Contract time for completion is 90 days, based on a minimum average production rate of 56 cubic yards (CY) per day for dredging, transportation, and placement at a NYSDEC approved disposal site. Should the total quantity of material exceed the estimated quantities within the Solicitation Contract Form, additional time will be allowed at the rate of one (1) calendar day for each 112 cubic yards in excess of the established limit. However, this shall not relieve the Contractor from the requirement to complete all in-water dredging work within the period noted above. The time state for completion shall include final clean-up. The contractor must bid on all items of the bid schedule.

Section 01 20 00, pp. 1 **-** Delete and replace dredging quantity

1. WORK COVERED BY CONTRACT PRICE: The work consists of furnishing all plant, labor, materials, and equipment, and performing all work in strict accordance with the specifications and drawings for the dredging of the Hudson River Federal Navigation Channel project at Troy, New York; with the transport and placement of material at a NYSDEC approved disposal site. Removal and placement consist of dredging a total of approximately ~~9,035~~ **4,960** cubic yards of material from the dredging area above the grade of fourteen (14) feet below MLLW, including a vertically applied one (1) foot of allowable over depth, as shown on the contract drawings. Ninety (90) calendar days have been allowed for completion of the contract.

Section 01 30 00, 1.9, pp. 6 - Replace section in its entirety
