*************This announcement does not request any white papers or proposals at this time*************

The following topic is an anticipated requirement for the Air Force Research Laboratory, Materials & Manufacturing Directorate, Structural Materials Division (AFRL/RXC) located at Wright-Patterson Air Force Base. An Open Broad Agency Announcement (BAA) requesting white papers for this research area is anticipated to be published mid-August 2018.

The anticipated funding listed below reflects estimated funding only. This estimate is not a promise of funding. Funding is uncertain and is subject to change. Changes in funding availability may occur at the discretion of the Government.

Program Description: The Air Force Research Laboratory, Materials & Manufacturing Directorate, Structural Materials Division (AFRL/RXC) plans to solicit white papers and potentially technical and cost proposals under an Open BAA to support the needs of its Structural Materials and Applications mission. Structural Materials technologies that range from materials and scientific discovery through technology development and transition are of interest.

Anticipated Contract Type: The Air Force reserves the right to award the instrument best suited to the nature of the research proposal. It is anticipated that awards under the BAA will generally be Cost-Plus-Fixed-Fee (CPFF).

Anticipated Funding: $99,500,000.00 total program

Place of Contract Performance: TBD

Set Aside: None
