Salient Characteristics Sheet

Describe the requested item(s) in salient terms: Custom architectural laminate slatwall paneling system to cover the wall in front of the new 316 OSS command suite. The system must feature integrated aluminum channels for modular mounting and include a dedicated section for the command team and outstanding performers (quarterly and annual award winners). It must seamlessly match the specific millwork, finishes, and hardware of the legacy installations currently in the hallway.

Physical characteristics =

1. Architectural laminate slatwall panels in #1861 SEI, Blu Notte (ABET).
    a. (4) 41.375”x96”
    b. (1) 18.625”x96”
    c. (1) 40.25”x16.25”
2. Cut photo acrylic plaques mounted on Starboard backers with slatwall mounting hardware
    a. (24 sets of 2) 7.5”x9.5” for award winners
    b. (4 sets of 2) 11”x13.5” for the command team
3. Direct Print to ¼” Clear Acrylic nameplates with integrated Slatwall Plate Hardware.
    a. (24) 7.5”x2” (CGO, FGO, etc.)
    b. (4) 11”x2” for leadership team (Commander, SEL, etc.)
4. 4.5” Acrylic Letters in Metallic Silver – Matte with studs to read “316th Operations Support Squadron”
5. 3.5” Acrylic Letters in Metallic Silver – Matte with studs to read “Outstanding Performers”
6. 3’ Acrylic letters in Metallic Silver – Matte with studs to read “Leadership”
7. 2” Cut Vinyl Acrylic Letters to read “Quarterly Award Winners”, “Annual Award Winners”, and “Command Suite”
8. 30”x30” Digital Print (Squadron patch) with appropriate mounts

Essential Characteristics = Must be an exact architectural, material, and aesthetic match to the custom slatwall paneling currently installed in front of the 316 Operations Support Squadron (316 OSS) Command Suite and the 1 Helicopter Squadron (1HS) Command Suite. Materials must be identical commercial millwork grade to ensure uniform hallway appearance and allow interchangeable use of the modular slatwall mounting hardware.

Functions to be performed = The 316 OSS Command Suite is being moved across the hall to accommodate a new flying squadron being stood up to join the 316 OG. The current paneling cannot be reused because the wall dimensions are different, and the new squadron will be able to repurpose the current paneling. This new wall paneling will convert the plain wall in front of the new 316 OSS Command Suite into a professional entryway that will perfectly match the architectural footprint currently in the same hallway for the other two squadrons in the 316 OG, while utilizing the aluminum slatwall system for continuous, drill-free updates to personnel photos.
