REQUEST FOR QUOTE

Solicitation PIID: 47QSSC26Q0106

Client Agency

3BSB B CO 1ABCT 3ID
BLDG 1720A MCFARLAND AVE
FORT STEWART, GA 31314-0000

Description of Procurement:

Purchase Four (4) Astronics Test Systems, Inc. P/N ATS-3200 Bench Top Radio Test Set, brand name or equal.

Open Market

Preponderant NAICS - 334220 Radio and Television Broadcasting and Wireless Communications Equipment Manufacturing (Size Standard: 750 Employees)

PSC - 6625: Electrical and Electronic Properties and Testing Instruments

Table of Contents

SECTION A: GENERAL PROCUREMENT INFORMATION 3
SECTION B: QUOTER INFORMATION 5
SECTION C: SCHEDULE OF ITEMS 6
SECTION D: SUBMITTAL INFORMATION 18
SECTION E: RFQ ATTACHMENTS 19
SECTION F: CONTACT INFORMATION 20
SECTION G: CLAUSES 21
SECTION H: PROVISIONS, REPRESENTATIONS, & CERTIFICATIONS 31
SECTION I: EVALUATION FACTORS 37

SECTION A - SOLICITATION/CONTRACT FORM

A. This Request for Quote (RFQ) is a Single Award, Firm-Fixed Price (FFP), Purchase Order for four (4) Astronics Test Systems, Inc. P/N ATS-3200 Bench Top Radio Test Set, brand name or equal for 3rd Brigade Support Battalion 1st Armored Brigade Combat Team, 3rd Infantry Division, Army, Fort Stewart, GA. The Sets include: (4) Astronics Test Systems, Inc. p/n 409426, (4) Astronics Test Systems, Inc. p/n 801065-102, (4) Astronics Test Systems, Inc. p/n 801065-105, (4) Astronics Test Systems, Inc. p/n 801065-111, (4) Astronics Test Systems, Inc. p/n 408831, (4) Astronics Test Systems, Inc. p/n ATS-3100-RTS-WTY36, (4) Astronics Test Systems, Inc. p/n 409462, (4) Astronics Test Systems, Inc. p/n 925416, (4) Astronics Test Systems, Inc. p/n 408703, and shipping costs for (4) sets.

B. This acquisition is being conducted under and this solicitation is issued in accordance with FAR part 12.2 and will be advertised on Contract Opportunities (SAM.gov) utilizing NAICS 334220 Radio and Television Broadcasting and Wireless Communications Equipment Manufacturing. Contractors who don't already have Size Standard 750 Employees, must add it to the Contractor's SAM Representations and Certifications and Small Business Program Representations before award.

C. This acquisition is NOT set-aside for Small Business.

D. GSA intends to award a single-award, Firm Fixed Price Order.

E. Period of Performance (POP): One time purchase request IAW FAR 16.2 to be completed in coordination with 3rd Brigade Support Battalion 1st Armored Brigade Combat Team, 3rd Infantry Division, Army, Fort Stewart, GA.

F. Method of Award: Award will be made to the quote that represents the Lowest Price, Technically Acceptable (LPTA) and results in the lowest overall cost alternative that meets the Government's needs. For additional details, reference SECTION I: EVALUATION FACTORS

G. To be awarded a contract and to submit invoices, your company will need to be registered with OMS Vendor Portal or EDI to receive orders electronically.

   To request access to the GSA OMS Vendor Portal, please submit a ticket to the GSA eTools Help Desk and provide the following information:

   - Vendor Name
   - Vendor ID number (UEI)
   - Email Address
   - First Name and Last Name
   - Phone Number
   - Physical Address (City, State, Zip)
   - Email Address for Order Notification emails

H. This is ONLY a request for pricing. DO NOT SHIP based upon the posting of this RFQ.

I. **The Government intends to award on initial quotation and advises quoters to submit their best terms and prices in their initial quotation.**

J. Written requests for explanation or information regarding this RFQ should be directed to Amanda Acosta, GSA Contract Specialist at: amanda.acosta@gsa.gov and Jonathan Hankin, Contracting Officer at: jonathan.hankin@gsa.gov.

K. ALL QUOTES AND ALL SUPPORTING DOCUMENTATION SHALL BE SUBMITTED THROUGH BY EMAIL AND ARE DUE ON OR BEFORE 5:00 PM EDT, July 13, 2026.

* FACSIMILE (FAX) QUOTES WILL NOT BE ACCEPTED *
* Mail QUOTES WILL NOT BE ACCEPTED *

When responding to this RFQ, complete the entire package along with the supplemental documentation and submit your quote package as an attachment to your RFQ response by email. No other forms of submission will be accepted. Each quote must be received by the closing date and time. Quotations received after this time will be deemed late and shall not be considered for award.

FAILURE TO PROVIDE ALL OF THE REQUIRED SUBMITTAL INFORMATION LISTED IN SECTION D: SUBMITTAL INFORMATION MAY RESULT IN YOUR QUOTE NO LONGER BEING EVALUATED OR CONSIDERED FOR AWARD.

SECTION B: QUOTER INFORMATION

Please complete the highlighted fields in "blue" and return with your quote:

Company's Name:	
Unique Entity ID (UEI) Number:	
Socio-Economic Status:	
Quoter's Point of Contact (POC) Name, email and Phone number:	

QUOTER MUST COMPLETE THESE STATEMENTS:

☐ Quoter acknowledges receipt of RFQ amendments and confirms any amendments have been reviewed.
Quoter ☐ does or ☐ does not take exception to the RFQ provisions, clauses, requirements, or other information.

If quoter does take exception to any of the RFQ provisions, clauses, requirements, specifications, or other information, please provide a list of any exceptions and explanation(s) in the space below. Please note, the Government reserves the right to make a selection based upon initial quotes received, without discussions with quoters; therefore, exceptions to the RFQ may eliminate a quoter from receiving any further consideration.

To be awarded a contract and to submit invoices, your company will need to be registered with OMS Vendor Portal or EDI to receive orders electronically.

To request access to the GSA OMS Vendor Portal, please submit a ticket to the GSA eTools Help Desk and provide the following information:

- Vendor Name
- Vendor ID number (UEI)
- Email Address
- First Name and Last Name
- Phone Number
- Physical Address (City, State, Zip)
- Email Address for Order Notification emails

Quoter's First and Last Name:	
Quoter's Business Title:	
Quoter's Signature (digital/wet):	

SECTION C: SCHEDULE OF ITEMS

Statement of Work (SOW)

1. **Scope of Work.** To support 3rd Brigade Support Battalion 1st Armored Brigade Combat Team, 3rd Infantry Division, the contractor will provide and deliver four (4) Astronics Test Systems Sets with the following required parts:.

