Microelectronics Innovation for Next-generation System Advancement and Validation (MINSAV)

Questions (Q) and Answers (A)

08 November 2019

CALL 01 * ATC-DP SPECIFIC QUESTIONS

1) **Q:** Reference SOO paragraph 3.10. Does "Microelectronics Development Marketplace" refer to research/academic/development microelectronics fabrication facility and/or chip design infrastructure in cloud?

A: The microelectronics marketplace in task 3.10 refers to a mechanism to facilitate access to SOTA microelectronics development, including business models, EDA tools, services, and expertise. The marketplace provides those wanting to develop assured SOTA microelectronics with a way to get access to the wide range of tools, capabilities, and understanding necessary to accomplish development.

2) **Q:** Given the page limit on the white paper, does the Government expect full resumes and past performance summaries in order to meet evaluation criterion?

A: The technical expertise and related experience provided by each team can be detailed in summary paragraphs in the whitepaper. Full resumes are not expected in the white paper phase.
