OTTI CSO - AOI 03 - Questions and Answers

Q: Is there any documentation available on the existing fielded or in-development software for AOI 03?

A: The current solution set does require an advanced understanding of the Systems Tool Kit (STK) software to plan the training.

Q: Is there a preferred interface/architecture for proposed software deliveries?

A: The current training capability resides on a classified closed-loop network in one location. Through this AOI, the Government would be seeking solutions that can be installed on both this closed loop network, but ultimately be able to be hosted in the cloud for distributed training at multiple locations.

Q: Will successful proposers have full access to code and subject matter experts?

A: Yes