Item	Manufacturer	Part Number	Description
1	Astronics Test Systems, Inc.	409426	ATS-3200 RTS: ATS-3200 RTS Benchtop Radio Test Set
2	Astronics Test Systems, Inc.	801065-102	ATS-3100: SW Option, Modulation Bandwidth 80MHz
3	Astronics Test Systems, Inc.	801065-105	ATS-3100: SW Option, RF Pulse and Power Analyzer
4	Astronics Test Systems, Inc.	801065-111	ATS-3100: SW Option, Real Time BER
5	Astronics Test Systems, Inc.	408831	ATS-3100 RTS TP HWY/SW: L3Harris RT-1523E_F
6	Astronics Test Systems, Inc.	ATS-3100-RTS-WTY36	ATS 3100: 36 Month Extended Warranty
7	Astronics Test Systems, Inc.	409462	ATS 3100/3200: Accessory Kit
8	Astronics Test Systems, Inc.	925416	ATS 3200 RTS: Transit Case
9	Astronics Test Systems, Inc.	408703	General: RTS/MGA (Maintenance Group Adapter)

2. **Salient Characteristics.** This requirement is for (4) Astronics Test Systems, Inc. P/N 409426, ATS-3200 Bench Top Radio Test Sets, brand name or equal.

   Or Equal items must meet the following minimum requirements and contain all subcomponents.

   The ATS-3200 RTS is a benchtop radio test set with the following part numbers per set:

MFN: Astronics Test Systems
PN: 409426
QTY: 1

- Dimensions: Approximately 19" x 10" x 17" (W x H x D)
- Weight: Approximately 35 lbs (15.9 kg)
- Chassis: A robust, enclosed chassis designed for durability and transportability.
- Display: A high-resolution color LCD for clear and easy-to-read measurements and settings.
- Controls: A combination of a keypad and rotary knob for intuitive navigation and data entry.
- Connectors: BNC, N-type, and SMA connectors for RF input/output, as well as various other I/O ports for data and control.
- Application: Primarily designed for benchtop use in a laboratory, production, or field service environment.
- Integration: Can be integrated into a standard 19-inch test rack for automated test solutions.
- Compatibility: Designed to test a wide range of radio systems, ensuring it fits into existing test procedures and meets the needs of various radio maintenance tasks.
- Capabilities: A multi-band radio test solution that supports the testing of AM, FM, SINCGARS, and other tactical radios.
- Measurements: Performs a wide range of measurements, including:
    - Transmitter power and frequency
    - Receiver sensitivity
    - Modulation and demodulation analysis
    - Audio analysis
    - Return loss and VSWR
- Automation: Supports automated test sequences for rapid and repeatable testing.
- Performance: High-accuracy and reliable performance for mission-critical radio maintenance.

The ATS-3100: SW Option, RF Pulse and Power Analyzer
MFN: Astronics Test Systems
PN: 801065-105
QTY: 1

- Format: The option is delivered as a software license or a digital activation key. It is not a physical component.
- User Interface (UI): Upon activation, the software integrates seamlessly into the host instrument's existing firmware. It unlocks a new "Pulse Analysis" mode or a dedicated menu within the instrument's UI.

- Display: The software provides specialized graphical displays for pulse analysis, including:
    - A trace view showing the pulse profile over time.
    - A results table displaying key pulse parameters.
    - Markers for manual measurements on the pulse waveform.
- Compatibility: This software option is designed to be installed and run on specific Astronics Test Inc. hardware platforms, such as the ATS-3200 RTS or other compatible radio test sets and RF analyzers.
- Installation/Activation: The option is enabled by entering the provided software license key into the host instrument's system configuration or licensing menu. An active internet connection or a USB update may be required for initial activation.
- System Requirements: The host instrument must be running a compatible firmware version that supports the Pulse and Power Analyzer option. The hardware itself must have the necessary RF measurement capabilities to acquire the signals for analysis.
- Primary Function: To provide detailed analysis of pulsed RF signals, which are critical in applications such as radar, electronic warfare (EW), and advanced communication systems.
- Enabled Measurements: The software unlocks a suite of automated measurements,
  including but not limited to:
- Power: Peak Power, Average Power, Pulse Power.
- Time: Pulse Width, Duty Cycle, Rise Time, Fall Time, Pulse Repetition Interval (PRI), and Pulse Repetition Frequency (PRF).
- Pulse Characteristics: Droop, Overshoot, and Pulse-to-Pulse Jitter.
- Analysis Capability: Allows engineers and technicians to automatically characterize and verify the performance of pulsed RF systems, replacing the need for complex manual measurements with an oscilloscope or spectrum analyzer.
- Automation: The measurements and analysis functions are typically accessible via remote command, allowing for integration into automated test procedures.

The ATS-3100: Modulation Bandwidth, 80MHz
MFN: Astronics Test Systems
PN:801065-102
QTY: 1

- Format: The option is a software license delivered as a digital activation key. It has no physical parts or dimensions.
- User Interface (UI): When activated, this option does not add a new, distinct mode.

- Instead, it expands the capabilities of existing modes (like Vector Signal Analysis or Spectrum Analysis). The user will see that the available "Bandwidth" or "Span" settings in the measurement configuration menus are increased, with a new maximum selection of 80 MHz.
- Compatibility: This software is designed to be installed on a specific, compatible Astronics hardware test set. The host instrument must possess the underlying hardware (e.g., analog-to-digital converters, RF front-end) capable of supporting an 80 MHz bandwidth.
- Installation/Activation: The 80 MHz bandwidth capability is unlocked by entering the unique software license key into the instrument's licensing or system configuration menu. This is a one-time activation per instrument.
- Firmware Dependency: The host instrument must be running a firmware version that supports the 80 MHz bandwidth option. A firmware update may be required before the license key can be applied.
- Primary Function: To increase the real-time modulation and analysis bandwidth of the host test instrument to a maximum of 80 MHz. This allows the instrument to capture and analyze the full spectrum of wideband signals in a single acquisition.
- Core Capability: Enables the testing and troubleshooting of modern wideband communication systems. Without this option, the instrument would be limited to a narrower, standard bandwidth (e.g., 10 MHz or 25 MHz).
- Applications: This function is essential for working with a variety of modern wireless standards, including:
- WLAN: IEEE 802.11ac and 802.11ax (Wi-Fi 5/6).
- Mobile Communications: LTE-Advanced and 5G New Radio (NR) carriers.
- Other: Satellite communications, military communications, and wideband radar signals.
- Enabled Measurements: Facilitates critical signal quality measurements on wideband signals, such as Error Vector Magnitude (EVM), Adjacent Channel Power (ACP), occupied bandwidth, and constellation diagram analysis.

