DEPARTMENT OF THE AIR FORCE
AEROSPACE SUSTAINMENT DIRECTORATE (AFMC)
TINKER AIR FORCE BASE OKLAHOMA

24 Sep 2012

TO: ALL INTERESTED PARTIES

FROM: AFLCMC/LPKPA
3001 Staff Drive Ste 2AA2 103C
Tinker AFB, OK 73145-3032

SUBJECT: F117 Quantity Ranges for Overhauls – Request For Information

1. Tinker AFB is conducting market research to optimize quantity ranges for the F117 overhauls, as well as the material to support F117 overhauls. It is the intent of the USAF to include quantity ranges for the Heavy Overhaul CLIN and Heavy Material CLIN. A heavy overhaul is defined as follows:

> The maintenance required to restore an engine to a serviceable condition capable of achieving the full Build Goal as specified in the Performance Work Statement including Performance/EGT, hardware condition/configuration, and replacement of Life Limited Parts. This level of work scope will include, at a minimum, heavy module maintenance (which consists of 67% or greater disassembly and/or hardware repair/replacement of a module or build group) to the LPT, HPT, HPC, and Diffuser/Combustor modules. Additional maintenance may be required to return the engine to service including but not limited to the LPC, Gearboxes and remaining build groups.

2. The USAF is requesting feedback on the annual quantities that would optimize the quantity ranges providing the greatest economies of scale. Following are the current quantity ranges per year being considered for the Heavy Overhaul CLIN and the Heavy Material CLIN: 1-90, 91-120, 121-140, 141-160, 161-250. If you have information available to suggest different quantity breaks would optimize pricing, please provide that information to the USAF for consideration. It is requested that your response distinguish between the overhaul (touch labor) and the material to support the overhaul.

3. The Government does not intend to award a contract on the basis of this RFI or to otherwise pay for the information requested.

4. Request a response by COB 1 Oct 12 to the undersigned, who can be reached at e-mail: christina.whitlock@tinker.af.mil or by phone: (405)734-6409. In addition, cc Mr. Jeff Jodlowski at e-mail: jeffrey.jodlowski@tinker.af.mil.
