27 June 2024

MEMORANDUM FOR RECORD

SUBJECT: Repair/Remanufacture Qualification Requirements for Commodity Critical Safety and Critical Application Items (RQR-848)

1. This memorandum is to document the establishment of Justification for Qualification Requirements (JQR) for a large number of 848th managed items. The JQR expires on 03 June 2031 and has been synopsized on sam.gov on 27 June 2024. The synopsis can be found here. This post contains the JQR-RQR-848 (Final-Redacted), RQR-848, and the JQR-RQR-848 Master Item List.

2. This memorandum serves as a placeholder within PRPS for the QR activity on the National Item Identification Number (NIIN) or Purchase Instrument Line Item (PILI) checklist for the applicable item. This memorandum takes the place of the Justification for Qualification Requirements/Qualification Requirements (JQR/QR) that is typically uploaded for a particular NIIN since the master documents are not tied to a single item (or group of items on a Purchase Request).
