Attachment D

STATEMENT OF WORK (SOW) TEMPLATE

1.0 Introduction/Background: This section should provide a brief overview of the proposed flight demonstration plan. The Offeror should describe their interest in the flight demonstration, why it should be pursued, and the technological/commercial impact.

2.0 Objectives: This section should provide a statement of the flight demonstration plan objectives, including objectives of any proposed risk reduction activities.

3.0 Description of the Work/Contractor Tasks: This section defines and explains the work to be performed. The work effort should be segregated into major tasks described in the bullets and numbered items in Section 4 of the NRA, including a detailed description of what is to be achieved as opposed to the manner by which the work is to be performed. This section should be organized around the required structure to separate the flight demonstration plan and risk reduction activities into separate CLINS with clearly defined supporting SLINs.

4.0 Deliverables: This section should contain information on what the contractor is to provide NASA and when it is required. Identify all technical deliverables, presentation documentation, market analysis and prospective efforts that are required to achieve the work or plans described in the NRA. Consider/identify meaningful measurable performance standards.

5.0 Intellectual Property: Identify intellectual property that will be limited rights and unlimited rights that will be publicly available at the conclusion of the work.
