Industry Exchange Meeting

March 12 2024

CLEARED FOR PUBLIC RELEASE

Topic: Electronic Warfare Ground Instrumented Range (EWGIR)

Description: The Marine Corps has identified a capability gap in relation to EW Training. The only opportunities for Marines to train in an EW contested environment is during very large scale exercises held annually on the west coast which is cost prohibitive and logistically unrealistic. The Marine Corps requires EWGIR capabilities at home stations allowing all Marines to train in a "denied, degraded, disrupted and deception (D4)" spectrum environment.

Questions for Industry:

1. Are commercial off-the-shelf (COTS) Government off-the-shelf (GOTS) solutions available?

2. Are solutions available that may overcome spectrum management requirements that are unique in some locations?

3. Are vendors available to provide this capability as a service at specific locations?

Topic: Marine Air Command and Control System (MACCS) Simulation

Description: The MACCS requires efficient, effective, and realistic simulation to train its Mission Essential Tasks and maintain crew proficiency while meeting Training and Readiness (T&) requirements.

Questions for Industry:

1. What simulations provide terminal operator training? Replicate CAC2S?

2. What solutions exist for a single-player training systems that uses 3D models to create a virtual MACCS environment and simulates tactical displays used for trainee interactions.

3. Are there entities that can provide a centralized cadre of simulation professionals who are tactical subject matter experts and well-versed in simulation operations?

Topic: Joint Contract Vehicles for Training Support

Description: PM-TRASYS is looking to expand its awareness of contract vehicles and other consortiums that connect industry to the DoD.

Questions or Industry:

1. Are industry/Joint partners aware of Knowledge-Based Service contracts or other consortiums that may be a blind-spot for the USMC but could benefit Marine Corps market research for training?

2. Are industry/Joint partners aware of Contracted Logistics Support contracts or other consortiums that may be a blind-spot for the USMC but could benefit Marine Corps market research for training?

3. Is there any other particular office or contract vehicle that industry or Joint partners think the USMC training stakeholders should be aware of?

Questions?
