBD	$1,200/each

Appendix 13: Indirect Cost Reimbursement Letter

United States Department of Agriculture | **Forest Service** | **Washington Office** | **14th & Independence SW**
P.O. Box 96090
Washington, DC 20090-6090

File Code: 2720/6500 **Date:** July 11, 2002
Route To:

Subject: Indirect Cost Reimbursement in Granger-Thye Permits

To: Regional Foresters

Issue. At the request of the National Forest Recreation Association (NFRA) we have evaluated how the Forest Service reimburses the indirect costs of permit holders who perform Granger-Thye (GT) fee offset work. Holders are concerned that forests are inconsistent on whether and how indirect costs are allowed and what documentation is necessary to support a claim for indirect costs.

Background. Under Section 7 of the GT Act, and when authorized by a permit and GT fee offset agreement (GT agreement), the Forest Service offsets all or part of the permit fee paid by campground concessionaires with the cost of Government renovation, reconditioning, improvement, and maintenance performed at the concessionaire's expense on facilities covered by the permit. When the holder performs the work, it is authorized by an attachment to the permit called a GT fee offset agreement. Alternatively, the Forest Service may enter into a collection agreement as authorized by Section 5 of the GT Act to perform work eligible for fee offset under Section 7.

Historical Practice. Typically the field has offset the holder's direct costs for approved offset work, but reimbursement for the holder's indirect costs has varied. Approaches have included limiting indirect costs to a maximum of 5 percent or 10 percent of the fee to be offset, limiting the type of indirect costs to be reimbursed, or reimbursement of a flat overhead rate without documentation. Review of this issue has shown that these methods are not appropriate, because holders should be reimbursed actual costs. There is a misconception among employees and holders that the Forest Service can reimburse a flat indirect cost rate without documentation. There is often disagreement between forests and holders about what costs may be reimbursed.

Comparison. The Office of Management and Budget (OMB) has issued circulars to guide cost reimbursement for several types of business entities, including Circular A-87 for State and Local Governments and Circular A-122 for Non-Profit Organizations. The Federal Acquisition Regulation (FAR) Part 31 guides cost reimbursement for Commercial (For-Profit) Entities. We evaluated how cost reimbursement is conducted in other agency programs. Regulations at 7 CFR 3019.27 were updated in August 2000 to address the determination of allowable costs for grants and agreements in conformance with applicable OMB circulars. FSH 1509.11, Chapter 70, provides that administration of costs in grants and agreements for commercial entities is subject to FAR Part 31, Contract Cost Principles and Procedures. Adopting these cost standards for GT offset will create consistency among the program areas of special uses, contracting, and grants and agreements and conform to OMB guidance.

Conclusion. Offset of indirect costs is appropriate. Indirect costs are a customary charge in contracting and grants and agreements and should be eligible for offset under GT agreements. The following guidance applies to reimbursement of actual costs to commercial entities holding GT permits. The guidance (enclosed) is excerpted from FAR Part 31 and 48 CFR Part 9904 but has been tailored to address GT agreements. A simplified process for small concessions is included at the end of the document. Cost principles for non-profit entities and state or local governmental entities are not addressed. The guidance does not address the reimbursement of agency indirect costs. When the Forest Service performs the work, agency indirect costs will be assessed in accordance with FSH 1509.11, Chapter 33 and indirect cost rates established nationally (e.g., the FY2002 rate is 18 percent).

Implementation.
Before the holder's indirect costs may be offset under a GT agreement, the holder must submit its indirect cost rate and supporting documentation for approval. Determination of an indirect cost rate should comply with the Cost Accounting Standards (CAS) and this guidance. When claiming cost reimbursement, the holder must certify that costs claimed comply with this guidance. Indirect costs based on approved Indirect Cost Allocation Rates (ICAR) should be reimbursed starting with 2002 permit fees. This advice for reimbursement of indirect costs is not retroactive to prior year permit fees.

For New Permits: Applicants must disclose accounting procedures and historic indirect cost allocation rates in response to a prospectus.

For Existing Permits: Holders must submit their ICAR to the authorized officer. Because the ICAR will be the same for all permits held by a specific company, it is recommended that the regional external auditor review and approve the rate. Regional auditors should coordinate the review for companies operating in more than one region.

GRANGER-THYE FEE OFFSET CLAIM

AUTHORITY: Section 7 of the Granger-Thye Act, 16 U.S.C. 580d

_____NATIONAL FOREST
_____RANGER DISTRICT
PERMIT ID NUMBER _____

Project Name _____ **Holder's Fiscal Year (FY) _____**

Total allowable costs may be offset under a Granger-Thye (GT) fee offset agreement to the extent they do not exceed the total annual fee for this permit. Total allowable costs of a GT project included in this GT claim are the sum of the direct GT project costs and indirect costs allocable to this GT project. Costs submitted under this GT claim shall be documented and determined by the Forest Service to be reasonable, allocable, and determined to be allowable, in accordance with the terms of this permit, the applicable GT fee offset agreement, and applicable Forest Service directives.

Direct GT Costs: Provide claimed GT costs by cost element and attach schedules to show the cost breakdown by cost element. Provide supporting documentation for the cost claim.

Indirect Costs: Indirect costs must be computed based on Forest Service-approved indirect cost rate and may be added to the total direct GT costs. Attach the approved indirect cost rate for FY [ ].

Approval of the fee offset claim is subject to all provisions in the Annual Granger-Thye Fee Offset Agreement (FS-2700-4h, Appendix B) executed by the U.S. Department of Agriculture, Forest Service, [name] National Forest, and [holder name] on [date of GT fee offset agreement].

DIRECT GT COSTS

Materials and Supplies	$
Subcontracts	$
Other (specify)	$
Sum of Direct GT Costs	$
INDIRECT COSTS ([ ]% x Direct GT costs)	$
TOTAL GT COST CLAIM FOR PROJECT	$

Subject to the penalties prescribed in the False Statements Act, 18 U.S.C. 1001, the holder certifies to the best of its knowledge that the representations in the documents supporting its claim for fee offset are accurate and complete. The Forest Service reserves the right not to grant the fee offset claim if any of

these representations is inaccurate or incomplete. Failure to sign the certification shall vitiate the fee offset claim.

