Question #	RFP Section	Requirement/Statement/Topic	Question	Issue/Rationale for Question/Proposed Solution	Answer
108	RFP, page 103, section L, section (9) Basis of Estimate (BOE)		1. RFP, page 103, section L, section (9) Basis of Estimate (BOE) states: "The BOEs are to be submitted for each individual RTO at the lowest WBS level only (WBS level 3)." However, Attachment A Statement of Work section 3 Program Management, section 4 Integrated Range Services Management, and section 6 Telemetry Options Services, has information that requires a response that are not covered in the respective WBS level 3. In order to meet RFP, page 102, section L (5), Prime Offeror RTO Elements of Cost Summary by WBS pricing instructions, we would like to add WBS 3.12 label for Program Management and Administration (including Quality and Risk Management), WBS 4.2 label for Range Scheduling Services, and WBS 6.2 label for Fixed Telemetry Operations to cover the requirements listed in SOW section 3, 4, and 6.		The Government will amend the statement to read, "The BOEs are to be submitted for each individual RTO at the lowest WBS level only (not lower than WBS level 3)"
109	L.14(c)A.6; Attachment P; H.12	Innovative Methods, Techniques or Technologies; Contractor Proposed Enhancements; Contractor Proposed Enhancements	In Section L, the Government instructs offerors to include any proposed enhancements in Attachment P. Section H defines Proposed Enhancements as "over and above the requirements required by the contract." In addition, Section L.A.6 instructs offerors to describe any new or innovative methods or efficiencies. Will the Government provide additional information on how they differentiate between a "proposed enhancement" and "innovative methods" and "efficiencies"?		The Government will eliminate subfactor A.6 in Mission Suitability
110	Enclosure 5	RTO 3	Enclosure states that the Period of Performance (POP) is one year. What are specific start/end dates for RTO 3 POP?		The Government will amend RTO3's period of performance to April 15, 2019 through April 14, 2021
111	Enclosure 5	RTO 3	For RTO #3, the Government provides a plug number for travel and materials/ODCs. Will the Government also provide travel and materials/ODCs plug numbers for RTO #1 and RTO #2?		The Government will not provide travel and materials/ODC assumptions for RTO1 and RTO2. The Offeror shall propose travel and materials/ODCs (if any)

Question #	RFP Section	Requirement/Statement/Topic	Question	Issue/Rationale for Question/Proposed Solution	Answer
112	Enclosure 3 RTO 1	**Poker Flat Research Range Sounding Rocket** Campaign The WFF Range is required to provide the full spectrum of range support, including pre-launch maintenance and sustainment, launch operations, and post-launch data processing and deliverables in the following areas: • Radar services and operations (including tracking and surveillance) • Telemetry services and operations • Communications, timing, and command services and operations • Surveillance services and operations • Data handling services and operations (processing and displays) • Optical services and operations (photo and video) **Antares Mission** On-range at WFF, the full spectrum of range support will be required, including pre-launch maintenance and sustainment, launch operations, and post-launch data processing and deliverables in the following areas: • Radar services and operations (including tracking and surveillance) • Telemetry services and operations • Command uplink services and operations • Communications and timing services and operations • Meteorological services and operations • Surveillance services and operations • Data handling services and operations (processing and displays) • Optical services and operations (photo and video) • Ground Operations including commodity services **Task Requirements** The Contractor shall provide a detailed maintenance, sustainment, and	It is requested that the Government provide further direction on the requirements for specific deliverables for RTO1	As currently written in RTO 1 the: "WFF Range is required to provide the full spectrum of range support"(PFRR) and "On range at WFF the full spectrum of range support will be required" (Antares) statements do not require offerors to propose and provide a Basis of Estimate (BOE) for "the full spectrum of support" in response to RTO 1. In the absence of "the contractor shall" statements offerors may choose to limit their proposed approach, resultant costs and BOE to meet only the "shall" statements called out in the RTO 1 "Task Requirements" to provide a Schedule, a Maintenance, Sustainment, Staffing and Operations Plan and a Risk Assessment. In contrast RTO3 contains a "shall" statement that lists the very specific range services to be provided. It is considered that a level of uncertainty exists in this offeror's understanding of what the Government requires in response to RTO 1. Furthermore, if offerors choose to limit their proposed response to the provision of the Schedule, a Maintenance, Sustainment, Staffing and Operations Plan and a Risk Assessment response rather than execution of the RTO1 missions and the provision of the "full spectrum of support" it is considered that the Government will have insufficient information required to assess an offeror's "understanding and technical approach for each task plan including all areas and information as specified in Provision L.14(c), Subfactor A, Section A.7, for completeness, reasonableness, effectiveness, and efficiency."	The Government will add the following language to RTO1 after paragraph 8, "The Contractor shall support the tasks above consistent with the requirements in the Statement of Work"

