Q&A

1. Regarding to Paragraph 2.1.7

'Provide testing and certification requirements such as the prototype testing for ISO certification, performance test of parallel compression, angular compression test, durability test, compression-recovery test, puncture-resistance test, material test of rubber, dimensional inspection, air-leakage test, hydrostatic-pressure test and confirmation of synthetic type- core, as noted in paragraph 5.'

Question: Can this requirement be satisfied by submission of the manufacture's ABS approval certification or individual certification testing is required for the actual Submarine fenders being supplied under this contract?

GOV'T ANSWER:

We are willing to accept ABS approval certification for:

- Prototype testing
- Durability test
- Angular/parallel compression tests
- Puncture-resistance

However, we will require individual unit-level testing (and ABS stamping) for:

- Dimensional inspection
- Air-leakage testing
- Hydrostatic-pressure testing
- Material batch reports for the specific rubber used

2. Regarding to Paragraph 2.1.1.1

'TWO (2) 3.3m X 10.6m Submarine Fender Systems including chains/shackle sets, and counterweights.

Q2: Please confirm whether there has any specific requirements regarding the manufacturing of the chains and shackles included in the submarine fender system?

GOV'T ANSWER: No; there are no specific requirements.