Appendix 15: Sample Collection Agreement for Granger-Thye Fee Offset Work

Collection Agreement
between
<Name of Holder>
and
<Name> National Forest

Agreement Number: _____

Cooperator Tax ID #: _____

THIS COLLECTION AGREEMENT is made by (name of holder) and the U.S. Department of Agriculture, Forest Service, _____ National Forest (the FS), under Section 5 of the Granger-Thye Act, 16 U.S.C. 572.

WHEREAS, the holder operates a FS campground (or campgrounds) under a special-use permit dated ____;

WHEREAS (SELECT EITHER #1 OR #2) 1) THE HOLDER HAS A REQUESTED THE FS TO PERFORM AND THE FS IS WILLING TO PERFORM UNDER A COLLECTION AGREEMENT OR 2) THE FS IS REQUIRING THAT IT PERFORM UNDER A COLLECTION AGREEMENT, the following projects listed in the fee offset agreement: (List all agreed to and approved projects);

WHEREAS, the cost of those projects may be used to offset the permit fee in accordance with the fee offset agreement;

THEREFORE, in consideration of the above, the parties agree as follows:

A. The holder shall:

1. Make advance payments, in accordance with the permit, in amounts sufficient to cover the total cost of performing the Government maintenance and reconditioning work listed in this agreement, including overhead as determined by the FS up to ___ percent of project costs.

2. Pursuant to the Debt Collection Improvement Act of 1996, as amended by P.L. 104-134, furnish their tax identification number upon execution of this instrument. Cooperator also agrees that notice of the FS's intent to use such number for purposes of collecting and reporting on any delinquent amounts arising out of such person's relationship with the Government, has hereby been given.

B. The FS shall:

1. Deposit payments received from the holder under this agreement into the FS cooperative work fund.

2. Upon receipt of payment from the holder, perform the Government maintenance and reconditioning projects listed in this agreement.

3. Contributions authorized for use by the FS, which are not spent or obligated for project(s) approved under this instrument, will be refunded to the cooperator authorized for use for new projects by the cooperative.

C. It is mutually agreed that:

1. No member of or delegate to Congress or resident commissioner shall receive any benefit that may arise from this agreement; provided, that this provision shall not apply to this agreement if it is made with a corporation for its general benefit.

2. This agreement in no way restricts the FS or the holder from participating in similar activities with other public or private agencies, organizations, or individuals.

3. Any holder contributions made under this agreement do not directly or indirectly convey FS endorsement of the holder's products or activities.

4. Modification of this agreement shall be made by in writing mutual consent of the parties and shall be signed and dated by both parties. The FS is not obligated to fund any modifications that are not made in accordance with this clause.

5. Either party(s), in writing, may terminate the instrument in whole, or in part, at any time before the date of expiration. The FS shall not incur any new obligations for the terminated portion of the instrument after the effective date and shall cancel as many obligations as in possible. Full credit shall be allowed for FS expenses and all non-cancelable obligations properly incurred up to the effective date of termination.

6. Unless terminated by written notice, this agreement shall remain in effect until the end of the initial permit term. If the permit term is extended, this agreement may be extended in writing for the same period as the permit term.

7. Per 16 U.S.C. 572, the United States shall not be liable to the holder or the holder's heirs, assigns, agents, employees, contractors, or lessees for any loss, personal injury, or death occurring in connection with performance of work under this agreement, and the holder on behalf of itself and its heirs, assigns, agents, employees, contractors, and lessees hereby waives any and all claims against the United States for compensation for any loss, personal injury, or death occurring in connection with performance of work under this agreement.

In witness where IN WITNESS WHEREOF, the parties have executed this agreement as of the last date written below.

I: The Business and Experience

1. Purpose and Goals:

A. What is your purpose in pursuing this business?

B. Define your business goals for the next year and what you foresee five years from now:

2. Description of the Business:

This section should describe the nature and purpose of the company, background on your industry, and what opportunities you see for your services.

A. Brief description of the business:

B. Briefly describe your knowledge of this industry:

C. List the products and services you will provide:

3. Legal Structure:

There are several ways in which your business can be legally organized.

A. How your company is legally organized? (Check appropriate box).

- ☐ Sole Proprietorship
- ☐ General Partnership
- ☐ Corporation "C" Corp or "S" Corp Limited Partnership
- ☐ Limited Liability Company (LLC)
- ☐ Other

B. Why is this legal organization most appropriate for your business?

C. Does your operation require a state registration number? YES ☐ NO ☐
(If “Yes”, include a copy of the registration in the Supporting Documents.)

Include any appropriate information, including shareholder or partnership agreements, in the Supporting Documents, and complete the following list of owners:

Table 1. List of owners

Name	Address	Social Security Number (SSN)	Percent Ownership

4. Location of Your Business:

Describe the planned geographical location of the business and discuss the advantages and disadvantages of the site location in terms of wage rates, labor availability, closeness to customers or suppliers, access to transportation, state and local taxes, laws, and utilities.

Describe your approach to overcoming any problems associated with the location.

A. Planned geographical location:

B. Discuss advantages or disadvantages of the site location:

C. Describe your approach to overcoming any problems:

5. Market and Customers:

The purpose of this section is to present sufficient facts to convince the evaluation team that your service has a substantial market and can achieve success in the face of competition. Discuss who the customers are for your service. Where are the major purchasers for the service?

A. Describe your anticipated target market (e.g., age, income, hobbies, regional, national, international):

B. Describe the size of the current total market and potential annual growth:

C. Discuss your advertising campaign in terms of how, when, and where you will advertise, and estimated annual cost:

6. Competitive Analysis:

Make a realistic assessment of the strengths and weaknesses of your competitors. Compare the competing services on the basis of image, location, price, advertising, and other pertinent features. Discuss your key competitors and explain why you think that you can capture a share of their business. Discuss what makes you think it will be easy or difficult to compete with them.

A. Identify your key competitors:

B. Discuss their strengths and weaknesses.

C. Compare your product or service on key areas. For each area of comparison rank yourself and your selected competitors on a scale of 1 (high) to 5 (low). Remember: no ties.

Table 2. Competitive Analysis

Area of Comparison	You	Competitor A	Competitor B	Competitor C	Competitor D
Image					
Location

D. Why do you think you can compete with your competitors and capture a share of the market?

7. Management:

The evaluation team is looking for a committed management team with the proper balance of technical, managerial, and business skills and experience which supports your proposal. Be sure to include complete resumes for each key management member in the Supporting Documents section.

