Attn: Ms. Maria Lewis:

Re: Well Operating Permit Nos. 0215-003P thru 0215-004P for the continued operation of production well facilities, NCS-6 along Rte. 3, NCS Road, Dededo, and NCS-8 located at Radio Barrigada, Guam.

- You are hereby notified that the Guam Environmental Protection Agency has approved your renewal application to operate the above referenced well facilities with the following understanding/conditions:

- A well facility is defined herein to include all appurtenances within the security fence, ground maintenance up to five feet away from the outside of the perimeter fence and all electrical control panels/transfer switches that are located outside the fence.

- The wells are to be operated at the permit approved pumping rate.

- The permittee/owner shall operate the well facilities in strict compliance with the requirements of the Water Resource Development and Operating Regulations (WRDOR). Whenever a condition stated herein conflicts with any provision of the WRDOR, the condition herein shall govern.

- The permittee/owner shall submit, no later than January 15, of each year.
    a. File with the administrator an Annual Well Operating Report for each well facility which shall include:
        i. Total volume of water pumped, by month, for the preceding year;
        ii. A description of details of any alteration, rehabilitation or extension made to the wells facility or wells appurtenances during the preceding year;
        iii. An itemization, including dates, of all maintenance performed during the preceding year including repairs or replacement of well equipment

(pump, motor, chlorinator, meter, etc.), chemical treatment of well screen, resetting the pump, etc.

b. Pay the current annual operating fee of the wells based on the pumping rate.

c. The permittee/owner shall renew the quinquennial operating permit and submit fee when due.

- The permittee/owner shall submit the total monthly volume of water pumped from each well facility no later than the tenth (10th.) day of the following month.
- The permittee/owner shall submit a quarterly report on the laboratory analysis results of the water quality monitoring requirements.
- The administrator may revoke or suspend the Well Operating Permit for a well facility which:

  a. Contaminated water until the causes of contamination are removed; or

  b. Has a suspected contamination; or

  c. Is located downgradient of a suspected contamination; or

  d. Is not being operated/maintained in compliance with the provisions of the WRDOR or the conditions stated herein.

This approval constitutes an agreement and acknowledgement that the holder (permittee/owner) of these Well Facility Operating Permit shall comply with all applicable the rules and regulations of the Guam Environmental Protection Agency as well as the condition stated herein.

If you have any questions concerning this permit, please contact Mr. Angel B. Marquez, Acting Chief Engineer @ 300-4796 or Mr. Elvis F. Ventura, Water Division Water Resources Management Program at 300-4779.

Re: Well Operating Permit Renewal No. 021218-165P for the continued operation of production well facility No. NCS-2, located along Route 3, Across Navy South Finegayan, Dededo, Guam.

Hafa Adai Mr. Moon:

- You are hereby notified that the Guam Environmental Protection Agency has approved your renewal application to operate the above referenced well facilities with the following understanding/conditions:

- A well facility is defined herein to include all appurtenances within the security fence, ground maintenance up to five feet away from the outside of the perimeter fence and all electrical control panels/transfer switches that are located outside the fence.

- The wells are to be operated at the permit approved pumping rate.

- The permittee/owner shall operate the well facilities in strict compliance with the requirements of the Water Resource Development and Operating Regulations (WRDOR). Whenever a condition stated herein conflicts with any provision of the WRDOR, the condition herein shall govern.

- The permittee/owner shall submit, no later than January 15, of each year.
    a. File with the administrator an Annual Well Operating Report for each well facility which shall include:

i. Total volume of water pumped, by month, for the preceding year;

ii. A description of details of any alteration, rehabilitation or extension made to the well facility or well appurtenances during the preceding year;

iii. An itemization, including dates, of all maintenance performed during the preceding year including repairs or replacement of well equipment (pump, motor, chlorinator, meter, etc.), chemical treatment of well screen, resetting the pump, etc.

b. Pay the current annual operating fee of the well based on the pumping rate.

c. The permittee/owner shall renew the quinquennial operating permit and submit fee when due.

