Contract Opportunity

Bridge to Evolutionary STE TESS Multiple Award Contract (BEST-MAC)

The work to be performed under this contract will consist of:

- Procurement of new TESS to support new vehicle platforms and any requirements resulting from Army stationing decisions
- Support Service Life Extension for TESS product lines
- Tech refreshing TESS product lines to interface with STE Live
- Tech refresh TESS product lines to install new hardware and software
- Tech refresh TESS product lines with Live Training Engagement Composition (LTEC) updates
- Tech refresh TESS product lines with multi-national interoperability updates
- Lot 1 - Modify existing TESS to extend product life and meet the Army's evolving requirements. The focus of Lot 1 is to provide Service Life Extension Programs (SLEP) to existing TESS.
- Lot 2 - Procure new modernized TESS. Lot 2 will focus on Army Force Structure changes and modernization of the current TESS and insertion of STE Based TESS. Lot 2 will include systems that must be replicated through procurement instead of SLEP.

Family of Maintenance Trainers (FMT) Product Line (PL)

- FMT PL will utilize a Government owned architecture and a common software and hardware baseline (Common Core) to provide fault diagnosis, troubleshooting, repair removal and replacement maintenance task training for multiple military platforms.
- FMT PL is comprised of the Common Core, Diagnostic Troubleshooting Trainers (DTTs), Part Task Trainers (PTTs), and Hands On Trainers (HOTs).
- FMT PL provides efficient, effective, and agile processes to accomplish production, tech refresh, cybersecurity, fielding, obsolescence management, concurrency, upgrades, and disposal of legacy and obsolete hardware.
- FMT PL eliminates duplication across development and sustainment efforts, establish a common software and hardware baseline across the product line, and promote maximum reuse of existing systems/subsystems.

PdM CRT Topic: Persistent Cyber Training Environment (PCTE) Cyber Innovation Challenge (CIC) #5

Objective

- Decrease **Time** to Produce and Present Training
- Increase Training **Quality**
- Increase Training **Re-use**
- Increase Training **Throughput**

Purpose

The purpose of the PCTE training platform is to establish distributed, secure, reconfigurable environments where numerous independent training activities occur simultaneously to create a reliable training environment.

Vision

At End state, PCTE provides the DoD Cyberspace Workforce the capability to build and conduct full-spectrum, combined/joint cyberspace training, exercises, certification and mission rehearsal in a training environment that emulates a realistic operational environment that provides scope, scalability, and fidelity driven by training objectives and user-defined specifications.

ACQUISITION STRATEGY

- PdM CRT in support of the PCTE is pursuing CIC #5 for FY26 award
- We are seeking to enhance and address PCTE training platform needs through a continued multi- vendor best-of-breed integrated capability
- Capability gaps are currently being assessed by USCYBERCOM and the program office

Contract Opportunity

PL IMO Topic: Test Resource Management Center (TRMC) Test & Evaluation (T&E) Science & Technology (S&T) Program

T&E/S&T Program sponsors projects with Technology Readiness Levels (TRLs) 3-6. The T&E/S&T Program will accept a high degree of technical risk to fund innovations that could result in high-payoff technological advancements. The T&E/S&T Program will consider novel, unproven solutions that are deemed too risky to be adopted in current DoD T&E approaches.

Ten (10) Test Technologies are currently represented:

- High Speed Systems Test (HSST)
- Cyber Test Technologies (CTT)
- Electronic Warfare Test (EWT)
- Directed Energy Test (DET)
- Autonomy and Artificial Intelligence Test (AAIT)
- Advanced Instrumentation Systems Technology (AIST)
- Spectrum Efficiency Test (SET)
- Space Systems Test (SST)
- Nuclear Environments Test (NET)
- Command, Control, Communication, and Computer Test (C4T)

ACQUISITION STRATEGY

- Comprehensive suite of contracting tools to invent new test technology
- Army, Navy, Air Force, Marine & Space Force
- Broad Agency Announcement (BAA)
- T&E OTA Consortium (TReX II)
- Competition: Full and Open

CURRENT CONTRACT/ORIGINAL DEVELOPER/OEM (IF RECOMPETE)

Contract Opportunity

PL IMO Topic: National Cyber Range Complex (NCRC):

The NCRC: Event Planning, Operations, and Support (EPOS) IDIQ Contract supports the Test Resource Management Center (TRMC) / NCRC mission to provide realistic cybersecurity environments for T&E of major DoD acquisition programs and to enable the conduct of realistic training and certification events for the DoD Cyber Mission Force (CMF) and other operational commands.