(Use additional pages and attach as necessary)

A. List owners and key management personnel and their primary duties. If any key individuals will not be onboard at the start of the venture, indicate when they will join the staff.

B. Discuss any experience when the above people have worked together that indicates how their skills complement each other and result in an effective management team.

C. List the advisors and consultants that you have selected for your venture. Capable, reputable, and well- known supporting organizations can not only provide significant direct and professional assistance, but also can add to the credibility of your venture.

Accountant _____

Attorney _____

Banker _____

Insurance Broker _____

Advertising _____

Others _____

8. Personnel:

Explain how you plan to recruit, develop, and maintain your workers. List the number of employees you will have, as well as their job titles and required skills. (Use additional pages as necessary)

A. Identify essential employees, their job titles, and required skills:

B. Identify the source and your plan to recruit essential employees:

C. Discuss any training or retraining that you plan for your employees. Also, discuss any necessary first- aid certification or recertification, etc.:

9. Supporting Documents:

Each applicant is required to submit the items listed below.

- Personal resumes of business owners, officers, and partners
- Copies of all pertinent existing permits or licenses applicable to this business (Submit only the face pages of all current concession permits)

II: Financial Resources

1. Capital-Equipment List:

Capital equipment is defined as assets which have useful lives of more than one year. Examples include machines, equipment, vehicles, livestock, tack, gear, and computers. Describe the equipment, the quantity, whether the equipment is new or used (N/U), the expected useful life, and the cost. This includes equipment purchased from existing businesses.

Table 3. Capital Equipment List

Equipment	Quantity	New/Used	Life	Cost
Total Cost of Capital Equipment				**$0.00**

2. Start-Up Expenses:

Start-up expenses are the various costs it takes to open your doors for business:

Table 4. Start-Up Expenses

Item	Cost
Total cost of capital equipment	
Beginning inventory of operating supplies	
Legal fees	
Accounting fees	
Other professional fees	
Licenses and permits	
Remodeling and repair work	
Deposits (public utilities, etc.)	
Advertising	
Insurance	
Bonds	
Advance permit fees	
Other expenses:	

Item	Cost
Total Start-Up Expenses	**$**

3. Sources and Uses of Financing:

A. Sources of Financing:

Table 5. Sources of Financing

Item	Cost
Investment of cash by owners	
Investment of cash by shareholders	
Investment of non-cash assets by owners	
Investment of non-cash assets by shareholders	
Bank loans to business: short term (one year or less)	
Bank loans to business: long term (more than one year)	
Bank loans secured by personal assets	
Small Business Administration loans	
Other sources of financing (specify)	
Total Sources of Financing	**$**

B. Uses of Financing

Table 6. Uses of Financing

Item	Cost
Buildings	
Equipment	
Initial inventory	
Working capital to pay operation expenses	
Noncash assets contributed by owners (use same amount as in Sources, above)	
Other assets (specify)	

Item	Cost
Total Uses of Financing	**$**

C. Monthly Cash Flow Projection:

The cash flow projection is the most important financial planning tool available to you. The cash flow projection attempts to budget the cash needs of a business and shows how cash will flow in and out of the business over a stated period of time. A cash flow deals only with actual cash transactions. Depreciation, a noncash expense, does not appear on a cash flow. Loan repayments (including interest), on the other hand, do, since they represent a cash disbursement.

NOTE: The Cash Flow Projection chart on the following page is required to be completed and submitted in the existing format (date range can be modified).

Table 7. Cash Flow Projection (or Cash Flow Budget) by Month: Year One

D. Start-Up Balance Sheet:

Balance sheets are designed to show how the assets, liabilities, and net worth of a company are distributed at a given point in time.

NOTE: The following Start-up Balance Sheet is required to be completed and submitted in the existing format.

Table 8. Start-Up Balance Sheet

Item	Cost

E. Start-Up Income Statement Projection:

Income Statements (also called Profit and Loss Statements) complement balance sheets. The income statement provides a moving picture of the company during a particular period of time. For most businesses (and for most bankers), income projections covering one to three years are more than adequate.

If you are in a start-up situation, look for financial-statement information and income ratios for businesses similar to yours. The Robert Morris Associates' Annual Statement Studies and trade association publications are two possible sources.

NOTE: The following Income Projection Statement is required to be completed and submitted in the existing format (date range can be modified).

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 0596-0082. Response to this collection of information is mandatory. The authority to collect the information is the Organic Administration Act, 16 U.S.C. 551. The time required to complete this information collection is estimated to average 8 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the State or local Agency or contact USDA through the Telecommunications Relay Service at 711(voice and TTY). Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at How to File a Program Discrimination and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by: (1) mail: U.S. Department of Agriculture, Office of the Assistant Secretary for Civil Rights, 1400 Independence Avenue, SW, Mail Stop 9410, Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program.intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

The Privacy Act of 1974 (5 U.S.C. 552a) and the Freedom of Information Act (5 U.S.C. 552) govern the confidentiality to be provided for information received by the Forest Service.

Appendix 19: National Quality Standards for Recreation Site Management (formerly Meaningful Measures)

National Quality Standards for Recreation Site Management and Best Management Practices
(Formerly known as Meaningful Measures Standards)

National Quality Standards for developed sites have been established for the Key Measures: Health and Cleanliness, Safety and Security, Condition of Facilities, Responsiveness, Resource Setting. Critical National Standards are identified with an asterisk (*). If not met, the resulting conditions pose a high probability of immediate or permanent loss to people or property.

Key Measure: HEALTH AND CLEANLINESS

- *Visitors are not exposed to human waste.
- *Water, wastewater, and sewage treatment systems meet federal, state and local water quality regulations.
- Garbage does not exceed the capacity of garbage containers.
- Individual units and common areas are free of litter including domestic animal waste.
- Facilities are free of graffiti.
- Restrooms and garbage locations are free of objectionable odor.
- Constructed features are clean.

Key Measure: RESOURCE SETTING

- *Effects from recreation use do not conflict with environmental laws (such as ESA, NHPA, Clean Water, TES, etc).
- Recreation opportunities, site development, and site management are consistent with Recreation management system (ROS, SMS, BBM) objectives, development scale, and the Forest land management plan.
- Landscape character at the developed recreation site is consistent with the Forest scenic integrity objectives.
- Visitors and vehicles do not exceed site capacity.

