Construction and Demolition (C&D) Monthly Diversion Report

C&D DIVERSION - The Contractor will use a permitted off-post landfill. Executive Order 13693, Planning for Federal Sustainability in the Next Decade, requires all federal facilities to divert a minimum of 60% of construction and demolition (C&D) materials and debris from landfills. If the contractor has a valid reason for not being able to meet this diversion goal, the contractor needs to present their reasoning in writing to DPW-Environmental Division.

Contract specifications will include submission of a contractor's monthly C&D Diversion Report of all materials resold, recycled, reused, or landfilled will be reported by the 10th of each month (Attachment A) to the Environmental Division, Solid Waste Program Manager, cynthia.m.hernandez38.civ@army.mil with a copy to the Contract Officer Representative (COR).

Items that can be used to increase diversion rates include salvaged items (may be reused as part of the contract by others), scrap metal, masonry products, gravel, asphalt, concrete, rock, topsoil (earth fill is specifically excluded). See attached list of local recyclers (Attachment B).

Suitable materials that meet standards for recycle/reuse may go directly to a recycling facility. All suitable concrete/asphaltic materials may be crushed, recycled, or stockpiled at a designated site on Fort Bliss on a temporary basis. All recycled/reused concrete/asphalt materials must be removed from Fort Bliss by the end of the project schedule. Use of the material processed for engineering fill, aggregate, or re- constituted concrete or asphaltic pavement constitutes recycling.

Upon diversion of the recycled/reused materials, the Contractor shall submit proof of recycling/diversion in the monthly C&D Waste Management Reports detailing weight of diverted material and weights of debris landfilled.

The COR will review the plan in coordination with the Directorate of Public Works- Environmental Division.

C&D Monthly Diversion Report Instructions

Construction and Demolition (C&D) means material generated from construction, renovation, repair or demolition of structures such as buildings, bridges, pavements, towers, dams, pipelines, etc. which are commingled or sources separated for recycling. As of FY2025, the C&D diversion goal is 60 percent. Use engineering estimates for tonnages generated from project start to completion.

1. The C&D monthly diversion report is required as part of the project, a contractor submittal requirement. The C&D monthly diversion report form contains the following required reporting elements:

   - The *Proposed Start and Completion Dates* will assist in determining when C&D monthly diversion reports are due.
   - The *Contract Number* is the number that identifies the contract vehicle used for the project.
   - The *Project Number* identifies the project.
   - The *Government Project Manager (PM)* represents the government in the design, acquisition and construction processes and/or the *Contracting Officer Representative (COR)* is the government employee empowered by the Contracting Officer to manage the execution of the project. The PM or COR are required to submit the C&D monthly diversion report to the DPW-ED solid waste manager.
   - The *Contractor* is the prime contractor for the C&D project. The Contractor field should reflect the name of the company engaged by the government (prime) to complete the project and thus will generate the waste. If a sub-contractor will ultimately execute generation of the waste, that information should also be submitted in this field.
   - The *Task Order* is the four-digit number which identifies a task order(s) against a given contract vehicle. Multiple task orders can be assigned to a project.
   - The *Facility Name/Site Location* field includes the name of the facility, the assigned facility number and the street address. The name of the facility that the C&D material was transported to, add additional destinations if required.

2. C&D monthly diversion report must be submitted using this form. After completing all applicable reporting blocks, email the report to Cynthia.m.hernandez38.civ@army.mil.
