US Space Force Delta 10: Future Focus and Priorities for Wargaming

January 16, 2025
1:00-3:00 PM EST

Space Delta 10 (DEL 10) is a United States Space Force (USSF) unit responsible for space doctrine, wargaming, and lessons learned. Established on 23 August 2021, Delta 10 reports to the Space Training and Readiness Command(STARCOM). It is based at Patrick Space Force Base and Cape Canaveral Space Force Station, FL.

As Space Force continues to evolve and grow - including the initiation of Space Futures Command - Delta 10 is evolving as well. The emphasis is shifting more and more to wargaming to test potential technologies through tabletop exercises and learning campaigns, do requirements validation to ensure new programs have rigorous analytical backing, and strengthen training and readiness for operating in the space domain.

On January 16, Delta 10 Commander Colonel Shannon Dasilva and other members of her leadership will share insights into the focus and future of Delta 10 and how you can engage to support them.

Strategic Environmental Research and Development Program (SERDP) Table Top Exchange

January 24 2025
1PM - 4PM EST

Our objective is to leverage our expertise in advanced technologies and innovation to assess and develop capabilities identified through a comprehensive technology scan and subsequent prize challenge. This project aims to enhance firefighting functions by rapidly evaluating and deploying advanced remotely operated equipment, ground-based autonomous vehicles, and other remote-operated technologies (excluding aircraft) for use in wildfire response, particularly in hazardous conditions. The goal is to collaborate with industry and academic partners to advance these technologies toward a fully functional fire line solution.

Wildland fire response on and near military lands is becoming increasingly complex due to hazardous fuel conditions and a warming climate. Remotely automated equipment, developed through various DoD-funded and private sector innovations, has proven useful in wildfire response. However, accessing and rapidly assessing these private and academic investments is critical to improving firefighting functions in these hazardous conditions.

Contract Opportunity

Bridge to Evolutionary STE TESS Multiple Award Contract (BEST-MAC)

The work to be performed under this contract will consist of:

- Procurement of new TESS to support new vehicle platforms and any requirements resulting from Army stationing decisions
- Support Service Life Extension for TESS product lines
- Tech refreshing TESS product lines to interface with STE Live
- Tech refresh TESS product lines to install new hardware and software
- Tech refresh TESS product lines with Live Training Engagement Composition (LTEC) updates
- Tech refresh TESS product lines with multi-national interoperability updates
- Lot 1 - Modify existing TESS to extend product life and meet the Army's evolving requirements. The focus of Lot 1 is to provide Service Life Extension Programs (SLEP) to existing TESS.
- Lot 2 - Procure new modernized TESS. Lot 2 will focus on Army Force Structure changes and modernization of the current TESS and insertion of STE Based TESS. Lot 2 will include systems that must be replicated through procurement instead of SLEP.

Contract Opportunity

Family of Maintenance Trainers (FMT) Product Line (PL)

- FMT PL will utilize a Government owned architecture and a common software and hardware baseline (Common Core) to provide fault diagnosis, troubleshooting, repair removal and replacement maintenance task training for multiple military platforms.
- FMT PL is comprised of the Common Core, Diagnostic Troubleshooting Trainers (DTTs), Part Task Trainers (PTTs), and Hands On Trainers (HOTs).
- FMT PL provides efficient, effective, and agile processes to accomplish production, tech refresh, cybersecurity, fielding, obsolescence management, concurrency, upgrades, and disposal of legacy and obsolete hardware.
- FMT PL eliminates duplication across development and sustainment efforts, establish a common software and hardware baseline across the product line, and promote maximum reuse of existing systems/subsystems.

Contract Opportunity

PdM CRT Topic: Persistent Cyber Training Environment (PCTE) Cyber Innovation Challenge (CIC) #5

Objective

- Decrease **Time** to Produce and Present Training
- Increase Training **Quality**

Problem Statement

New requirements are being introduced by USCYBERCOM for the CIC5 effort identifying the need for Artificial Intelligence (AI) enabled cyber capability that can emulate the training environment.

Vision

Provide a highly advanced PCTE platform that enhances the user experience while minimizing the need for direct human involvement. By incorporating human-centric tasks, the platform could leverage advanced technologies such as advanced user emulation, automated help desk functions, user document creation, and resource utilization prediction to create a seamless experience. This will lead to a more efficient, user-friendly platform that enhances productivity, while reducing the workload on human operators.

