Evaluation Factor : Past Performance

Past Performance is the most important evaluation factor for this requirement.

Instructions to Offerors:
Offerors must provide two (2) to three (3) examples of prior government work demonstrating relevant experience within the last 3 years. To be considered relevant, the submitted past performance examples must specifically involve the removal of batteries from an Uninterruptible Power Supply (UPS) system.

Failure to provide the required past performance examples and associated details will render the proposal non-compliant, resulting in the offeror's bid being removed from the evaluation process.

Please ensure each past performance example includes the following details:

Information Required	**Description**
Contract Details	Contract name and contract number.
Supported Agency	The specific government agency or customer supported.
Scope of Work	A brief description explicitly detailing the UPS battery removal effort and your role in the execution.
Period of Performance	Start and end dates of the work performed.
Point of Contact	Name, email, and phone number of a government representative who can verify the quality of performance.
