4a. Name of Requirement
Dust Collector Install

b. Description of Requirement
Design, supply and install the ventilation ducting from Dust Collector to Sanding Booth. Company will supervise the installation of Furnished Air Shower.

c. Demonstrate, in Detail, Why This Specific Item or Service, is the Only One That Meets Your Requirements
The Dust Collector, Sanding Booth and Furnished Air Shower were purchased from this vendor. Sole Sourcing this project to the original equipment manufacturer ensures seamless integration, single-point accountability, and exact technical capability across the ventilation, dust collection, and air shower systems.

5a. HAS THIS BEEN PREVIOUSLY PROCURED?
Yes, details are below. ✓ No.

6a. AUTHORITY CITED
41 U.S.C. 1901 as implemented in FAR 13.106-1(b)(1) Soliciting from a single source.

b. Reason for Authority Cited
VES is the Original Equipment Manufacturer (OEM) / authorized distributor of the GFE Dust Collector and Air Shower. Utilizing a third-party contractor to design the ducting, perform the roof/wall penetrations, and install the GFE will void the existing manufacturer warranties on the equipment. Furthermore, VES holds proprietary technical data regarding the operational tolerances of the GFE, which is required to engineer the custom ventilation ducting.

7. POSTING REQUIREMENTS
None.

8. CONTRACTING REQUIREMENTS

a. Efforts to Obtain Competition
Market research was conducted by the Government technical representatives and the Contracting Office utilizing SBA Dynamic Small Business Search (DSBS), SAM.gov, and internet searches. While other vendors exist in the general HVAC and industrial equipment installation market, the market research determined that Veteran Equipment Sales LLC (VES) is the only source reasonably available capable of executing this specific turn-key requirement without causing voided warranties and duplication of cost. Because of these unique constraints, the Government cannot solicit competing offers.

b. Actions to Increase Competition
Research will continue to be conducted for any future actions to determine if additional suppliers become available that offer items meeting all of the requirements similar to those identified for this contracting action.

c. Market Research
Keyword searches were conducted on SAM.gov and the SBA Dynamic Small Business Search (DSBS) utilizing NAICS code 561990 and keywords such as "Dust Collector," "Air Shower," and "Industrial Ventilation." General web searches were conducted for commercial industrial ventilation fabricators and installers. Consultation with the requiring activity's engineers regarding the specific integration requirements of the Government-Furnished Equipment (GFE) was conducted for technical evaluation. Based on the market research, it was determined that the required ventilation ducting and installation services are customarily sold to the general public and meet the definition of a commercial product and commercial service under FAR 2.101. The SAM.gov, DSBS, and internet searches identified several small and large businesses capable of general HVAC, ductwork fabrication, and equipment installation. However, the market research revealed that general industrial contractors cannot fulfill this specific requirement.

d. Interested Sources

To date, no other sources have written to express an interest. the notices required by FAR 5.201 shall be published, and any bids or proposals received shall be considered.

e. Other Facts

This is a new, first-time requirement for the 106th Rescue Wing. According to the requiring activity and a review of local contracting records, there is no procurement history for the design, supply, and installation of ventilation ducting connecting to a Government-Furnished Dust Collector and Air Shower at this facility.
