SECURITY CLASSIFICATION GUIDE FOR DESIGN AND CONSTRUCTION OF OVERSEAS FACILITIES **BULLETIN**

Issued: July 31, 2020

Subject: Sensitive but Unclassified (SBU) Marking Clarification: 2018 Security Classification Guide for Design and Construction of Overseas Facilities (SCG-DCOF)

Scope: This bulletin provides updated interim clarification regarding the SBU marking requirement for site specific floorplans and serves as an addendum to the 2018 SCG-DCOF.

Applicability: This bulletin applies to all OBO projects that reference the 2018 SCG-DCOF.

Background: The 2003 SCG-DCOF designated an SBU marking requirement for site specific floor plans for office buildings, office suites, Chief of Mission Residences (CMRs), Deputy Chiefs of Mission Residences (DCMRs), and Marine Security Guards Quarters (MSGQs). This SBU marking requirement was inadvertently omitted in the 2018 SCG-DCOF.

Requirement: Site specific floor plans for office buildings, office suites, CMRs, DCMRs, and MSGQs are considered SBU and must be marked and controlled in accordance with SBU handling requirements.

Questions regarding this bulletin may be directed to SiteSecurityOperations@state.gov.