Key Measure: SAFETY AND SECURITY

- *High-risk conditions do not exist in developed recreation sites.
- *Utility inspections meet federal, state, and local requirements.
- Laws, regulations and special orders are enforced.
- Visitors are provided a sense of security

Key Measure: RESPONSIVENESS

- *When signed as accessible, constructed features meet current accessibility guidelines.

- Visitors feel welcome.
- Information boards are posted in a user-friendly and professional manner.
- Visitors are provided opportunities to communicate satisfactions (needs, expectations).
- Visitor information facilities are staffed appropriately during seasons of use and current information is available.
- Recreation site information is accurate and available from a variety of sources and outlets.

Key Measure: CONDITIONS OF FACILITIES

- Constructed features are serviceable and in good repair throughout the designed service life.
- Constructed features in disrepair due to lack of scheduled maintenance, or in non-compliance with safety codes (e.g. life safety, OSHA, environmental, etc.) or other regulatory requirements (ABA/ADA, etc.), or beyond the designed service life, are repaired, rehabilitated, replaced, or decommissioned.
- New, altered, or expanded constructed features meet FS design standards and are consistent with an approved site development plan, including an accessibility transition plan.

Public Service Maintenance Standards

The following standards should be met in sites offering services to the public. These standards are necessary to ensure a pleasant recreation experience for the visitor.

Toilets, showers, and dressing areas

- Toilet bowls, risers, seats, seat covers, and urinals free of deposits on surfaces
- Building interiors free of dirt, trash, graffiti, insects (dead and alive), and spider webs
- Floors free of standing water
- Chromeware clean and bright
- Toilet paper, towels, and seat covers (where provided), stocked to last until next day and/or cleaning
- Unpleasant odors (both sewage and chemical) minimized
- All restroom buildings and individual toilet units will be fully open and accessible during the entire operating season to accommodate public service needs.

Toilets and other buildings (exterior)

- Walkways and trails clean and clear of obstructions for public safety and accommodating people with disabilities
- Floor mats clean
- Exterior walls free of graffiti
- Roof generally free of leaves and branches
- Eaves free of wasp nests, bird nests, and spider webs

Toilet vaults

- Vaults not more than three-fourths full
- During pumping, the vaults should be cleaned as thoroughly as possible to help prevent the production of odors.

Tables and benches

- Tops and seats free of dirt, grease, and large carvings
- Under portion free of spider webs, etc.
- Tops, seats, and legs secure and functional

Fireplaces, char-grills, fire rings, and stoves

- No more than half-full of ashes
- All ashes and partially burned wood confined to fireplace or grill
- Grill surface free of grease and food particles at time of ash removal Pedestals and bases straight and secure, and components functional Leftover firewood stacked beside unit.

Garbage cans and depositories

- Plastic liner half-full or less
- Cans clean on the outside; all litter and debris picked up around cans or container

Hand-pumps, fountains, and hydrants

- All units free of grease or residue
- All units secure and drip-free
- Catch basins (drains) free of food particles, soaps, grease, debris, standing water, and functioning properly

American River Ranger District

North Fork Campground

Location Description and History

The North Fork Campground, at an elevation of 4,400 feet, is located seven miles south of Interstate 80 on Texas Hill Road and is accessed from the Emigrant Gap exit on I-80 (28-miles west of Truckee). The site is located near a beautiful creek along the banks of the North Fork of the North Fork American River. It is shaded by large cedar, pine and fir trees, this riparian environment provides an escape from the nearby urban areas to the east and west. There is a great swimming hole at the end of the campground. Roads and spurs within the facility are gravel and/or natural surface.

Site Count

There are 17 single campsites.

Host Site

There is one designated host site, included in the count above. There are no hookups at the host site.

Amenities

Each campsite has a picnic table, fire ring/grill, bear box, and parking spur. There are two vault toilets (double riser). Potable water is available from a gravity flow spring-fed water system (one faucet). There is one Forest Service owned garbage bin available.

Reservations

The site is reservable on recreation.gov.

Miscellaneous

During the peak summer months, the campground is typically full on the weekends and half-full on weekdays. Due to its remote location, there is no cell service at this campground.

Onion Valley Campground

Location Description and History
The Onion Valley Campground, at an elevation of 4,400 feet, is located between the North Fork and Tunnel Mills Campgrounds.

Site Count
There are seven single campsites.

Host Site
There is no designated host site.

Amenities
Each of the campsites includes a picnic table, fire ring/grill and parking area. The campground is served by a vault toilet (single riser). No potable water is available at this facility, but campers can fill water containers at nearby North Fork Campground. There is one Forest Service owned garbage bin available.

Reservations
The site is not reservable on recreation.gov.

Miscellaneous
Due to its remote location, there is no cell service at this campground.

Tunnel Mills Group Campground

Location Description and History
Tunnel Mills Group Campground, at an elevation of 4,400 feet, is located one and a half miles beyond North Fork Campground on Texas Hill Road. The campground is bordered by the East Fork of the North Fork of the North Fork American River and is shaded by large pine and fir trees. The road and parking area are natural surface and parking space is limited.

Site Count
There are two group campsites, the maximum capacity of each is 30 persons at one time.

Host Site
There is no designated host site.

Amenities
There are picnic tables, grills, bear boxes, and three vault toilets (double riser). There is no potable water at this site, but campers can fill water containers at nearby North Fork Campground.

Reservations
The site is reservable on recreation.gov.

Miscellaneous
Due to its remote location, there is no cell service at this campground.

Sierraville Ranger District

Aspen Picnic Site

Location Description and History
Aspen Picnic Site, at an elevation of 6,100 feet, is on the northern shore of the scenic Jackson Meadow Reservoir.

Amenities
The picnic area offers a parking area, vault toilet (one riser), picnic tables, trash service, and pedestrian access to the reservoir.

East Meadow Campground

Location Description and History
East Meadow Campground, at an elevation of 6,100 feet, is on the northeastern shore of the scenic Jackson Meadow Reservoir in a forest of pine and fir trees. Some campsites have a view of the lake and visitor boats can be moored nearby.

Site Count
There are 42 single sites, including a designated host site, and 2 double sites.