The ATS-3100: SW Option, Real-Time BER
MFN: Astronics Test Systems
PN: 801065-111
QTY: 1

- Format:** The option is delivered as a software license or a digital activation key. It is not a physical component.
- User Interface (UI):** Upon activation, the software enables a new "BER Test" or "Digital Analysis" mode within the host instrument's operating system. This mode provides a dedicated user interface for configuring and monitoring tests.
- Display and Controls:** The interface includes specific fields and menus for:

- Setup:** Selecting data patterns (e.g., PRBS7, PRBS15, PRBS23), setting the data rate, and defining test criteria (e.g., test duration, number of bits, error count limit).
- Results:** A real-time display of key metrics such as the Bit Error Rate, total bit count, error count, and synchronization status.
- Compatibility:** This software is designed for installation on specific Astronics hardware test platforms that possess the necessary digital signal generation and analysis hardware.
- Installation/Activation:** The BER functionality is unlocked by entering the unique software license key into the instrument's system configuration or licensing menu.
- Firmware Dependency:** The host instrument must be running a compatible firmware version that supports the Real-Time BER option.
- Physical Test Setup:** To perform a test, a loopback configuration is typically required. This involves connecting the instrument's signal generator output to the input of the Device Under Test (DUT) and connecting the DUT's output back to the instrument's analyzer input. This allows the instrument to compare the transmitted data pattern with the received data pattern.
- Primary Function:** To measure the Bit Error Rate (BER) of a digital communication device or system in real-time. BER is a fundamental metric of signal quality, representing the number of bit errors per unit of time, divided by the total number of transferred bits.
- Core Capability:** The software enables the instrument to generate a known pseudo- random bit sequence (PRBS), transmit it through a DUT, receive the potentially degraded signal, and compare the received sequence bit-for-bit against the original to count errors.
- Key Features:**
- Pattern Generation:** Support for standard PRBS patterns (e.g., PRBS7, PRBS9, PRBS11, PRBS15, PRBS20, PRBS23) and often user-defined patterns.
- Synchronization:** Automatically synchronizes to the incoming data stream to begin the comparison.
- Measurements:** Provides a direct readout of the BER, total bits tested, and total
- errors counted.
- Application:** This function is crucial for verifying the performance and diagnosing faults in digital radios, modems, and communication links. It directly tests the quality of the entire transmit/receive chain.

The ATS-3100 RTS TP HW/SW: L3Harris RT-1523E_F
MFN: Astronics Test Systems
PN: 408831

QTY: 1

- **Hardware (HW):** The TPS includes a dedicated hardware kit, often called an Interface Test Adapter (ITA). This kit consists of:
    - **Custom Cabling:** A set of specialized RF, data, and power cables designed to connect the specific ports on the L3Harris 1523E_F radio to the standard interface points on the ATS-3100 test station.
    - **Connectors:** High-fidelity connectors (e.g., TNC, military-grade circular connectors) that match the radio and the test set to ensure signal integrity.
    - **UUT Fixture (if applicable):** A holding fixture may be included to securely position the radio during the test process.
- **Software (SW):** The TPS includes a software package, typically delivered on a USB drive or via digital download, which contains:
    - **Test Program:** The specific test application that runs on the ATS-3100 RTS controller.
    - **Documentation:** User manuals and guides detailing the installation, setup, and execution of the test program.
- **Hardware Integration:** The Interface Test Adapter hardware provides the direct physical and electrical link between the ATS-3100 RTS and the L3Harris 1523E_F radio. The cables are cut to length and terminated with the precise connectors required to mate the two systems without signal loss or interference.
- **Software Integration:** The test program software is installed on the ATS-3100 RTS's host controller. It integrates seamlessly into the main test executive software (e.g., Astronics Test Framework), appearing as a selectable test option for the operator.
- **Compatibility:** This TPS is designed exclusively to fit the combination of the Astronics ATS-3100 RTS and the L3Harris 1523E_F radio. It is not compatible with other test stations or other models of radios.
- **Primary Function:** To provide a fully automated, "turn-key" testing solution for the L3Harris 1523E_F radio. It replaces manual, time-consuming testing procedures with a repeatable and accurate automated sequence.
- **Core Capability:** The software takes control of the ATS-3100 instrumentation to automatically stimulate the radio's transmitter and receiver and measure the responses. It performs a series of pre-defined performance and functional tests.
- **Automated Tests:** The function of the TPS is to execute a comprehensive suite of tests,which typically includes:
    - **Transmitter Tests:** Verifying RF power output, frequency accuracy, and modulation quality across the radio's operating range.
    - **Receiver Tests:** Measuring sensitivity (SINAD) and squelch performance.

    - **Audio Tests:** Checking audio frequency response and distortion.
- **Go/No-Go Results:** The program automatically compares all measurement results against the official performance specifications for the L3Harris 1523E_F radio. At the conclusion of the test sequence, it provides the operator with a clear pass/fail (Go/No-Go) report, enabling efficient maintenance and verification of mission-readiness.

The ATS-3100 /3200: Accessory Kit
MFN: Astronics Test Systems
PN: 409462
QTY: 1

- Primary Form Factor:** The kit is typically supplied in a durable, often soft-sided, carrying case with designated pouches and straps to organize and protect the individual components.
- Contents:** The kit contains a variety of standard accessories needed for daily operation of the test set. While exact contents can vary, a typical kit includes:
- RF Coaxial Cables:** Multiple cables of varying lengths, such as BNC-to-BNC and N-type-to-BNC, for routing RF signals.
- RF Attenuators:** A set of fixed attenuators (e.g., 10 dB, 20 dB) to reduce signal power levels.
- RF Terminators:** 50-ohm loads used to properly terminate unused RF ports.
- Coaxial Adapter Kit:** A collection of common in-series and between-series adapters (e.g., BNC-to-N-type, BNC female-to-female) to resolve connector mismatches.
- Microphone/Handset:** A standard microphone for testing Push-To-Talk (PTT) and audio modulation functions of a radio.
- Speaker:** An external speaker for monitoring a radio's audio output.
- Power Cord:** The main AC power cord for the host test set.
- System Compatibility:** All components are specified to be fully compatible with the Astronics ATS-3100 and ATS-3200 series test sets.
- Physical Connectivity:** The cables, adapters, and attenuators utilize industry-standard connectors (BNC, N-Type, etc.) that directly mate with the corresponding input and output ports on the front and rear panels of the test sets.
- Device Under Test (DUT) Integration:** The variety of included adapters ensures the kit can be used to connect the test set to a wide range of radios and other RF devices that may have different connector types.
- Overall Function:** The primary function of the kit is to provide the operator with the necessary tools to set up a variety of test configurations quickly and correctly. It enables the full operational capability of the host test set.
- Specific Component Functions:**

- RF Cables:** Function to reliably transmit RF signals between the test set and the DUT.
- Attenuators:** Function to protect the test set's sensitive receiver from high-power signals by reducing the power of a DUT's transmission to a safe level.
- Terminators/Loads:** Function to provide a proper 50-ohm impedance match on any unused RF ports, which prevents signal reflections that can cause measurement errors and potentially damage the instrument.
- Adapters:** Function to provide a bridge between different connector types, ensuring a proper physical and electrical connection can always be made.
- Microphone/Speaker:** Function to allow the operator to perform end-to-end audio tests, verifying the functionality of a radio's microphone input, PTT circuit, and speaker output.

