CONSULTANTS

Date: November 14, 2025

From: Protection Engineering Consultants, LLC (PEC) – PSRDM subconsultant to GDM

To: Conrad Chandler, GDM-AE, Inc.; File

Subject: Compliance Letter – Project Design at Togus VA Medical Center

Background:

1. GDM is currently designing updates to the infrastructure at the Togus VA Medical Center.
2. PEC is participating as a subconsultant on that design team, specifically representing the following Subject Matter Specialists required by the VA Physical Security and Resiliency Design Manual (PSRDM):
    a. Certified Physical Security Specialist
    b. Structural Blast Specialist

Certification:

PEC certifies that, based on our review of the 100% design package, the design appears to be compliant with PSRDM requirements relevant to the above disciplines, to the extent that PEC's scope of work is included, for this project.

PEC did not identify components of the 100% design package that require deviation or equivalency based on PSRDM requirements.

This certification statement is based on design drawings as reviewed and is subject to change based on any future redesign efforts (if any), that are made after the 100% design is submitted.

Respectfully Submitted:

Brandon R. Kehl, CPP
Senior Security Consultant