Host Site
There is one designated host site included in the count above. The host site has a water hookup and storage shed.

Amenities
Each campsite contains a picnic table, bear box, and campfire ring. Three flush bathrooms and one vault toilets (single riser) are available to visitors. Two flush bathrooms have a women's with two toilets and a men's with one toilet and one urinal. The third has a women's single toilet and a men's single toilet. There is no potable water. There are three Forest Service owned garbage bins available.

Reservations
The site is reservable on recreation.gov.

Findley Campground

Location Description and History
Findley Campground, at an elevation of 6,100 feet, is located alongside the scenic Jackson Meadow Reservoir.

Site Count
There are 14 single-family campsites.

Host Site
There is no designated host site.

Amenities
Each campsite is equipped with a picnic table, bear box, and campfire ring. One flush toilet bathroom and potable water are available to visitors. The bathroom has a women's side with two flush toilets and a men's side with one toilet and one urinal.

Reservations
The site is reservable on recreation.gov.

Fir Top Campground

Location Description and History
Fir Top Campground, at an elevation of 6,100 feet, is located alongside the scenic Jacson Meadow Reservoir.

Site Count
The campground offers 12 single-family campsites.

There is no designated host site.

Amenities
Each site is equipped with a picnic table, bear box, and campfire ring. A flushing toilet with a single toilet for women and a single toilet for men and potable water are available to visitors.

Reservations
The site is reservable on recreation.gov.

Jackson Point Boat In Campground

Location Description and History
Jackson Point Boat In Campground is located at an elevation of 6,100 feet on a peninsula on Jackson Reservoir's east side. The campground is reachable only by watercraft, but there is currently no formal moorings or a dock. The concessionaire will be required to own and utilize their own watercraft to adequately operate and maintain this campground.

Site Count
There are eight campsites.

Host Site
There is no designated host site.

Amenities
There are several picnic tables and fire rings and a pit toilet.

Reservations
The site is not reservable on recreation.gov.

Miscellaneous
The Forest does not have a site map for this location at this time; however the location of the campground is shown in Appendix 1 Vicinity and Area Maps.

Little Lasier Meadow Horse Camp

Location Description and History
Little Lasier Meadow Horse Camp, at an elevation of 6,500 feet, is near scenic Jackson Meadow Reservoir, approximately 32 miles north of Truckee, CA. The campground lies in a grassy meadow surrounded by lodgepole pine and fir trees and offers equestrian sites for campers with horses.

Site Count
There are 10 campsites.

Host Site
There is no designated host site.

Amenities
Each site is equipped with picnic tables, campfire rings, and hitching racks. A shared horse corral is also onsite. Visitors have access to a vault toilet (double riser). There is no potable water.

Reservations
The site is reservable on recreation.gov.

Miscellaneous
The Pacific Crest Trail passes just half a mile away from the campground.

Lower Little Truckee Campground

Location Description and History
Lower Little Truckee Campground, at an elevation of 6,100 feet, is situated on the banks of the Little Truckee River on Highway 89, about 11 miles north of Truckee. A forest of lodgepole pine, aspen, and juniper trees cover the area, offering partial shade. A few sites overlook the river. Fishing for rainbow and brown trout is a popular activity at the campground.

Site Count
There are 15 campsites.

Host Site
There is one designated host site with a water hookup included in the site count above.

Amenities
Each site is equipped with a picnic table and campfire ring. Two vault toilets (one single-Riser and one double-riser) are available to visitors. Potable water is available.

Reservations
The site is reservable on recreation.gov.

Pass Creek Campground

Location Description and History
Pass Creek Campground, at an elevation of 6,100 feet, is located on the northeast shore of Jackson Meadow Reservoir and provides a wide range of recreational activities including boating, canoeing, water skiing, swimming, fishing, hiking, and hunting. Anglers will find rainbow and brown trout. Visitors are awarded beautiful views of the Sierra Crest and English Mountain. The campground lies in a dense stand of pine and fir trees.

Site Count
The campground offers 30 single-family campsites.

Host Site
There is one designated host site included in the count above. There is water and a blackwater outlet into the adjacent toilet for the host site.

Amenities
Each site is equipped with a picnic table, bear box, and campfire ring. There is also a shed for host use. The campground has two flush bathrooms and one double-riser vault toilet. The flush toilets have a women's with toilets and a men's with one toilet and one urinal. There are three Forest Service owned garbage/recycling bins available. Potable water is available to visitors.

There is a boat ramp nearby which has an accompanying double riser vault toilet. This boat ramp and vault toilet are not the responsibility of the concessionaire.

Reservations
The site is reservable on recreation.gov.

Pass Creek Annex Campground

Location Description and History
Pass Creek Annex Campground is located between the Pass Creek Boat Ramp and Pass Creek Campground. The sites are arranged in a small loop.

Site Count
There are two formal campsites and two informal campsites.

Host Site
There is no designated host site.

Amenities
The two formal sites have picnic tables and fire rings. Visitors are able to utilize restrooms at the neighboring Pass Creek Campground and Boat Ramp. There are three Forest Service owned garbage/recycling bins available.

Reservations
The site is not reservable on recreation.gov.

Upper Little Truckee Campground

Location Description and History
The Upper Little Truckee Campground, at an elevation of 6,100 feet, is located on Highway 89, about 12 miles north of Truckee, CA. The campground is situated on the banks of the Little Truckee River. A forest of lodgepole pine, aspen, and juniper covers the area, offering partial shade. A few sites overlook the river. Fishing for rainbow and brown trout is a popular activity at this campground.

Site Count
The campground offers 21 single-family campsites.

Host Site
There is one designated host site included in the count above. The host site has access to water and to a septic holding tank.

Amenities
Each site is equipped with a picnic table and campfire ring. Two vault toilets (double risers) and potable water are available to visitors.

Reservations
The site is reservable on recreation.gov.

Woodcamp Campground and Day Use Area

Location Description and History
Woodcamp Campground, at an elevation of 6,100 feet, is located on the scenic Jackson Meadow Reservoir. The picnic area is located nearby.

Site Count
The campground offers 20 single-family campsites.

Host Site
There is one designated host site included in the count above. Water is available at the site.

Amenities
Each campsite is equipped with a picnic table, bear box, and campfire ring. One vault toilet (double riser) and one flush toilet bathroom, with a single toilet for men and a single toilet for women, are available at the campground.

