3. Pre- proposal Inquiry Responses

PPI #	Page	Section	Paragraph	Question	Response
31				Will the Government provide an opportunity for pre-proposal exchange meetings with each Offeror?	This may be considered during Phase II.
32	Amendment 0001	Summary of Changes	Factor 2 - Experience	The significant revisions to the Factor 2's requirements have increased the industry competition and allows those who may not have been able to qualify with the previous requirements to now qualify and provide offers. While these revisions are appreciated and will be advantageous to both the Government and Offerors, the proposal due date of February 11, 2026, is not feasible for new, qualifying Offerors to assemble teams and provide quality proposals. We respectfully request extending the proposal due date by 6 additional weeks.	Please see Amendment 0002.
33	9			Does a newly formed JV need to be registered in SAM and the PIEE module in order to submit on phase one or does this just need to be in place to be considered for an actual award for phase 2?	The JV must be registered in SAM.gov and the PIEE module at time of Phase I proposal submission. The registration must remain active through award.
34	1			We would request a three week extension in order to firm up the most advantageous Design-Build team as possible.	Please see Amendment 0002.
