Questions and Answers

Below are questions related to the Space weather Observations at L1 to Advance Readiness Project (SOLAR) X-Ray Irradiance Sensor (XRIS) acquisition. In the event of any discrepancy, the Final Request for Proposal provisions and contract terms will take precedence.

Question 1:

Attachment B – SPEC, XRIS-200 in subsection 4.4 Instrument Data Availability:
Is the CREME96 modeling something that is required at the time of submission or is this something that will be required at the time of future design reviews? If needed at submission what is the scope of this requirement at the time of submission - every component or a general model?

Answer 1:
No, a detailed analysis is not required with the proposal. The offeror shall demonstrate that they understand the requirements and can accomplish the work to complete the analysis. Providing the approach to the analysis or a preliminary analysis are ways to demonstrate that understanding.
