Annual inspection Commercial Weighing and Measuring Devices

Calibration & Test Procedures

The procedure in which a licensed scale technician uses a known cal test weight certified by the State of California, County of Weights and Measures, to test and adjust the response of a mechanical or electronic weighing system to the following tests; The display indicator must show zero when there is no weight on scale. When a known weight is applied the indicator must display the exact amount of applied weight within a specific tolerance. When weight is applied or removed incrementally the scale must display the weight equal to that on the scale within the specified tolerance.

The scale deck should be free of foreign materials and checked for obstructions. Check under and around the platform for foreign materials. Remove any items that will adversely effect weighing accuracy. Pit type scales should be checked for clearance around the pit walls and foreign materials removed if necessary. Mechanical scales should be checked for freedom of movement in all directions.

The listed commercial weighing and measuring devices require inspection, calibration and county seal each year.

DDJC's truck scales located at:

Sharpe site, Building 220, (700 E. Roth Rd, French Camp, CA 95231)

Tracy site, Building 31, (25600 S. Chrisman Rd, Tracy, CA 95304)

Attachment: Copy of the Notice for Registration of Commercial Weighing and Measuring Devices, mailed out December each year by San Joaquin County, Division of Weights and Measures.

November 19, 2010

To: All San Joaquin County Owners of Commercial Weighing and Measuring Devices

Enclosed is your device registration notice for 2011. The device registration fees remain unchanged for 2011. The fee is $100.00 per business location plus a per device fee. A table showing the device registration fees is printed on the reverse side of your invoice. Please verify that the device category, the quantity, and your name and address are correct on your billing. Make any necessary changes on your billing and return the white copy with your check payable to Sealer of Weights and Measures in the enclosed envelope.

Device registration fees are established by law to cover the costs of inspecting and testing commercial weighing and measuring devices. A strong inspection program benefits business by assuring a level playing field for competition and preventing competitors from gaining an unfair advantage in the marketplace. It also benefits consumers by assuring them full value for their purchases and protection from fraud.

If you have any questions or wish further information, please contact our office at (209) 953-6050.

Sincerely,

Tony Lavieri
