Navajo Bulk Fencing Materials
Statement of Work

1. **OBJECTIVE:** The purpose of this requirement is for the supply, delivery, and off-loading of fencing materials at Navajo State Park. Installation will be carried out by Colorado Parks & Wildlife or via a Bureau of Reclamation service contract.

2. **MATERIALS**
    a. Fencing supplies required include:
        1. 4 Gates
            - 16' wide x 4-5' tall 2" tubular steel galvanized or enameled steel gate (green or non-galvanized gray color).
        2. 850 Wood Posts
            - 7' long x 5" wide treated round wood post.
            - Sound, single stem members.
            - Honey locust, western redcedar (full stem with bark removed), juniper, osage orange, and white oak are acceptable without treatment. Split western redcedar posts will be acceptable if the butt is treated for a minimum depth in the ground plus 6 inches. Ponderosa pine, lodgepole pine, fir, balsam, and tamarack will be acceptable if treated for the full length.
            - Posts that are twisted, rotted, or excessively bent are considered unsound and are not acceptable. Slabs and wedge-shaped members will not be acceptable. Posts that are charred are not acceptable.
        3. 120 Wood Posts
            - 8' long x 5" wide treated round wood post.
            - Sound, single stem members.
            - Honey locust, western redcedar (full stem with bark removed), juniper, osage orange, and white oak are acceptable without treatment. Split western redcedar posts will be acceptable if the butt is treated for a minimum depth in the ground plus 6 inches. Ponderosa pine, lodgepole pine, fir, balsam, and tamarack will be acceptable if treated for the full length.
            - Posts that are twisted, rotted, or excessively bent are considered unsound and are not acceptable. Slabs and wedge-shaped members will not be acceptable. Posts that are charred are not acceptable.
        4. 3500 Steel T-Posts
            - 5.5' tall x 1.3-1.5" wide 1.33 lbs/linear ft enamel coated steel t-posts with studs and anchor plate (green color) with 11 gauge, galvanized, steel t-post clips.
        5. 500 Steel T-Posts

- 6.5' tall x 1.3-1.5" wide 1.33 lbs/linear ft enamel coated steel t-posts with studs and anchor plate (green color) with 11 gauge, galvanized, steel t-post clips.

6. 4200 Wire Stays
   - 42", 9.5 gauge, galvanized wire stays.
7. 4200 Wooden Stays
   - 2" x 2" x 4' treated wood stays.
   - Honey locust, western redcedar (full stem with bark removed), juniper, osage orange, and white oak are acceptable without treatment. Split western redcedar posts will be acceptable if the butt is treated for a minimum depth in the ground plus 6 inches. Ponderosa pine, lodgepole pine, fir, balsam, and tamarack will be acceptable if treated for the full length.
8. 75 Quarter Mile (1,320 Feet) Rolls of Smooth Wire
   - 12.5 gauge, Class 3, galvanized, high tensile smooth wire (1,320' roll).
9. 150 Quarter Mile (1,320 Feet) Rolls of Barbed Wire
   - 12.5 gauge, Class 3, galvanized, 2 pt, 4-5" barb spacing barbed wire (1,320' roll).
10. 50 170-Foot Rolls of Smooth Wire
    - 9 gauge, Class 3, galvanized smooth wire (170' roll).
11. 200 Pounds of Staples
    - 1.75-2", 9 gauge, galvanized, double barbed staples (lbs).
12. 2000 Steel T-Post Clips
    - 11 gauge, galvanized, steel t-post clips.

3. DELIVERY INFORMATION
