FA87126Q0976 – Questions & Answers No. 1
15 JUNE 2026

Question 1: Does the Government have the latest AV System drawings from the previous contractor?

Answer 1: No, there are no drawings to provide.

Question 2: Does the Government have existing un-compiled control code and touch panel layouts for this AV System?

Answer 2: No, there are no layouts to provide.

Question 3: Please define “Catch box plus”?

Answer 3: This was a microphone system that was suggested and quoted by a vendor that would be used in conjunction with the microphones, it is primarily used in Team building settings where instead of passing a mic it is a ball shaped mic that can be tossed. It is necessary, but would be useful.

Question 4: Does the existing Shure wireless microphone system include an antenna distribution system?

Answer 4: Yes, it does it has a microphone for every receiver.

Question 5: Is there an existing Crestron control processor? If so, please provide the model number. If not, is the contractor expected to quote one?

Answer 5: Yes; Model No: TSW-1600-TTK-B-S (there are currently 2 of them one on podium, one in booth)

Question 6: Can you provide pictures of the rack?

Answer 6: The Government cannot provide pictures – they could’ve been obtained at the Site Visit conducted.

Question 7: The LOM shows 4 wireless mics but says adding an additional mic in the notes. Are you wanting 2 bodypacks and 2 handhelds as before?

Answer 7: Yes, The Government will need 2 bodypacks and 2 handhelds.

Question 8: Please state whether you want the additional microphone to be handheld or bodypack.

Answer 8: In regards to the extra microphone we currently have 4 Shure wireless microphones 2 currently are handheld 2 are body pack, we would like to keep the same configuration, the extra microphone would be the CatchBox which is neither handheld or body pack, it would be used in conjunction with the current system as an alternative to passing a handheld mic in audience question or comments scenario.

Question 9: Do the microphones need to have rechargeable batteries?

Answer 9: Rechargeable batteries are not a requirement.

NOTE: Offerors may propose several multiple separately priced solutions if they wish.