		operations schedule that demonstrates the ability to prepare for and meet both the Campaign mission and Antares mission requirements. The Contractor shall provide a detailed maintenance, sustainment, staffing, and operations plan that describes how they will ensure that all range support is configured, tested, and ready for both the Campaign mission and Antares mission. The Contractor shall provide a risk assessment plan that identifies contractor-perceived risks related to the plans developed to support these two missions and the approaches that will be used to mitigate these risks. Risk and mitigation assessments should include technical, schedule, personnel/staffing, logistical, and other factors that the Contractor sees as relevant given the scenario provided.			
113	Enclosure 5 RTO 3	The Period of Performance of this Task is one year with this single year's support requirements defined in this RTO.	It is requested that the Government provide further clarification on Period of Performance of the Task and dates called out for the UAS and Navy Target Missions.	There appears to be a conflict between "The Period Of Performance of this Task is one year" and the dates called out for the UAS Mission and the Navy Target Operations Mission. The UAS Mission period spans July 15, 2019 - June 15, 2020 and the Navy Target Operations January 25, 2020 - September 25, 2020. The period covered by the combined missions is July 15 2109 - September 25, 2020 which exceeds the "Period of Performance of one year".	The Government will amend RTO3's period of performance to April 15, 2019 through April 14, 2021

Question #	RFP Section	Requirement/Statement/Topic	Question	Issue/Rationale for Question/Proposed Solution	Answer
114	RFP Section L, page 100, (6), Cost Volume (b) Cost Exhibits, Proposal Format	Exhibit 2A – RTO Direct Labor Hours, Direct Labor Rates and Direct Labor Costs Detail	Can the government clarify which level of detail that Exhibit 2A requires? For Exhibit 2A, is the Government expecting total hours of WBS 3.0 (note: Sum of WBS 3.1 through WBS 3.11 equal to WBS 3.0 hours) in one worksheet pricing table or total hours for WBS 3.1 in one worksheet table and total hours for WBS 3.2 in a separate pricing table?		The Government expects a separate worksheet for each requirement specified in the following RFP statement, "Exhibit 2A shows the Direct Labor Hours, Direct Labor Hourly Rates, and Direct Labor Costs for each RTO by individual direct labor category, onsite and offsite, by month and by CY at WBS Level 3 and then summarizing for each higher WBS Level up to WBS Level 1 (overall RTO) based on Attachment C direct labor categories and direct labor rates. A separately identified and labeled Exhibit 2A shall be submitted for each individual RTO, by month, by CY, and WBS Level, from the Prime Offeror and each individual Significant Subcontractor."
115	Solicitation NNG176113 58R Section I	Provision for Price Adjustment Wage Determined Labor.	FAR Clause 52.222-43 Fair Labor Standards Act and Service Contract Act-Price Adjustment Multi Year and Option Contracts) is not included in the solicitation. Is it the Government's intention that the proposed price for Direct Labor rates to be included in Attachment C for labor categories subject to the Service Contract Act include an offeror allowance for any contingency (escalation) to cover increased costs which would result from reissuance of future wage determinations and/or negotiations of union agreements?	Include FAR Clause 52.222-43 as a provision to the RFP.	The Offeror shall propose Direct Labor rates in Attachment C as "not-to-exceed" rates for pricing task orders. Since these are "not-to-exceed" rates and not actual rates, the escalation of direct labor should be priced into these rates. The Government will not include clause 52.222-43 in this Contract since the majority of the work will be covered with Cost Reimbursement task orders.
