Contract Data Requirements List (Exhibit A - DD Form 1423)

The following table outlines the Contract Data Requirements List (CDRL) for the deliverables under this contract:

Exhibit A - DD Form 1423	
01. Sequence No.	A010
02. Data Description	Certificate of Hydrostatic Test
03. Subtitle	For each Assembly
04. DID Number	Per Attachment 1 to Exhibit A
05. Contract Reference	Paragraph C.2.4.1
06. Technical Office	2310.1
07. DD 250 Req	DD
08. APP Code	
09. IAC Input	
10. Frequency	ASREQ
11. As-of Date	
12. Date of First Submission	ASREQ
13.Date Sub Submission	ASREQ
14. Distribution	Code 410/ 0 Via Mail (No DD-250 Req'd)
15. Total	1 per tested unit
16. Remarks	1. A Hydrostatic Test Report is required for each of the twenty-two (22) hardware units specified under Contract Line Items (CLINs) 0001 through 0009. This encompasses nine (9) distinct equipment types as detailed in the Detailed Item Specifications, Section C.2.2. 2. Contractor shall submit one (1) digital copy of the test report for each individual unit tested. 3. Submittal Timeline: Each report shall be submitted to the Government concurrent with shipment of the material from the manufacturer's facility. 4. Reports may be consolidated by equipment type (9 sequences) if multiple units of the same type are tested

	concurrently, provided that individual serial numbers and test parameters for all 22 units are clearly delineated in the respective report.

C.3. Required Certification Instructions

C.3.1. Shipment Certification: Certification shall be supplied with each shipment of material. A Certificate of Compliance shall be supplied as outlined in Paragraph C.4.2. The vendor is liable for conducting all tests, analyses, inspections, and examinations, etc., as specified by the contract and specifications, whether certifications are required or not.

"I attest all items furnished on this contract are in full compliance with all contract requirements."

C.3.2. Certification Instructions: The Certificate of Compliance shall contain the signature and title of the vendor official designated responsible for Quality Assurance. The material identification (e.g., lot, batch, part number, etc.) shall be included on the Certificate of Compliance.