The ATS-3200 RTS: Transit Case
MFN: Astronics Test Systems
PN: 925416
QTY: 1

- **Construction:** The case is constructed from a high-strength, impact-resistant polymer shell, designed to withstand harsh handling and environmental conditions.
- **External Features:**
    - **Handles:** Equipped with multiple heavy-duty carrying handles and a retractable extension handle for towing.
    - **Wheels:** Includes integrated, heavy-duty wheels for easy portability over flat surfaces.
    - **Latches:** Features multiple double-throw latches that provide a secure, compressive seal.
    - **Seals:** An O-ring gasket lines the lid, making the case watertight and dustproof when closed.
    - **Pressure Valve:** An automatic pressure equalization valve is integrated into the case to balance interior pressure during changes in altitude or temperature, making it suitable for air transport.
    - **Security:** Includes padlockable hasps to secure the contents.
- **Internal Foam:** The interior of the case is filled with high-density, pre-cut foam.
- **Instrument Cavity:** The foam features a primary cavity that is precision-cut to the exact dimensions of the ATS-3200 RTS. This custom fit ensures the instrument is held securely in place, preventing movement and providing maximum shock absorption during transit.

- **Accessory Cavities:** In addition to the main instrument cavity, the foam insert includes dedicated, custom-cut pockets and slots for essential accessories. This allows for the organized transport of items such as:
    - Power Cords
    - RF Coaxial Cables
    - Attenuators and Adapters
    - A Microphone or Handset
- **Exclusivity:** The internal fit is exclusively tailored to the ATS-3200 and its core accessories. It is not designed to hold other instruments.
- **Primary Function: Protection.** The core function of the case is to provide robust protection for the ATS-3200 test set. This protection covers multiple hazards:
    - **Impact Protection:** The hard outer shell and custom foam interior safeguard the instrument against damage from drops, shock, and impact.
    - **Environmental Protection:** The O-ring seal protects the instrument from water, rain, dust, and sand ingress (often certified to a rating like IP67).
    - **Vibration Dampening:** The foam insert isolates the instrument from vibrations common during vehicular or air transport.
- **Secondary Function: Portability & Storage.**
    - **Portability:** The combination of wheels and multiple handles functions to make a heavy and sensitive piece of test equipment easily portable by a single person.
    - **Storage:** The case provides a secure, sealed environment for safely storing the ATS-3200 RTS when it is not in use, protecting it from environmental factors in a lab, hangar, or warehouse.

The RTS MGA (Maintenance Group Adapter)
MFN: Astronics Test Systems
PN: 408703
QTY: 1

- Construction: The adapter is built into a compact, rugged metal enclosure. This robust construction ensures its internal components are protected, maintaining their stability and accuracy for repeatable measurements.
- Connectors: The face of the adapter is populated with a specific array of high-quality RF connectors (e.g., BNC, SMA, or N-Type). These connectors are the interface points for the adapter's internal circuitry.
- Passive Device: The adapter is a passive device, meaning it has no internal power source, active electronics, or user-operable controls. Its configuration is fixed.

- Direct Connection: The adapter is designed to be connected directly to the front panel input/output (I/O) ports of a compatible Astronics RTS, such as the ATS-3100 series.
- Multi-Port Interface: The layout of the adapter's connectors is precisely configured to align with a group of ports on the RTS. This allows it to be connected using a set of short, phase-stable coaxial cables (often included with the adapter) to create multiple simultaneous connections between the test set's various ports.
- System Compatibility: The adapter is engineered to work with specific maintenance and calibration software routines running on the host RTS. Its internal signal paths are designed to match the requirements of these routines. It is a required piece of equipment for performing factory-approved calibration and maintenance procedures.
- Primary Function: To enable automated performance verification and calibration of the host RTS. The adapter's function is to turn the test set "back on itself" in a precisely controlled manner, allowing the instrument to measure its own performance and be adjusted as needed.
- Core Capabilities:
    - Signal Loopback: The adapter's primary function is to create known, stable loopback paths. It routes signals from the RTS's signal generation outputs back to its signal measurement inputs. This allows the system to perform a self-test by comparing the signal it generates to the signal it measures.
    - Signal Conditioning: The adapter contains a network of internal, high-precision passive components, such as fixed attenuators, power splitters, and filters. This internal circuitry conditions the loopback signals to ensure they are at the correct power level and frequency for the specific self-test being performed. This is critical for verifying both generator accuracy and receiver sensitivity.
    - Facilitating Calibration: When used with the corresponding calibration software, the adapter provides the necessary, stable signal paths to allow a technician to perform adjustments to the test set's internal calibration constants, ensuring the instrument remains accurate over time.

The ATS-3100: 36 Month Extended Warranty
MFN: Astronics Test Systems
PN: ATS-3100-RTS-WTY36
QTY: 1

- Product Type: ** A service contract.

- Documentation: ** The warranty takes the form of one or more of the following documents:
- Warranty Certificate: ** An official certificate issued by Astronics Test Systems that details the coverage period and the serial number of the covered unit.
- Purchase Record: ** A specific line item on a purchase order or invoice that explicitly states the purchase of the 36-month extended warranty.
- Service Agreement: ** A formal contractual document outlining the terms, conditions, and coverage details of the warranty agreement.
- Applicability: ** The warranty is designed to "fit" a single Astronics ATS-3100 RTS unit. It is not a blanket policy.
- Serial Number Specific: ** The warranty coverage is tied directly to the unique serial number of the ATS-3100 instrument for which it was purchased. It cannot be transferred to a different instrument.
- Timing of Purchase: ** This extended warranty must typically be purchased at the same time as the host ATS-3100 instrument.
- Coverage Timeline: ** The 36-month extended warranty period begins immediately after the standard factory warranty expires, providing a seamless continuation of coverage.
- Primary Function: ** To mitigate financial risk by covering the cost of repairs for the instrument for a period of 36 months beyond the standard warranty. This provides peace of mind and predictable maintenance costs.
- What the Warranty Does (Inclusions): **
- Repair Costs: ** Covers the cost of parts and labor for repairs needed to correct failures resulting from defects in materials and workmanship.
- Component Replacement: ** Provides for the repair or, at the manufacturer's discretion, replacement of failed internal components.
- Service Logistics: ** Typically covers the cost of standard return shipping from the authorized service center to the customer.
- What the Warranty Does NOT Do (Exclusions): **
- Damage: ** Does not cover repairs for damage caused by accidents, misuse, improper operation, liquid spills, or unauthorized modifications.
- Calibration: ** Does not cover the cost of routine calibration, performance verification, or alignment.
- Cosmetics & Consumables: ** Does not cover cosmetic damage that does not affect functionality or the replacement of consumable items (e.g., fuses, certain cables).
- Process: ** To execute the warranty's function, the owner must contact the Astronics service department, provide the instrument's serial number to verify coverage, obtain a Return Material Authorization (RMA), and then ship the unit to the designated service center for evaluation and repair.

