AMENDMENT NOTICE: OEM AUTHORIZATION REQUIREMENT

All offerors submitting quotes or proposals in response to this combined synopsis/solicitation must be Original Equipment Manufacturer (OEM) authorized distributors for the parts being procured. Offerors must provide verifiable proof of their authorized status (e.g., a current authorization letter from the OEM) with their submission. Failure to provide this documentation will result in the offer being deemed non-responsive and ineligible for award.

The requirement **for** OEM authorized parts distributors is necessary to prevent the introduction of counterfeit/gray-market parts into the agency's physical security infrastructure, preserve critical manufacturer warranties, and ensure compliance with life-safety and vault-security certifications.
