CONTRACT CLAUSES

5352.201-9101 **OMBUDSMAN** (JUN 2023)
(IAW DAFFARS 5301.9103)

DLA OMBUDSMAN (APR 2010)

(a) An ombudsman has been appointed to hear and facilitate the resolution of concerns from offerors, potential offerors, and others for this acquisition. When requested, the ombudsman will maintain strict confidentiality as to the source of the concern. The existence of the ombudsman does not affect the authority of the program manager, contracting officer, or source selection official. Further, the ombudsman does not participate in the evaluation of proposals, the source selection process, or the adjudication of protests or formal contract disputes. The ombudsman may refer the party to another official who can resolve the concern.

(b) Before consulting with an ombudsman, interested parties must first address their concerns, issues, disagreements, and/or recommendations to the contracting officer for resolution. Consulting an ombudsman does not alter or postpone the timelines for any other processes (e.g., agency level bid protests, GAO bid protests, requests for debriefings, employee-employer actions, contests of OMB Circular A-76 competition performance decisions).

(c) The Competition Advocate (CA) at each contracting activity/office (as defined in DLAD 2.101) shall act as the ombudsman and attempt to resolve contractor complaints. DLA Aviation's-AOCA/Ombudsman can be reached at (405) 855-3552. Complaints which cannot be so resolved shall be forwarded to the HQ through J-72 for resolution by the DLA competition advocate. Each activity is responsible for developing procedures for executing the duties and responsibilities of its local ombudsman.

(d) The ombudsman has no authority to render a decision that binds the agency.

(e) Do not contact the ombudsman to request copies of the solicitation, verify offer due date, or clarify technical requirements. Such inquiries shall be directed to the Contracting Officer.

PART IV - REPRESENTATIONS AND INSTRUCTIONS
SECTION M
EVALUATION FACTORS FOR AWARD

USING
LOWEST PRICE TECHNICALLY ACCEPTABLE PROCEDURES

a. Basis for Contract Award
This acquisition will utilize Lowest Price Technically Acceptable (LPTA) source selection procedures in accordance with Federal Acquisition Regulation (FAR) Part 15.101-2, as supplemented. Technical tradeoffs will not be made and no additional credit will be given for exceeding acceptability. Award will be made to the acceptable offeror with the lowest evaluated cost or price, which is deemed responsible in accordance with the Federal Acquisition Regulation and whose proposal confirms to the solicitation requirements. The solicitation requirements include all stated terms, conditions, representations, certifications, and all other information required by Section L of this solicitation. The Government intends to award without discussions, excepting clarifications pursuant to FAR 15.306(a); therefore, the offeror's initial proposal should contain the offeror's best terms from a price and technical standpoint. The Government, however, reserves the right to conduct discussions if the Contracting Officer determines that discussions are necessary.

b. Number of Contracts to be Awarded
The Government intends to select one contractor for the program. However, the Government reserves the right to award no contract at all, depending on the quality of the proposals and prices submitted and the availability of funds.

c. Rejection of Unrealistic Offers

The Government may reject any proposal that is evaluated to be unrealistic in terms of program commitments, including contract terms and conditions, or unrealistically high or low in cost/price when compared to Government estimates, such that the proposal is deemed to reflect an inherent lack of competence or failure to comprehend the complexity and risks of the program.

d. Correction Potential of Proposals
The Government will consider, throughout the evaluation, the "correction potential" of any deficiency or proposal inadequacy. The judgment of such "correction potential" is within the sole discretion of the Government. If an aspect of an offeror's proposal not meeting the Government's requirements is not considered correctable, the offeror may be eliminated from the competitive range.

PRE-AWARD SURVEY
The Government may conduct a pre-award survey (PAS) as part of this source selection. Results of the PAS (if conducted) will be evaluated to determine each offeror's capability to meet the requirements of the solicitation.

PLANT VISITS
In the event discussions are necessary, plant visits may be conducted during the evaluation phase to develop knowledge for judging the potential for correction of the deficiencies.

SOLICITATION REQUIREMENTS, TERMS AND CONDITIONS
Offerors are required to meet all solicitation requirements; such as terms and conditions, representations and certifications, and technical requirements, in addition to those identified as factors, subfactors to be eligible for award. Any aspect of the proposal judged to be unacceptable would render the entire proposal unacceptable. Failure to comply with the terms and conditions of the solicitation may result in the offeror being removed from consideration for award. Any exceptions to the solicitation's terms and conditions must be fully explained and justified.

EVALUATION CRITERIA FOR AWARD (IAW FAR 13.106-2(b), 14.201-5(c), and 15.204-5(c))
For the purposes of award, offers will be evaluated for acceptability of evaluation factors described below:

FACTOR 1: Cost/Price
FACTOR 2: Technical

a. Order of Importance
Factor 1 (Cost/Price) and Factor 2 (Technical) are of equal importance.

b. Evaluation Methodology
Price will be evaluated first and the proposals will be listed from lowest to highest price. After price is evaluated the technical acceptability evaluation will begin; starting with the lowest evaluated priced offeror. The first proposal evaluated as technically acceptable will be considered the best value proposal and other technical evaluations will cease. Only those offerors determined to be technically acceptable will be considered for award. The technical factor rating depicts acceptable or unacceptable.

c. Cost/Price Factor (IAW 5315.305(a)(1))
(1) The offeror's total evaluated cost/price will be determined by multiplying the proposed unit price by the Best Estimated Quantity (BEQ) of each contract line item (CLIN) if applicable, then adding all CLINs together; however, the actual quantity awarded may differ based on the Government required quantity at award. At that point, the quantity type will be changed from BEQ to Fixed Quantity. In accordance with solicitation clause Evaluation Cost Factor for First Article (Oct 1988, IAW FAR 9.306(i)), for any new manufactured offeror in which submission of First Articles is required, the Government will add an evaluation cost of **$2,500.00** to the offeror's total proposed price to obtain the offeror's total evaluated price.