Any deviations must be approved by the 3rd Brigade Support Battalion 1st Armored Brigade Combat Team, 3rd Infantry Division.

SECTION D: SUBMITTAL INFORMATION

If the Quoter's package does not include the following list of items, their quote may be determined non-responsive by the Government.

1. Each contractor shall submit a firm-fixed pricing structure for this requirement.

2. RFQ General Information and Pricing. Complete and return the following RFQ Sections and Attachments:
    a. Section B: Quoter Information
    b. Section H: Provisions, Representations, & Certifications
    c. Attachment 1_Schedule of Items
    d. Attachment 2_MIL STD 129R Vendor Certification

3. Product tech specification documents showing that the items offered meet all standards and specifications stated in the Statement of Work.

The Government reserves the right to make a selection based upon initial quotes received, without discussions with the quoter; therefore, the quoter should submit its best terms in its initial Quote. The Government also reserves the discretion to confer with offeror(s) and request revised Quote if needed. The Government reserves the right to extend the RFQ submission due date/time should it be beneficial to the Government.

GSAM 552.212-71 Contract Terms and Conditions Applicable to GSA Acquisitions of Commercial Products and Commercial Services (OCT 2023)

The Contractor agrees to comply with any clause that is incorporated herein by reference to implement agency policy applicable to acquisition of commercial products, including commercial components, and commercial services. The clause in effect based on the applicable regulation cited on the date the solicitation is issued applies unless otherwise stated herein. The Contracting Officer should check the clauses in paragraph (b) that apply or delete the clauses that do not apply from the list. The Contracting Officer may add the date of the clause if desired for clarity. The GSAR clauses in paragraph (b) of this section are incorporated by reference.

(b) *Clauses*.
552.229-70 Federal, State, and Local Taxes

(End of Clause)

52.212-4 Terms and Conditions—Commercial Products and Commercial Services (NOV 2025) (GSA Class Deviation RFO-2025-12)

(a) Definitions. The clause at Federal Acquisition Regulation (FAR) 52.202-1, Definitions, is incorporated by reference.

(b) Inspection/Acceptance. The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The Government reserves the right to inspect or test any supplies or services that have been tendered for acceptance. The Government may require repair or replacement of nonconforming supplies or reperformance of nonconforming services at no increase in contract price. If repair/replacement or reperformance will not correct the defects or is not possible, the Government may seek an equitable price reduction or adequate consideration for acceptance of nonconforming supplies or services. The Government must exercise its post acceptance rights—

(1) Within a reasonable time after the defect was discovered or should have been discovered; and

(2) Before any substantial change occurs in the condition of the item, unless the change is due to the defect in the item.

(c) Assignment. The Contractor or its assignee may assign its rights to receive payment due as a result of performance of this contract to a bank, trust company, or other financing institution, including any Federal lending agency in accordance with the Assignment of Claims Act (31 U.S.C. 3727). However, when a third party makes payment (e.g., use of the Governmentwide commercial purchase card), the Contractor may not assign its rights to receive payment under this contract.

(d) Changes. Changes in the terms and conditions of this contract may be made only by written agreement of the parties.

(e) Disputes. This contract is subject to 41 U.S.C. chapter 71, Contract Disputes. Failure of the parties to this contract to reach agreement on any request for equitable adjustment, claim, appeal, or action arising under or relating to this contract shall be a dispute to be resolved in accordance with the clause FAR 52.233-1, Disputes, which is incorporated in this contract by reference. The Contractor shall proceed diligently with performance of this contract, pending final resolution of any dispute arising under the contract.

(f) Excusable delays. The Contractor shall be liable for default unless nonperformance is caused by an occurrence beyond the reasonable control of the Contractor and without its fault or negligence. Examples of occurrences include acts of God or the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, unusually severe weather, and delays of common carriers. When an excusable delay occurs, the Contractor shall—

(1) Notify the Contracting Officer in writing as soon as possible;

(2) Remedy the delay as quickly as possible; and

(3) Notify the Contracting Officer when the occurrence is over.

(g) Invoice. The Government will handle invoices according to the Prompt Payment Act (31 U.S.C. 3903) and 5 CFR part 1315. The Contractor shall submit invoices to the address designated in the contract to receive invoices. An invoice must include the information required by 5 CFR part 1315.9(b).

(h) Patent indemnity. The Contractor shall indemnify the Government and its officers, employees, and agents against liability, including costs, for actual or alleged direct or contributory infringement of, or inducement to infringe, any United States or foreign patent, trademark, or copyright, arising out of the performance of this contract, provided the Contractor is reasonably notified of such claims and proceedings.

(i) Payment—

(1) Items accepted. Payment shall be made for items accepted by the Government that have been delivered to the delivery destinations set forth in this contract.

(2) Prompt payment. The Government will make payment in accordance with the Prompt Payment Act (31 U.S.C. 3903) and prompt payment regulations at 5 CFR part 1315.

(3) Discount. In connection with any discount offered for early payment, time shall be computed from the date of the invoice. For the purpose of computing the discount earned, payment shall be considered to have been made on the date that appears on the payment check or the specified payment date if an electronic funds transfer payment is made.

(4) Overpayments. If the Contractor becomes aware of a duplicate contract financing or invoice payment or that the Government has otherwise overpaid on a contract financing or invoice payment, the Contractor shall—

(i) Remit the overpayment amount to the payment office cited in the contract along with a description of the overpayment including the—

(A) Circumstances of the overpayment (e.g., duplicate payment, erroneous payment, liquidation errors, date(s) of overpayment);

(B) Affected contract number and delivery order number, if applicable;

(C) Affected line item or subline item, if applicable;

(D) Contractor point of contact; and

(ii) Provide a copy of the remittance and supporting documentation to the Contracting Officer.

(5) Interest.(i) All amounts that become payable by the Contractor to the Government under this contract shall bear simple interest from the date due until paid unless paid within 30 days of becoming due. The interest rate shall be the interest rate established by the Secretary of the Treasury as provided in 41 U.S.C. 7109, which is applicable to the period in which the amount becomes due, as provided in (i)(6)(v) of this clause, and then at the rate applicable for each six-month period as fixed by the Secretary until the amount is paid.
(ii) The Government may issue a demand for payment to the Contractor upon finding a debt is due under the contract.