The nearby picnic area has a paved parking area, picnic tables, and a vault toilet (single riser). Potable water is available to visitors at the campground and picnic area. There is a boat ramp with a paved parking area and double vault toilet in the site area which is not part of the concessionaire's operation.

Reservations

The site is reservable on recreation.gov.

Truckee Ranger District

Boca Campground and Boat Ramp

Location Description and History

Boca Campground, at an elevation of 5,800 feet, is located on a plateau among the trees overlooking Boca Reservoir. Boca Boat Ramp is located along the southwest shore of Boca Reservoir near Boca Campground. The access road and spurs are constructed of native surface material.

Site Count

There are 26 campsites. Campsites 19-22 require a short walk in.

Host Site

There is one designated host site included in the count above. The host site has no hookups but does have a storage shed. There is a non-potable water tank at the host site for putting out campfires.

Amenities

Each site has a bear locker, fire ring, and picnic table. The campground is served by two vault toilets (double riser). The paved parking lot at Boca Boat Ramp can support 36 vehicles and accesses a two-lane concrete boat ramp. There is a vault toilet (single) at the boat ramp. No potable water is available at this site.

Reservations

The site is reservable on recreation.gov. Campsite #1, 3, 15, and 19 have not been on recreation.gov and have operated on a first come first served basis.

Miscellaneous

The boat ramp is unusable during periods of low water on the reservoir.

Boca Rest Campground

Location Description and History

Boca Rest Campground, at an elevation of 5,700 feet, is located along the northeast shore of Boca Reservoir approximately two miles north of Boca Dam. The vegetation surrounding the site is sparse, offering minimal shade, but sites are well-spaced offering plenty of separation between campsites. The campground road loops and spurs are native surface.

Site Count
There are 39 campsites.

Host Site
There is one designated host site included in the count above. The host site has no electrical hookups but does have a septic holding tank.

Amenities
Each campsite has a picnic table, bear box, and fire ring. The potable water system includes seven faucets, one of which is at the designated host site. There are two vault toilets (double riser).

Reservations
The site is reservable on recreation.gov.

Miscellaneous
This campground connects directly to OHV access and is considered an OHV campground.

Boca Springs Campground

Location Description and History
Boca Springs Campground, at an elevation of 5,900 feet, is located approximately one mile east of Boca Rest Campground along Forest Road 72. The campground is located within a heavily forested stand of yellow pine. Campsites are accessed by native surface roads and spurs.

Site Count
There are 16 single-family campsites. There is one group campsite with the capacity to serve 25 people.

Host Site
There is one designated host site included in the above count. The host site has no electrical hook ups, but it does have water and a blackwater tank.

Amenities
Each campsite has a picnic table, bear locker, and fire ring/grill. Other amenities include a vault toilet (double riser) and facilities for equestrian use such as a hitching rail and water trough. The group site includes multiple picnic tables and one large fire ring. The campground shares a potable water system with Boca Rest Campground, having two water faucets that serve the facility.

Reservations
The site is reservable on recreation.gov.

Miscellaneous
This campground connects directly to OHV trails and is considered an OHV campground.

Boyington Mill Campground

Location Description and History

Boyington Mill Campground, at an elevation of 5,700 feet, is located approximately 4 miles north of Boca Dam along the Little Truckee River. Stampede and Boca Reservoirs are also nearby for boating and swimming opportunities. Vegetation surrounding the site is sparse. The campground is served by native surface access road and spurs.

Site Count

There are 12 single-family campsites.

Host Site

There is no designated host site.

Amenities

Each campsite contains a picnic table, bear box, formal tent pads, and fire ring/grill. There is a vault toilet (single riser). Potable water is not available, but there is a non-potable water tank for putting out campfires.

Reservations

The site is reservable on recreation.gov.

Miscellaneous

This campground connects directly to OHV access and is considered an OHV campground.

Captain Roberts Boat Ramp

Location Description and History

Captain Roberts, at an elevation of 6,000 feet, is located adjacent to Logger Campground.

Amenities

The concrete boat ramp is six lanes wide with a floating courtesy dock as part of the boat ramp operation. A vault toilet (double riser) and potable water from two faucets are available to visitors. There is a paved and striped parking lot as well as an overflow parking area with an additional vault toilet (double riser) that serves this site and the adjacent disc golf course with 215 spaces.

Miscellaneous

Historically, there has been a weekend day use fee, and a site attendant has been present on the weekends to facilitate this collection and monitor the site.

Emigrant Group Campground

Location Description and History

Emigrant Group Campground, at an elevation of 6,000 feet, is located along the beautiful Stampede Reservoir approximately 18 miles from Truckee. The campground is situated on the south side of the Reservoir amidst a forest of ponderosa pine, Jeffrey pine, and fir trees that

provide ample shade. Boating, water skiing, swimming and fishing are popular activities on the reservoir. Anglers will find rainbow and brown trout and kokanee salmon. A boat ramp is located half a mile away.

Site Count
The campground has four group sites, the largest of which are called the Woodsman and Prospector sites and can accommodate up to 50 people each. The smaller two group sites are called the Rancher and Trapper and each accommodate up to 25 people.

Host Site
There is one designated host site which has no electrical hookup, but it has water and a septic holding tank. The host site is a pull-through site.

Amenities
All group sites have their own central cooking and picnic area, equipped with a large campfire ring. Approximately six tables and four grills are provided at each site as well. Horseshoe pits are located at the Woodsman site. Drinking water sources and three vault toilets (double risers) are available to visitors throughout the campground.

Reservations
The site is reservable on recreation.gov.

Goose Meadow Campground

Location Description and History
Goose Meadow Campground, at an elevation of 6,000 feet, is located 4.5 miles south of Truckee and 10.5 miles north of Lake Tahoe along Highway 89. Campsites are accessed by graded native surface roads and parking spurs. Except for a few pull-through sites, most spurs are short and the road has a tight turning radius.

Site Count
There are 24 campsites,

Host Site
There is a designated host site included in the count above. The host site has electrical and water hookups as well as a blackwater tank.

Amenities
Each site is equipped with a picnic table, campfire ring/grill, and bear box. There are two vault toilets (double riser) and potable water. The water system for this site includes an on-site pump house.

Reservations
The site is reservable on recreation.gov.

