RATIONALE FOR JUSTIFICATION TYPE SELECTED ABOVE TO INCLUDE RELEVANT INFORMATION GAINED THROUGH YOUR MARKET RESEARCH TO SUPPORT THE JUSTIFICATION TYPE:
The item listed above must conform to design, materials, and operational requirements. The listed item is the standard configuration currently installed and used with the PW1200/2 Reverse Osmosis High Pressure Unit on the 154' WPC Fast Response Cutters. Parker Hannifin Corp. DBA Village Marine Tech is the Original Equipment Manufacturer (OEM) of these items used on the reverse osmosis system. This contract is intended to enable the Coast Guard to keep these vessels at their original operating capability, current mission requirements and maintain configuration/logistics control. Any attempt to manufacture these items without the proper specifications, drawings, and technical data could cause equipment failure, flooding, and the inability for the cutter to make fresh water while underway. This would prevent the cutter from using the sanitation system, limit the ability to cook meals and sanitize eating utensils. This could greatly impact the cutter from meeting unit mission requirements. Any failure of substituted parts would jeopardize the safety of the vessel and crew. All reproduction manufacturing drawings, specifications, and other technical data pertaining to this item used on the PW 1200/2 Reverse Osmosis System was not purchased when these vessels were purchased by the Coast Guard and are not available for use by the Coast Guard now. The Coast Guard does not possess manufacturing data required to obtain full and open competition. Further, the scope of manufacturing, special tools and equipment required to manufacture this item is unknown. The Technical data that is needed is proprietary. Without the adequate data, the Coast Guard cannot evaluate equal or alternate parts manufactured by other than OEM. The use of OEM parts will ensure components and processes are sufficient to enable physical and functional interchangeability, as well as identifying source, size, configuration, and performance requirements. Vendors other than OEM shall provide documentation certifying parts provided meet Parker

Hannifin Corp. DBA Village Marine Tech standards and specifications as they pertain to the Coast Guard 154' WPC application.

CONTRACTING OFFICER - FAIR AND REASONABLE PRICE DETERMINATION METHODS:

☐	MARKET RESEARCH
☐	COMPARISON OF PROPOSED PRICE WITH PRICES FOUND REASONABLE ON PREVIOUS PURCHASES
☐	CURRENT PRICE LIST
☐	COMPARISON WITH SIMILAR ITEMS IN A RELATED INDUSTRY
☐	COMPARISON TO IGCE
☐	CONTRACTING OFFICER'S PERSONAL KNOWLEDGE (EXPLAIN)
☐	OTHER (EXPLAIN)