ACQUISITION STRATEGY

- PdM CRT in support of the PCTE is pursuing CIC #5 for FY26 award
- We are seeking to enhance and address PCTE training platform needs through a continued multi-vendor best-of-breed integrated capability
- Capability gaps are currently being assessed by USCYBERCOM and the program office

CURRENT CONTRACT/ORIGINAL DEVELOPER/OEM (IF RECOMPETE)

- Current contract does not exist. Future contract will be an OTA with industry
- Initial RFS will include paper submission of Artificial Intelligence (AI) Concept of Operations, Technical Data Package, System Architecture.

PERIOD OF PERFORMANCE

Contract Opportunity

PdM CRT Topic: Persistent Cyber Training Environment (PCTE) Capability Market Research

Objective

- Decrease **Time** to Produce and Present Training
- Increase Training **Quality**
- Affordable Scalable Solutions

Market Research

PdM CRT is currently conducting market research of cyber range development software application capabilities. This Software Product must meet minimum integration with existing PCTE platform to support individual and collective training. Additional technical features include cyber-security, user friendliness, hypervisor-agnostic, Technical Architecture (support for virtualization servers, a control plane for management and event planes for cyber training sessions, and experiments), Cloud compliant and licensing cost. Industry is invited to provide software product capability description, product literature and technical data sheets to support the initial phase of market research.

ACQUISITION STRATEGY

- We are conducting market research to enhance and address PCTE training platform needs and affordability concerns through a continued multi-vendor integrated capability

DIR IMO Topic: Test Resource Management Center (TRMC) Test & Evaluation (T&E) Science & Technology (S&T) Program

T&E/S&T Program sponsors projects with Technology Readiness Levels (TRLs) 3-6.
The T&E/S&T Program will accept a high degree of technical risk to fund innovations that could result in high-payoff technological advancements. The T&E/S&T Program will consider novel, unproven solutions that are deemed too risky to be adopted in current DoD T&E approaches.

New Test Technology Focus Areas:

- High Speed Systems Test (6 topics)
- Directed Energy Test (5 topics)
- Autonomy and Artificial Intelligence Test (3 topics)
- Spectrum Efficiency Test (1 topic)
- Nuclear Environments Test (2 topics)
- Advanced Instrumentation Systems Technology (2 topics)
- Cyber Test Technology (1 topic)

ACQUISITION STRATEGY

- Comprehensive suite of contracting tools to invent new test technology
- Army, Navy, Air Force, Marine & Space Force
- Broad Agency Announcement (BAA)
- T&E OTA Consortium (TReX II)
- Competition: Full and Open

PdM FTS Topic: Special Operations Forces Training, Engineering, and Maintenance Support IV (SOF TEAMS IV)

SOF TEAMS IV

- Supports the 160th Special Operations Aviation Regiment (SOAR) located at Ft. Campbell, KY.
- SOF TEAMS IV provides maintenance and support for the 160th SOAR training operations to the Combat Mission Simulators (MH-47G, MH-60M, A/MH-6) and related Training Aids, Devices, Simulators and Simulations (TADSS).
- Tasks include scheduled and unscheduled maintenance, repair, supply support, transportation, hardware/software engineering support, site operations support, and operational support of training equipment.
- Operations and maintenance tasks will employ a mix of firm-fixed price and cost-plus-fixed-fee CLINS for the base year with four one-year options.
- Contract will have the scope to support 160th SOAR(A) at CONUS locations other than Ft. Campbell, KY (if required).

ACQUISITION STRATEGY

- Full and Open Competition
- Single-award C-Type contract, managed by PdM FTS
- CLINs consisting of Firm–Fixed Price (FFP) and Cost Plus Fixed Fee (CPFF)

One Semi-Automated Forces (OneSAF)

Constructive simulation that models platforms, systems, and U.S. Army doctrine at the Brigade and Below levels.

- Government Off-the-Shelf software
- Uses official U.S. Army data for unit composition
- Physics-based, entity modeling with validated data
- OneSAF supports the six Modeling and Simulation Communities, including 200+ users (CONUS and OCONUS), and Foreign Military Sales expansion with its annual software releases.
- Cloud-enabled software (accessible remotely anywhere/anytime)
- Bi-directional stimulation/simulation of Mission Command (MC) systems
- Enhanced cyber effects on MC messages
- Enhanced Chemical, Biological, Radiological, Nuclear (CBRN) modeling
- Runs on multiple hardware platforms (mobile/tablet/PC/Server/Virtual)

Next Generation Constructive (NGC) Acceleration

The Army's Synthetic Training Environment (STE) Next Generation Constructive (NGC) is the future of constructive training for Corps level capability. NGC will enable the Army to close command staff training gaps against near-peer threats within a Multi-Domain Operations (MDO) environment scaled through the Army Service Component Command (ASCC) level. This seamless delivery of NGC is built off the STE Software (SW) foundation to achieve Army training readiness needs.