(iii) Final decisions. The Contracting Officer will issue a final decision as required by FAR part 33 if–

(A) The Contracting Officer and the Contractor are unable to reach agreement on the existence or amount of a debt within 30 days;

(B) The Contractor fails to liquidate a debt previously demanded by the Contracting Officer within the timeline specified in the demand for payment unless the amounts were not repaid because the Contractor has requested an installment payment agreement; or

(C) The Contractor requests a deferment of collection on a debt previously demanded by the Contracting Officer (see FAR part 32).

(iv) If a demand for payment was previously issued for the debt, the demand for payment included in the final decision shall identify the same due date as the original demand for payment.

(v) Amounts shall be due at the earliest of the following dates:

(A) The date fixed under this contract.

(B) The date of the first written demand for payment, including any demand for payment resulting from a termination for cause.

(vi) The interest charge shall be computed for the actual number of calendar days involved beginning on the due date and ending on-

(A) The date on which the designated office receives payment from the Contractor;

(B) The date of issuance of a Government check to the Contractor from which an amount otherwise payable has been withheld as a credit against the contract debt; or

(C) The date on which an amount withheld and applied to the contract debt would otherwise have become payable to the Contractor.

(vii) The interest charge made under this clause may be reduced under the procedures for interest credits prescribed in FAR part 32 in effect on the date of this contract.

(j) Risk of loss. Unless the contract specifically provides otherwise, risk of loss or damage to the supplies provided under this contract shall remain with the Contractor until, and shall pass to the Government upon—

(1) Delivery of the supplies to a carrier, if transportation is f.o.b. origin; or

(2) Delivery of the supplies to the Government at the destination specified in the contract, if transportation is f.o.b. destination.

(k) Taxes. The contract price includes all applicable Federal, State, and local taxes and duties.

(l) Termination for the Government's convenience. The Government reserves the right to terminate this contract, or any part hereof, for its sole convenience. In the event of such termination, the Contractor shall immediately stop all work and shall immediately cause any and all of its suppliers and subcontractors to cease work. Subject to the terms of this contract, the Contractor shall be paid a percentage of the contract price reflecting the percentage of the work performed prior to the notice of termination, plus reasonable charges the Contractor can demonstrate to the satisfaction of the Government using its standard record keeping system, have resulted from the termination. The Contractor shall not be required to comply with the cost accounting standards or contract cost principles for this purpose. This paragraph does not give the Government any right to audit the Contractor's records. The Contractor shall not be paid for any work performed or costs incurred which reasonably could have been avoided.

(m) Termination for cause. The Government may terminate this contract, or any part hereof, for cause in the event of any default by the Contractor, or if the Contractor fails to comply with any contract terms and conditions, or fails to provide the Government, upon request, with adequate assurances of future performance. The Government will send a cure notice to the Contractor, unless the reason for the termination is late delivery. In the event of termination for cause, the Government shall not be liable to the Contractor for any amount for supplies or services not accepted, and the Contractor shall be liable to the Government for any and all rights and remedies provided by law. If it is determined

that the Government improperly terminated this contract for default, such termination shall be deemed a termination for convenience.

(n) Title. Unless specified elsewhere in this contract, title to items furnished under this contract shall pass to the Government upon acceptance, regardless of when or where the Government takes physical possession.

(o) Warranty. The Contractor warrants and implies that the items delivered under this contract are merchantable and fit for use for the particular purpose described in this contract.

(p) Limitation of liability. Except as otherwise provided by an express warranty, the Contractor will not be liable to the Government for consequential damages resulting from any defect or deficiencies in accepted items.

(q) Compliance with laws unique to Government contracts. The Contractor agrees to comply with 31 U.S.C. 1352 relating to limitations on the use of appropriated funds to influence certain Federal contracts; 40 U.S.C. chapter 37, Contract Work Hours and Safety Standards; 41 U.S.C. chapter 87, Kickbacks; 49 U.S.C. 40118, Government-financed air transportation; and 41 U.S.C. chapter 21 relating to procurement integrity.

(r) Order of precedence. Any inconsistencies in this solicitation or contract shall be resolved by giving precedence in the following order:

(1) The schedule of supplies/services;

(2) The Disputes, Payments, Invoice, Compliance with Laws Unique to Government Contracts, and Unauthorized Obligations paragraphs of this clause;

(3) Other contract clauses incorporated in the solicitation or contract;

(4) Addenda to this solicitation or contract;

(5) Solicitation provisions incorporated in the solicitation;

(6) Other paragraphs of this clause;

(7) Other documents, exhibits, and attachments; and

(8) The specification.

(s) Unauthorized obligations.

(1) Except as stated in paragraph (s)(2) of this clause, when any supply or service acquired under this contract is subject to any End User License Agreement (EULA), Terms of Service (TOS), or similar legal instrument or agreement, that includes any clause requiring the Government to indemnify the Contractor or any person or entity for damages, costs, fees, or any other loss or liability that would create an Anti-Deficiency Act violation (31 U.S.C. 1341), the following shall govern:

(i) Any such clause is unenforceable against the Government.

(ii) Neither the Government nor any Government-authorized end user shall be deemed to have agreed to such a clause by virtue of it appearing in the EULA, TOS, or similar legal instrument or agreement. If the EULA, TOS, or similar legal instrument or agreement is invoked through an "I agree" click box or other comparable mechanism (e.g., "click-wrap" or "browse-wrap" agreements), execution does not bind the Government or any Government authorized end user to such clause.

(iii) Any such clause is deemed to be stricken from the EULA, TOS, or similar legal instrument or agreement.

(2) Paragraph (s)(1) of this clause does not apply to indemnification by the Government that is expressly authorized by statute and specifically authorized under applicable agency regulations and procedures.

(t) Comptroller General examination of record. This paragraph applies if this contract was awarded using other than sealed bid procedures and is in excess of the simplified acquisition threshold on the date of award of this contract.

(1) The Comptroller General of the United States, or an authorized representative of the Comptroller General, shall have access to and right to examine any of the Contractor's directly pertinent records involving transactions related to this contract.

(2) The Contractor shall make available at its offices, at all reasonable times, the records, materials, and other evidence for examination, audit, or reproduction, until 3 years after final payment under this contract or for any shorter period specified in FAR part 4, longer period required by statute, or periods specified in other clauses of this contract. If this contract is completely or partially terminated, the records relating to the work terminated shall be made available for 3 years after any resulting final termination settlement. Records relating to appeals under the disputes clause or to litigation or the settlement of claims arising under or relating to this contract shall be made available until such appeals, litigation, or claims are finally resolved.