Proposals for **Bid A** (First Article Test applies) will be evaluated as follows:
The contractor's proposal for CLIN 0001AA (FA Test Plan), CLIN 0001AB (FA Test Report), CLIN 0001AC (Expended in Testing), CLIN 0001AD (Non-Destructive Exhibits), and the quantity under CLIN 0001AE (Production Articles) will be added together for purposes of evaluation. The Evaluation Cost factor for First Article ($2,500.00) will be added to this total. This cumulative price of these six factors will be used in evaluation of proposals.

Proposal for **Bid B** (First Article Test does not apply) will be evaluated as follows:

The contractor's proposal for the quantity under CLIN 0001AF is the price factor that will be used in evaluation. The price for the quantity must be submitted.

(2) Unrealistically low costs/prices proposed either initially or subsequently may be grounds for elimination of an offer from the competition or shall be based upon the vendor not understanding requirements resulting in an unrealistic proposal submitted.

(3) Unbalanced pricing: Offerors' proposals will be reviewed for unbalanced pricing. The Government will evaluate any supporting information provided by the Offeror explaining variances that appear unbalanced. Evaluated offers that are determined to be unbalanced may be deemed ineligible for award by the Contracting Officer if a determination is made that lack of balance poses an unacceptable risk to the Government. Unbalanced pricing exists when, despite an acceptable total price, the price of one or more line items is significantly over or understated as demonstrated by application of price analysis techniques, such that:
(a) There is reasonable doubt the offer would result in the lowest overall cost to the Government, even though it is the lowest priced Offeror; or
(b) The offer is so grossly unbalanced; its acceptance would be tantamount to allowing an advanced payment.

(4) If incidental or miscellaneous expenses not related to specific line item structure accompany vendor proposals, these charges shall be added to the total line item cost/price to reach the final total cost/price proposed to the Government.

(5) Price Reasonableness: The proposed prices will be evaluated for reasonableness. Analysis of price proposals will be performed using one or more of the techniques defined in FAR 15.404 in order to determine a price reasonableness. Reasonableness must represent a price to the Government that a prudent person would pay in the conduct of competitive business. Normally price reasonableness is established through adequate price competition; but, may also be determined through price analysis techniques as described in FAR 15.404.

d. Technical Factor
(1) Technical proposals are not required. Technical acceptability will be determined based on the offerors compliance with the requirement as stated in Section B Schedule and/or any referenced specifications, engineering notes and all other attachments herein.

(2) The delivery schedule will be evaluated based on the dates established in Section B of the solicitation. It should be noted that the Government's required delivery is based on the Requirements' need date, and may not be attainable. Therefore, if a proposed delivery does not meet the Government's required delivery, the proposed delivery may be considered responsive.

(3) Qualification Requirements must be met IAW Clause 52.209-1, "QUALIFICATION REQUIREMENTS (FEB 1995)" prior to award. Contract award will not be delayed to allow an offeror completion of qualification requirements or process.

(4) Technical acceptability will be ascertained based on one of the ratings described below. Proposals will be evaluated for compliance with solicitation; receipt of a responsive proposal to deliver the supplies in accordance with the solicitation, and/or any referenced specifications in the Engineering Data List, Engineering Notes and all other attachments herein.

Acceptable – Proposal meets the requirements of the solicitation.

Unacceptable – Proposal does not meet the requirements of the solicitation.

e. Discussions
It is the Government's intent to award without discussions, therefore, it is imperative that offeror's submit their best terms initially. However, if during the evaluation period, it is determined to be in the best interest of the Government to hold discussions, offeror responses to Evaluation Notices (ENs), and the Final Proposal Revisions (FPRs) will be considered in making the source selection decision.

f. Small Business Participation Factor
All offerors, including small businesses, must submit a Small Business Participation Plan. Each offer will be determined acceptable for this factor if the Small Business Participation Plan is determined adequate in accordance with the
descriptions below. Only those Plans determined to be acceptable, either initially, or as a result of discussions, will be considered for award.
Each offeror will receive one of the Small Business Participation Plan ratings below:

Acceptable - Proposal indicates an adequate approach and understanding of small business objectives.
Unacceptable - Proposal does not indicate an adequate approach and understanding of small business objectives.
The evaluation will consider whether the Small Business Participation Plan adequately reflects an approach and Understanding of the following small business objectives to include (1) the extent of participation of proposed Small Businesses
When subcontracting possibilities exist to include the (2) description of the subcontracted work these proposed firms are to
perform, (3) the company names/CAGE codes planned for use in the performance of this resultant contract along with the (4)
associated goals to include service-disabled veteran-owned small business concerns, HUBZone small business concerns, small
disadvantaged business concerns, and women-owned small business concerns (5) expressed in terms of percentages of both the total planned subcontracted dollars and total contract dollars. Offers that only acknowledge a goal is not met, rather than providing adequate rationale including specific reasons why small business participation is unattainable, may result in a rating of unacceptable.
