W50S84-26-Q-0006 – Salient Characteristics

4-wheel drive front mower with foldable rollover protection (ROPS). This will be used for all seasons to cut grass and remove snow. A cab is needed to protect the operator from the elements along with 4-wheel drive for proper lawn and snow removal activities.

- 4-wheel drive, front-mount mower OR articulating utility machine
- Diesel powered
- Mower deck minimum 72” width
- Suspension seat
- Factory or aftermarket, all-weather ROPS-certified cab enclosure (hard or rigid hybrid) with seal kit
- Cab heating
- Roof mounted LED strobe light
- Rear LED work light
- Quick-attach implement system for toolless, or single-person implement swapping
- Two Stage Snow blower minimum 48” width (or wide enough to clear the machine’s tire track, whichever is greater)
- Rotary Broom attachment minimum 60” width
- Remote hydraulic
- Electric chute deflector