- The permittee/owner shall submit the total monthly volume of water pumped from each well facility no later than the tenth (10th.) day of the following month.
- The permittee/owner shall submit a quarterly report on the laboratory analysis results of the water quality monitoring requirements.
- The administrator may revoke or suspend the Well Operating Permit for a well facility which:

  a. Contaminated water until the causes of contamination are removed; or

  b. Has a suspected contamination; or

  c. Is located downgradient of a suspected contamination; or

  d. Is not being operated/maintained in compliance with the provisions of the WRDOR or the conditions stated herein.

This approval constitutes an agreement and acknowledgement that the holder (permittee/owner) of these Well Facility Operating Permit shall comply with all applicable the rules and regulations of the Guam Environmental Protection Agency as well as the condition stated herein.

If you have any questions concerning this permit, please contact Mr. Rustico "Ogie" Joya, Water Division, Water Resources Management Program, at 300-4780.

Hafa Adai: Mr. E. E. Moon
(Installation Environmental Program Director)

Re: Well Operating Permit Renewal No. 042117-071R thru 042117-073 for the continued operation of production well Nos. NCS-B1, NCS-11 & NCS-12 located at Naval Computer & Telecommunications Area Master Station (NCTAMS), Dededo, Guam.

- You are hereby notified that the Guam Environmental Protection Agency has approved your renewal application to operate the above referenced well facilities with the following understanding/conditions:

- A well facility is defined herein to include all appurtenances within the security fence, ground maintenance up to five feet away from the outside of the perimeter fence and all electrical control panels/transfer switches that are located outside the fence.

- The wells are to be operated at the permit approved pumping rate.

- The permittee/owner shall operate the well facilities in strict compliance with the requirements of the Water Resource Development and Operating Regulations (WRDOR). Whenever a condition stated herein conflicts with any provision of the WRDOR, the condition herein shall govern.

- The permittee/owner shall submit, no later than January 15, of each year.
    a. File with the administrator an Annual Well Operating Report for each well facility which shall include:
        i. Total volume of water pumped, by month, for the preceding year;
        ii. A description of details of any alteration, rehabilitation or extension made to the well facility or well appurtenances during the preceding year;

iii. An itemization, including dates, of all maintenance performed during the preceding year including repairs or replacement of well equipment (pump, motor, chlorinator, meter, etc.), chemical treatment of well screen, resetting the pump, etc.

b. Pay the current annual operating fee of the well based on the pumping rate.

c. The permittee/owner shall renew the quinquennial operating permit and submit fee when due.

- The permittee/owner shall submit the total monthly volume of water pumped from each well facility no later than the tenth (10th.) day of the following month.
- The permittee/owner shall submit a quarterly report on the laboratory analysis results of the water quality monitoring requirements.
- The administrator may revoke or suspend the Well Operating Permit for a well facility which:

  a. Contaminated water until the causes of contamination are removed; or

  b. Has a suspected contamination; or

  c. Is located downgradient of a suspected contamination; or

  d. Is not being operated/maintained in compliance with the provisions of the WRDOR or the conditions stated herein.

This approval constitutes an agreement and acknowledgement that the holder (permittee/owner) of these Well Facility Operating Permit shall comply with all applicable the rules and regulations of the Guam Environmental Protection Agency as well as the condition stated herein.

If you have any questions concerning this permit, please contact Mr. Rustico Joya, Water Division, Water Resources Management Program, at 300-4780.

Si Yu' us ma'ase,

JOHNNY C. ABEDANIA
Acting Chief Engineer

Attachment: Certificate of Well Operating Permit

Guam Environmental Protection Agency

Well Operating Permit

This certifies that

U.S. Navy/DZSP 21, Guam

Is authorized to operate production well

NCS-B1

located at

Naval Computer & Telecommunications Area Master Station (NCTAMS), Dededo, Guam

This permit certifies that the production well described above has met the provisions required by the Water Resources Development and Operating Regulations (WRDOR). The permitee/owner is hereby granted permission to operate the production well for a period of five (5) years in strict compliance with the WRDOR and the conditions outlined in the accompanying letter attached hereto and incorporated herein.