Miscellaneous
Due to its location, noise from Highway 89 is audible within the campground.

Granite Flat Campground

Location Description and History

Granite Flat Campground, at an elevation of 5,800 feet, is located on Highway 89 approximately 1.5 miles south of Truckee and 13.5 miles north of Lake Tahoe. All sites are a short walking distance to the river.

Site Count

Of the 75 single-family campsites, 12 include pull-through spurs and 7 are walk-in tent sites.

Host Site

There is one designated host site, included in the count above, with electricity, a septic holding tank, and water available.

Amenities

Each campsite, excluding the overflow site, has a picnic table, fire ring/grill, and bear box. All roads and spurs in the campground are paved with the average spur being 50 feet in length. Other facilities include five vault toilets (double riser) and potable water. The water system for this site includes an on-site pump house. A fishing access trail follows the Truckee River within the campground limits and will be maintained by the permit holder. The forest currently has new interpretive signs for this trail that are awaiting installation.

Reservations

The site is reservable on recreation.gov.

Miscellaneous

One of the sites, located directly behind the host site, has historically been used solely for overflow and contains only a picnic table and fire ring. Due to its location, noise from Highway 89 is audible within the campground.

Lakeside Campground

Location Description and History

Lakeside Campground, at an elevation of 5,700 feet, is located along the northwest shore of Prosser Reservoir and accessed from Forest Road 89-32. The campground is surrounded by yellow pine interspersed with brush and sage. The campsites are accessed by natural surface road and spurs.

Site Count

There are 42 single-family campsites.

Host Site

There is one designated host site included in the count above. There are no hookups at the designated host site, but a septic holding tank is available.

Amenities
Each campsite has a picnic table, bear locker, and fire ring. There are two vault toilets (double riser).

There is a potable water system at this site; however, the system has been down for several years. The forest will be submitting a request for Great American Outdoors Act (GAOA) funds to restore this system. If the requested funds are approved, planning could begin in 2027 and implementation of work in 2028 or 2029.

Reservations
The site is reservable on recreation.gov.

Miscellaneous
This campground connects directly to OHV trails and is considered an OHV campground.

Some of the campsites in Lakeside can flood when the reservoir is full, which usually occurs in the month of June, and possibly into July. These sites often include Sites 1-12 (the southern loop) as well as rarely, when the water level is extremely high, waterfront sites 13, 14, 15, 16, and 18. During this time, these sites will not be available for use by the public, due to flooding of the access road or the sites themselves. The reservoir level is managed by the Bureau of Reclamation (BOR). The BOR will provide projections annually on expected reservoir levels.

Logger Campground and Dump Station

Location Description and History
Logger Campground, at an elevation of 5,900 feet, has over 200 campsites dispersed throughout six separate loops. Approximately four miles of paved interior roads provide vehicle access to campsites. Vegetation in the area consists primarily of yellow pine interspersed with white fir. The Logger Dump Station is a quarter mile from the campground entrance and has historically accepted credit card payment only.

Site Count
There are 202 total campsites which include 153 single family, 43 double, and 1 triple.

Host Site
There are five designated host sites included in the site count total above. The designated host sites have water hookups and septic holding tanks. There is an unnumbered site, which can be utilized as a host site, with no hookups or blackwater tank. Two additional designated host sites, located outside of but adjacent to the campground, have full hookups for electricity, blackwater tanks, and water.

Amenities
Included at each site is a fire ring/grill, picnic table, and a paved parking spur. Amenities for all visitors include 17 vault toilets (15 double risers and 2 single risers), potable water (56 faucets), and a shoreline trail system that accesses other recreational facilities at Stampede. An amphitheater is located within the campground area on its own loop and is accessed by the shoreline hiking trail.

Reservations
The site is reservable on recreation.gov.

Miscellaneous
An interior gate system at the campground allows loops to be closed during the spring/fall seasons when use varies significantly or when facility maintenance is necessary. An entrance booth at the main entrance provides for efficient collection of entrance fees and traffic management.

Prosser Campground and Boat Ramp

Location Description and History
Prosser Campground, at an elevation of 5,900 feet, is accessed from Forest Road 89-32 and located on the northwest level of Prosser Reservoir. Campsites are accessed by gravel roads and spurs; relatively tight turns can be challenging for larger RVs or RVs with inexperienced drivers. Prosser Boat Ramp is a concrete boat ramp adjacent to Prosser Ranch Group Campground.

Site Count
There are 29 single-family campsites.

Host Site
There is no designated host site.

Amenities
The campsites each have picnic tables, pedestal grills, bear lockers, and fire ring/grills. Two vault toilets (double riser) are available to visitors. The Prosser Boat Ramp shares a large, paved parking area with an approximately 50-vehicle capacity and one vault toilet (double riser) with Prosser Ranch Group Campground.

There is a potable water system at this site which includes eight faucets; however, the system has been down for several years. The forest will be submitting a request for Great American Outdoors Act (GAOA) funds to restore this system. If the requested funds are approved, planning could begin in 2027 and implementation of work in 2028 or 2029.

Reservations
The site is reservable on recreation.gov.

Prosser Ranch Group Campground

Location Description and History
Prosser Ranch Group Campground, at an elevation of 5,800 feet, is located on a sage and pine covered hilltop overlooking Prosser Reservoir about 10 miles north of Truckee. Visitors to the area often enjoy boating, kayaking, swimming, fishing, and, due to the nearby Prosser Hill OHV trail system, abundant hiking and off-road trails.

Site Count
The campground offers one tent only group campsite that can accommodate up to 50 people and 10 vehicles. The site is not suitable for RV camping.

Host Site
There is no designated host site.

Amenities
Picnic and serving tables, fire rings, bear lockers, a large BBQ, and potable water are available to visitors along with one vault toilet (double riser) which also serves the Prosser Boat Ramp.

Reservations
The site is reservable on recreation.gov.

Silver Creek Campground

Location Description and History
Silver Creek Campground, at an elevation of 6,000 feet, is located seven miles south of Truckee and 8 miles north of Lake Tahoe along Highway 89. Campsites are accessed by paved surface roads and gravel parking spurs. Except for a few pull-through sites, most spurs are short and the road has a tight turning radius.

Site Count
There are 28 single-family campsites, each

Host Site
There is one designated host site included in the site count above. The host site has electrical and water hookups with a septic holding tank.