Vision: The preferred cyber range provider leading the DoD in innovative cyber test and training technologies adaptive to multi-service/multi-domain requirements for DoD test and evaluation, training, and acquisition communities in support of the National Cyber Strategy.

Develop the TRMC/NCRC Enterprise locations (Orlando, Charleston, Pax River, Eglin) into an integrated and interoperable facilities designed to enable the planning and execution of large scale, complex, distributed cybersecurity events to satisfy customer requirements in the domains of R&D, S&T, DT&E, and OT&E.

Support Cyber Tabletops, Risk Reduction Events, Single System Events, System of Systems Events, Cyber Offensive/Defensive training, exercises, and mission rehearsal.

ACQUISITION STRATEGY

- Award Task Orders (TOs) under the Event Planning, Operations, and Support (EPOS) IDIQ Contract vehicle:
- Lot 1 – Large Business Industry Partners
- Lot 2 – Small Business Industry Partners

PL IMO Topic: Test Enterprise Network Modernization (TENM)

Test Enterprise Network Modernization (TENM)

Encompasses the requirements and acquisition approach for the networking efforts of the following projects:

- Test Network Modernization (TNM)
- ATEC Fiber Modernization (AFM)
- Future Wireless Network (FWN) projects

Driving Requirements

- TNM applies enterprise solutions to replace, modernize, and protect existing ATEC test network equipment to meet evolving cyber-security and increased bandwidth requirements.
- AFM provides 6 test centers and 5 operational test locations with a revitalized fiber network infrastructure to complement the TNM project to support greater data throughput, increased reliability and redundancy.
- FWN will complement the AFM project by leveraging existing and developmental wireless capabilities to the maximum extent possible to provide greater test coverage areas.

ACQUISITION STRATEGY

- Enterprise approach to upgrade/modernize network infrastructure across ATEC Developmental and Operational Test locations
- Competition: Yet to be determined; team is currently conducting Market Research

PdM FTS Topic: Special Operations Forces Training, Engineering, and Maintenance Support IV (SOF TEAMS IV)

SOF TEAMS IV

- Supports the 160th Special Operations Aviation Regiment (SOAR) located at Ft. Campbell, KY.
- SOF TEAMS IV provides maintenance and support for the 160th SOAR training operations to the Combat Mission Simulators (MH-47G, MH-60M, A/MH-6) and related Training Aids, Devices, Simulators and Simulations (TADSS).
- Tasks include scheduled and unscheduled maintenance, repair, supply support, transportation, hardware/software engineering support, site operations support, and operational support of training equipment.
- Operations and maintenance tasks will employ a mix of firm-fixed price, cost, cost-plus-fixed-fee, and time & materials contract line items for the base year with four option years.
- Contract will have the scope to support 160th SOAR(A) at locations other than Ft. Campbell, KY (if required).

ACQUISITION STRATEGY

Contract Opportunity

PdM FTS Topic: Opposing Forces Mechanized Vehicle Replacement (OMVR)

Opposing Forces Mechanized Vehicle Replacement (OMVR)
The OMVR will consist of a common Army tracked platform that uses modular, visual modifications (VISMODs) that will replicate visual, thermal, electromagnetic, and aural signatures. This capability will allow the Opposing Forces to replicate five of the six warfighting functions. This replication will train Army units to synchronize all ISR assets available to the BCT, present threat representative tracked/mechanized vehicles and formations to the RTU across the depth and breadth of the training area and provide the OPFOR for the Army with a sustainable system that is safe for Soldiers to operate and maintain.

PM CT2 is currently pursuing a task award under TReX II for the development, prototyping, and testing of VISMODS. In addition to developing and delivering VISMODS, CT2 will receive ODS-SAs and M2A3s to deliver alongside the VISMODS. The BFVs will be vetted through RRAD in order to reset the vehicles and prepare them for VISMOD installation at the CTCs.

ACQUISITION STRATEGY

- Prototyping of VISMODs
  - Utilization of TReX II OTA
- Production of VISMODs
  - Anticipate continued use of TReX II OTA

Contract Opportunity

PL TSMO Topic: Aerial Target Systems – 3 (ATS-3)

Purpose

- The Aerial Target Systems support Army readiness and multi-domain operations through development, acquisition, operation and modernization of aerial targets.
- Multi-spectral Aerial Targets include realistic surrogates and actual high performance threat aircraft.
- Current and emerging weapons systems require test, evaluation, and training using threat representative aerial targets to assess weapons systems effectiveness in the operational environment.
- Efforts to accomplish this mission include acquisition of aerial targets, aerial target subsystems, ground support equipment and spares, flight operations, training, and planning; and modification to existing aerial target systems to meet evolving requirements for research and development, test, and training support.