(3) As used in this clause, records include books, documents, accounting procedures and practices, and other data, regardless of type and regardless of form. This clause does not require the Contractor to create or maintain any record that the Contractor does not maintain in the ordinary course of business or pursuant to a provision of law.

(u) Incorporation by reference. The Contractor's representations and certifications, including those completed electronically via the System for Award Management (SAM), are incorporated by reference into the contract.

(End of clause)

52.222-90 Addressing DEI Discrimination by Federal Contractors (NOV 2025)

(a) Definitions. As used in this clause—

Program participation means membership or participation in, or access or admission to: training, mentoring, or leadership development programs; educational opportunities; clubs; associations; or similar opportunities that are sponsored or established by the contractor or subcontractor.

Racially discriminatory diversity, equity, and inclusion (DEI) activities means disparate treatment based on race or ethnicity in the recruitment, employment (e.g., hiring, promotions), contracting (e.g., vendor agreements), program participation, or allocation or deployment of an entity's resources.

(b) In connection with the performance of work under this contract, the Contractor agrees as follows:

(1) The Contractor will not engage in any racially discriminatory DEI activities;

(2) The Contractor will furnish all information and reports, including providing access to books, records, and accounts, as required by the Contracting Officer, for purposes of ascertaining compliance with this clause;

(3) In the event of the Contractor's or a subcontractor's noncompliance with this clause, this contract may be canceled, terminated, or suspended in whole or in part, and the Contractor or subcontractor may be declared ineligible for further Government contracts;

(4) The Contractor will report any subcontractor's known or reasonably knowable conduct that may violate this clause to the Contracting Officer and take any appropriate remedial actions directed by the Contracting Officer; and

(5) The Contractor will inform the Contracting Officer if a subcontractor sues the Contractor and the suit puts at issue, in any way, the validity of this clause.

(6) The Contractor recognizes that compliance with the requirements of this clause are material to the Government's payment decisions for purposes of 31 U.S.C. 3729(b)(4).

(c) The Contractor must include the substance of this clause, including this paragraph (c), in subcontracts at any tier, including those for commercial products and commercial services, except those where the place of delivery or performance is outside the United States.

(End of clause)

FAR 552.212-72 Contract Terms and Conditions Required To Implement Statutes or Executive Orders Applicable to GSA Acquisition of Commercial Products and Commercial Services (OCT 2023)

The Contractor agrees to comply with any provision or clause that is incorporated herein by reference to implement provisions of law or Executive Orders applicable to acquisition of commercial items or components. The provision or clause in effect based on the applicable regulation cited on the date the solicitation is issued applies unless otherwise stated herein. The contracting officer should either check the provisions and clauses that apply or delete the provisions and clauses that do not apply from the lists in paragraphs (a) and (b). The contracting officer may add the date of the provision or clause if desired for clarity. The GSAR provisions in paragraph (a) and GSAR clauses in paragraph (b) are incorporated by reference.

Provisions Incorporate in Full Text

52.212-1, Instructions to Offerors—Commercial Products and Commercial Services (NOV 2025) (GSA Class Deviation RFO-2025-12)

(a) *Submission of offers*. Submit signed and dated offers to the office specified in this solicitation at or before the exact time specified in this solicitation. As a minimum, offers shall include—

(1) The solicitation number;

(2) The name, address, telephone number of the Offeror;

(3) The Offeror's Unique Entity Identifier (UEI) and, if applicable, Electronic Funds Transfer (EFT) indicator;

(4) Information necessary to evaluate the factors contained in the provision at 52.212-2 or as described in the solicitation;

(5) Responses to provisions that require Offeror completion of information, representations, and certifications (other than those collected via the System for Award Management (SAM)); and

(6) A statement specifying the extent of agreement with all terms, conditions, and provisions included in the solicitation and any solicitation amendments.

(b) *Period for acceptance of offers*. The Offeror agrees to hold the prices in its offer firm for 60 calendar days from the date specified for receipt of offers, unless another time period is specified in an addendum to the solicitation.

(c) *Late submissions, modifications, revisions, and withdrawals of offers*.

(1) Offerors are responsible for submitting offers and any modifications or revisions to the Government office designated in the solicitation by the time specified in the solicitation.

(2) Any offer, modification, or revision received after the time specified for receipt of offers is "late" and will not be considered unless it is received before award is made and the Contracting Officer determines that accepting the late offer would not unduly delay the acquisition. However, a late modification of an otherwise successful offer that makes its terms more favorable to the Government will be considered at any time it is received and may be accepted.

(3) If an emergency or unanticipated event interrupts normal Government processes so that offers cannot be received at the Government office designated for receipt of offers by the exact time specified in the solicitation, and urgent Government requirements preclude amendment of the solicitation or other notice of an extension of the closing date, the time specified for receipt of offers will be deemed to be extended to the same time of day specified in the solicitation on the first work day on which normal Government processes resume.

(4) Offerors may withdraw their offers by written notice to the Government received at any time before award.

(d) *Contract award (not applicable to Invitation for Bids)*. The Government intends to evaluate offers and award a contract without discussions with Offerors. Therefore, the Offeror's initial offer should contain the Offeror's best terms. However, the Government reserves the right to conduct discussions, if necessary. The Government may reject any or all offers if such action is in the public interest, accept other than the lowest offer, and waive informalities and minor irregularities in offers received.

(e) *Debriefings*. If a postaward debriefing is given to requesting Offerors, the Government will disclose the following information, if applicable:

(1) The agency's evaluation of the significant weak or deficient factors in the debriefed Offeror's offer.

(2) The overall evaluated cost or price and technical rating of the successful Offeror and the debriefed Offeror and past performance information on the debriefed Offeror.

(3) The overall ranking of all Offerors when any ranking was developed by the agency during source selection.

(4) A summary of the rationale for award.

(5) For acquisitions of commercial products, the make and model of the product to be delivered by the successful Offeror.

(6) Reasonable responses to relevant questions posed by the debriefed Offeror as to whether the agency followed source-selection procedures set forth in the solicitation, applicable regulations, and other applicable authorities.

(End of provision)

52.212-2 Evaluation—Commercial Products and Commercial Services (NOV 2025) (GSA Class Deviation RFO-2025-12)

(a) Evaluation factors. The Government will award a contract resulting from this solicitation to the responsible Offeror whose offer conforming to the solicitation will be most advantageous to the Government, price and other factors considered. The following factors will be used to evaluate offers:

- Administrative Compliance – all quotes will be evaluated against the factors on pages 1 and 2 of the RFQ on a pass/fail basis.

- Technical Acceptability - The Salient Characteristics are 'brand name or equal' and the item offered is different than called out in the Salient Characteristics, technical specifications must be submitted on the manufacturer's part number being quoted so an 'or equal' determination can be made. Determinations will be on a pass/fail basis.