Amenities
Each campsite includes a picnic table, fire ring/grill, and bear box. Many of the campsites also contain pedestal grills. There are two vault toilets (double riser) and potable water available to visitors. The water system for this site includes an on-site pump house.

Reservations
The site is reservable on recreation.gov.

Miscellaneous
Due to its location, noise from Highway 89 is audible within the campground.

Yuba River Ranger District

Berger Creek Campground

Location Description and History
Berger Campground, at an elevation of 5,900 feet, is located in the Packer Lake area and the Sierra Buttes, north of the Yuba River. Visitors can enjoy a wide variety of recreational activities in the area, including hiking, equestrian use, hunting, fishing, canoeing, and OHV use. Sites have limited space for trailers or RVs.

Site Count
The campground consists of 9 single-family campsites separated into two loops.

Host Site
There is no designated host site.

Amenities
Each campsite has a picnic table, bear box, and campfire ring. A vault toilet (single riser) is available to visitors. Potable water is not available at this site, but visitors can fill up with water at Packsaddle Campground.

Reservations
The site is reservable on recreation.gov.

Big Bend Group Campground and Day Use Area

Location Description and History
Big Bend Group Campground, at an elevation of 5,700 feet, is located off Interstate 80, along old Highway 40, approximately 19 miles west of Truckee. The facilities can be accessed from the Big Bend and Rainbow Road exits. The campground is alongside the South Yuba River amidst a forest of large pine and fir trees. Day hiking and backpacking opportunities are nearby at the Loch Leven Trailhead. The facilities are accessed by a paved campground road.

Site Count
There are two group sites, Lincoln and Victory, each able to accommodate 25 people and five vehicles at one time. This site also includes three picnic sites, at the adjacent day use area.

Host Site
There is no designated host site.

Amenities
Amenities include four vault toilets (single riser), potable water, picnic and serving tables, fire ring/grills, and paved parking spurs.

Reservations
The site is reservable on recreation.gov.

Diablo Campground

Location Description and History

Diablo Campground, at an elevation of 5,800 feet, is located in the Packer Lake area near the Sierra Buttes, in northern California. It is north of the Yuba River and next to Packer Creek. Visitors can enjoy a variety of activities including hiking, biking, hunting, fishing, and canoeing. Not all sites are accessible for RVs.

Site Count

The campground consists of 19 single-family campsites separated into two loops.

Host Site

There is no designated host site.

Amenities

Each campsite has a picnic table, bear box, and campfire ring. A vault toilet (double riser) is available to visitors. Potable water is not available at this site, but visitors can fill up with water at Packsaddle Campground.

Reservations

The site is reservable on recreation.gov.

Hampshire Rocks Campground

Location Description and History

Hampshire Rocks Campground, at an elevation of 5,300 feet, is located approximately 18 miles west of Truckee and is accessed from Interstate 80 at the Rainbow Road exit. Bordered by the South Yuba River the campground sits among lodgepole pine, cottonwood, and moderately dense brush. The campsites are accessed by paved roads.

Site Count

There are 31 single-family campsites.

Host Site

There is one designated host site included in the site count above. The host site has a water hookup.

Amenities

Each site includes a picnic table, fire ring/grill, and parking spur (most are paved with some natural surface). Hampshire Rocks is served by three vault toilets (double riser) and potable water supplied by a well with a gravity distribution system filling a 2,000-gallon storage tank (7 faucets).

Reservations

The site is reservable on recreation.gov.

Packsaddle Campground

Location Description and History

Packsaddle Campground, at an elevation of 6,100 feet, is surrounded by pine and fir trees with a view of the Sierra Buttes and alpine lakes. It is located 2 ½ miles west of Gold Lake Highway on Packer Lake Road.

Site Count

There are 16 single-family campsites, two of which are equestrian sites.

Host Site

There is no designated host site.

Amenities

Each site is equipped with a picnic table, bear box, and campfire ring. The two equestrian campsites share a corral and have ample space for stock trailers. Potable water (hand pump) and a vault toilet (double riser) are available to visitors.

Reservations

The site is reservable on recreation.gov.

Miscellaneous

A large network of trails is available in the area, including Deer Lake Trail, a 2.9-mile trail open to hiking, horseback riding, and mountain biking. The Pacific Crest Trail can also be easily accessed nearby.

Salmon Creek Campground

Location Description and History

Salmon Creek Campground, at an elevation of 5,700 feet, is located two miles north of Bassetts on the Gold Lake Highway near Salmon Creek. The campground is surrounded by lodgepole pine and cedar trees.

Site Count

There are 31 single-family campsites. Some of the campsites are tent-only.

Host Site

There is one designated host site included in the site count above. The host site has water and septic holding tank hookups.

Amenities

Each campsite has a picnic table, bear box, and campfire ring. There are four vault toilets (double riser) and potable water available to visitors. There is one Forest Service owned garbage bin available.

Reservations

The site is reservable on recreation.gov.

Sardine Campground

Location Description and History

Sardine Campground, at an elevation of 5,700 feet, is located 1.5 miles north of Bassetts on the Gold Lake highway and half-a-mile southwest on the Sardine Lake Road. The campground is located in a lodgepole pine forest with Sardine Lake nearby for fishing and swimming.

Site Count

There are 26 single family and one double family campsite.

Host Site

There is one designated host site included in the site count above. The host site has water and power hookups.

Amenities

Each campsite has a picnic table, campfire ring, and bear box. Most of the campsites have space for a trailer. There are three vault toilets (double riser) and potable water available to visitors. There is one Forest Service owned garbage bin available.

Reservations

The site is reservable on recreation.gov.

Snag Lake Campground

Location Description and History

Snag Lake Campground, at an elevation of 6,600 feet, has been non-reservable and operated on a first-come, first-served basis. Most of the campsites have a view of the lake and can accommodate small trailers.

Site Count

There are 12 single-family campsites.

Host Site

There is no designated host site.

Amenities

Each campsite has a picnic table and campfire ring/grill. There is a vault toilet (double riser) for visitors. Potable water is not available at this site, but visitors can access water at Salmon Creek Campground.

Reservations

The site is not reservable on recreation.gov.

Miscellaneous

Visitors can utilize non-motorized boats and watercrafts only on Snag Lake.