Digital Integration Lab (DIL)

Provides a secure and centralized location for all PEO STRI programs to integrate with Army Mission Command & Information Systems (MCIS). It also provides a critical risk reduction capability in preparation for formal Army Interoperability Certification (AIC) testing by supporting the Project Managers' (PMs') software development and integration initiatives across PEO STRI.

- Primary place of performance is Research Park area in Orlando, FL
- Requires qualified MCIS staff and must meet current cyber security requirements
- Simulation to C4I Interoperability (SIMCI)
- Provides experimentation, integration, testing, certification, demonstration and training for MCIS domain
- Auxiliary test site for the Central Technical Support Facility (CTSF) to conduct distributed AIC testing
- A Federated Net-Centric Site (FaNS)
- Government Furnished Property (hardware and software) and Government provided workspace and furniture
- Virtualization - Support efforts to virtualize the MCIS assets, to create efficient configuration/reconfiguration in support of each MCIS baseline.

One Semi-Automated Forces (OneSAF)

Constructive simulation that models platforms, systems, and U.S. Army doctrine at the Brigade and Below levels. It is used within JLCCTC and LVC-IA.

- Cloud-enabled software (accessible remotely anywhere / anytime)
- Government Off-the-Shelf software
- Uses official U.S. Army data for unit composition
- Physics-based, entity modeling with validated data
- Supports Live, Constructive & Virtual (LVC) Domain Interoperability
- Bi-directional stimulation/simulation of Mission Command (MC) systems
- Enhanced cyber effects on MC messages
- Dense Urban Operations
- Enhanced Chemical, Biological, Radiological, Nuclear (CBRN) modeling
- Runs on multiple hardware platforms (mobile/tablet/PC/Server/Virtual)

Reconfigurable Virtual Collective Trainer (RVCT)

The Reconfigurable Virtual Collective Trainer (RVCT) includes aviation (RVCT-A) and ground (RVCT-G) maneuver platforms, and dismounted Soldier sets that enable mission rehearsal, gunnery, and collective maneuver training. The RVCT represents a mobile, transportable, modular, and scalable training capability with the minimum hardware necessary to represent form, fit, and function to enable execution of collective tasks and essential training. This design allows RVCT modules to easily maintain concurrency at a cost significantly more affordable than the Army's legacy collective trainers while also delivering a more realistic virtual training environment that will enhance the Army's overall readiness. The RVCT architecture and design will support interoperability with the future Next Generation Constructive (NGC) and Live Training Environments, and other Synthetic Training Environments (STE) and operational capabilities.

Next Generation Constructive (NGC) Acceleration

The Army's Synthetic Training Environment (STE) Next Generation Constructive (NGC) is the future of constructive training for Division and Below Commanders and their staff. NGC will enable the Army to close command staff training gaps against near-peer threats within a Multi-Domain Operations (MDO) environment scaled through the Army Service Component Command (ASCC) level. This seamless delivery of NGC is built off the STE Software (SW) foundation to achieve Army training readiness needs.

GENERAL INFORMATION

✓DECODING THE 2024 NDAA: IMPLICATIONS FOR DEFENSE CONTRACTORS SMALL AND LARGE

- The National Defense Authorization Act (NDAA) for Fiscal Year 2024 (FY24), signed into law on 22 December 2023, signals significant changes across the defense acquisition and contracting landscape, and includes the following provisions promoting small businesses.
- Strengthening Subcontractor Payment Protocols (Section 862):
  - ➢ The amendment to the Small Business Act within the NDAA focuses on safeguarding subcontractors against delayed payments. Prime contractors are now required to report past due payments within 30 days, which is a significant reduction from the previous 90-day requirement. This amendment expands the oversight capabilities of Contracting Officers, enabling them to rectify unjustified payment delays effectively.

GENERAL INFORMATION

✓DECODING THE 2024 NDAA: IMPLICATIONS FOR DEFENSE CONTRACTORS SMALL AND LARGE

- Increasing Service-Disabled Veteran-Owned Small Business (SDVOSBs) Participation (Section 863):
  - ➢ Amends the Small Business Act by increasing Government participation for SDVOSBs to a minimum of 5% for each fiscal year; the previous minimum was 3%.
- SDVOSBs Certification (Section 864):
  - ➢ Extends the SDVOSB self-certification grace period by one-year to 22 December 2024. SDVOSB concerns can continue to use their self-certification for non-VA contracts until SBA certification is made and reflected in the SBA Veteran Small Business Certification (VetCert) database.
