MEDICAL LINEN AND LAUNDRY SERVICES – 88 MDG
QUESTIONS & ANSWERS (Q&A) – AMENDMENT 0001

Q1: Is this a brand-new requirement or is there an incumbent contractor currently performing these services? If there is an incumbent, what is the previous contract/award number and the name of the contractor?

- A1: This is a recurring follow-on requirement, not a brand-new contract. The previous contract number was FA860121D0014 and the incumbent contractor was Economy Linen & Towel Service Inc.

Q2: What was the pricing structure previously in place (e.g., cost per pound, per piece, flat monthly rate, etc.)?

- A2: The previous contract utilized a price-per-pound ($/LB) structure for standard bulk medical linen processing.

Q3: Regarding the scope of services: are you seeking strictly "wash and fold" laundry services, or does the requirement also include the provision/rental of linens and other inventory items (such as sheets, towels, gowns, etc.)?

- A3: This contract is strictly for the laundering service of Government-Owned Linen (GOL). It does not include any linen supply, lease, or rental. All inventory is owned and provided by the Government.

Q4: What are the estimated weekly or monthly pounds of linen to be processed?

- A4: The estimated annual quantity is 750,000 lbs. This averages out to approximately 62,500 lbs per month (approximately 14,423 lbs per week). Please note that these are estimates only; actual quantities may vary based on hospital inpatient/outpatient capacity.

Q5: What is the current system/method for laundry being used for the 88th Medical Group at Wright-Patterson Air Force Base?

- A5: The current system relies on an off-site, contractor-owned, contractor-operated (COCO) commercial facility. Soiled linens are picked up from Building 830, processed off-site at the contractor's accredited facility, and clean linens are delivered back to the base.

Q6: Is linen and dry cleaning kept separate?

- A6: Yes. Standard hospital linen is commercially laundered, not dry cleaned. Any specialized items requiring dry cleaning must be processed and packaged separately from standard linens in accordance with the PWS.