- Price - the lowest evaluated price

(b) Options (if applicable). The Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement. The Government may determine that an offer is unacceptable if the option prices are significantly unbalanced. The evaluation of options does not obligate the Government to exercise the option(s).

(c) Notice of award. A written notice of award or acceptance of an offer furnished to the successful Offeror within the time for acceptance specified in the offer, shall result in a binding contract without further action by either party. Before the offer's specified expiration time, the Government may accept an offer (or part of an offer), whether or not there are negotiations after its receipt, unless a written notice of withdrawal is received before award.

(End of provision)

52.203-2 Certificate of Independent Price Determination (Apr 1985)

(a) The offeror certifies that-

(1) The prices in this offer have been arrived at independently, without, for the purpose of restricting competition, any consultation, communication, or agreement with any other offeror or competitor relating to- (i) Those prices;

(ii) The intention to submit an offer; or

(iii) The methods or factors used to calculate the prices offered.

(2) The prices in this offer have not been and will not be knowingly disclosed by the offeror, directly or indirectly, to any other offeror or competitor before bid opening (in the case of a sealed bid solicitation) or contract award (in the case of a negotiated solicitation) unless otherwise required by law; and

(3) No attempt has been made or will be made by the offeror to induce any other concern to submit or not to submit an offer for the purpose of restricting competition.

(b) Each signature on the offer is considered to be a certification by the signatory that the signatory- (1) Is the person in the offeror 's organization responsible for determining the prices being offered in this bid or proposal, and that the signatory has not participated and will not participate in any action contrary to paragraphs (a)(1) through (a)(3) of this provision; or

(2)(i) Has been authorized, in writing, to act as agent for the following principals in certifying that those principals have not participated, and will not participate in any action contrary to paragraphs (a)(1) through (a)(3) of this provision _____ [*insert full name of* person *(s) in the* offeror *'s organization responsible for determining the prices offered in this* bid *or proposal, and the title of his or her position in the* offeror *'s organization*];

(ii) As an authorized agent, does certify that the principals named in subdivision (b)(2)(i) of this provision have not participated, and will not participate, in any action contrary to paragraphs (a)(1) through (a)(3) of this provision; and

(iii) As an agent, has not personally participated, and will not participate, in any action contrary to paragraphs (a)(1) through (a)(3) of this provision.

(c) If the offeror deletes or modifies paragraph (a)(2) of this provision, the offeror must furnish with its offer a signed statement setting forth in detail the circumstances of the dis-closure.

52.209-11 Representation by Corporations Regarding Delinquent Tax Liability or a Felony Conviction under any Federal Law (Nov 2025)

(a) The Government will not enter into a contract with any corporation that—

(1) Has any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability, where the awarding agency is aware of the unpaid tax liability, unless an agency has considered suspension or debarment of the corporation and made a determination that suspension

or debarment is not necessary to protect the interests of the Government; or

(2) Was convicted of a felony criminal violation under any Federal law within the preceding 24 months, where the awarding agency is aware of the conviction, unless an agency has considered suspension or debarment of the corporation and made a determination that this action is not necessary to protect the interests of the Government.

(b) The Offeror represents that–

(1) It is □ is not □ a corporation that has any unpaid Federal tax liability that has been assessed, for which all judicial and administrative remedies have been exhausted or have lapsed, and that is not being paid in a timely manner pursuant to an agreement with the authority responsible for collecting the tax liability; and

(2) It is □ is not □ a corporation that was convicted of a felony criminal violation under a Federal law within the preceding 24 months.

FAR 52.214-21 Descriptive Literature (Apr 2002)

(a) "Descriptive literature," as used in this provision, means information furnished by a bidder, such as cuts, illustrations, drawings, and brochures, that shows a product's characteristics or construction or explains its operation. The term includes only that information required to evaluate the acceptability of the product and excludes other information for operating or maintaining the product.

(b) Descriptive literature is required to establish, for the purpose of evaluation and award, details of the product offered that are specified elsewhere in the solicitation and pertain to significant elements such as-

(1) Design;

(2) Materials;

(3) Components;

(4) Performance characteristics; and

(5) Methods of manufacture, assembly, construction, or operation.

(c) Descriptive literature, required elsewhere in this solicitation, shall be-

(1) Identified to show the item(s) of the offer to which it applies; and

(2) Received by the time specified in this solicitation.

(d) If the bidder fails to submit descriptive literature on time, the Government will reject the bid, except that late descriptive literature sent by mail may be considered under

the Late Submissions, Modifications, and Withdrawals of Bids provision of this solicitation.

(e) If the descriptive literature fails to show that the product offered conforms to the requirements of the solicitation, the Government will reject the bid.

SECTION I: EVALUATION FACTORS

Method of Award: Award will be made to the quoter's quote that represents the Lowest Price Technically Acceptable (LPTA) and results in the lowest overall cost alternative that meets the Government's needs.

Evaluation Process:

1. Initial Price Ranking:
    a. All quotes received will be ranked by total price, from lowest to highest.
    b. The technical package of the lowest-priced quote will be evaluated first.
2. Technical Evaluation - Pass/Fail Criteria:
    a. The lowest-priced contractor's technical package will be reviewed on a pass/fail basis based on the following requirements:
        - List of part numbers on the spreadsheet in the Schedule of Items.
        - Supporting Literature: The offeror must submit supporting literature for each equal to part number submitted if the submitted item is not brand name.
    b. Evaluation Steps:
        - Technical Compliance: The GSA Contracting Officer (CO)/Contract Specialist (CS) will review the list of part numbers and supporting literature submitted by the contractor
        - Formal TEB Evaluation: Upon GSA CO/CS's preliminary confirmation of compliance, the contractor's technical package will be forwarded to the client's Technical Evaluation Board (TEB) for a formal Pass/Fail determination.
    c. Non-Compliance Protocol:
        - If the contractor fails to meet any technical specifications, the GSA CO/CS will stop the evaluation. The vendor will receive a "Fail" rating, and no further evaluation will be conducted.The evaluation will then proceed to the next lowest-priced contractor, repeating the process until a technically acceptable quote is identified.
3. Price Reasonableness Determination:
    a. Once a vendor is determined to be technically acceptable, the GSA CO/CS will evaluate the vendor's price for fairness and reasonableness.
    b. If the price is determined to be reasonable, that vendor will be designated as the proposed awardee.

PAST PERFORMANCE

While past performance is not a formal evaluation factor for this procurement, the GSA CO will review the Exclusions and Responsibility/Qualification Reports available within the System for Award Management (SAM) (https://sam.gov/SAM/) Additionally, the Government reserves the right to review Performance and Integrity Records, available within the Contractor Performance Assessment Reporting System (CPARS) (https://www.cpars.gov/).
