Statement of Characteristics
367 Cyberspace Operations Squadron (COS)
Chairs

1. **Purpose:**

   The purpose of this requirement is to provide a replacement workstation chair for the 367th Cyberspace Operations Squadron (367 COS) and Joint Mission Operation Center - Texas (JMOC-T) to meet demanding mission requirements and support a modern ergonomic workstation.

2. **Current Challenge:**

   Mission requirements are 24/7, with squadron and JMOC-T personnel working a demanding schedule, often requiring them to remain at their workstations well beyond normal working hours. The existing workstation chairs are largely outdated, obsolete and, in many cases, falling apart. Approximately 85% of the 300+ chairs are over a decade old, with many exceeding 20 years. Additionally, none of the existing chairs have headrests, causing neck strain due to continuous high-angle viewing of tri and quad monitor setups at the workstations.

3. **Scope of Work:**

   Vendor shall deliver the Chairs in accordance with the salient characteristics outlined below:

   - All black in color
   - All-mesh material seat back
   - Mesh or upholstered seat with spill-resistant material (vinyl)
   - Seat height adjust (up/down)
   - Seat slider (forward/back)
   - 360-degree swivel
   - Tilting seat with multiple locking positions and adjustable tension
   - Height adjustable arms (up/down)
   - Adjustable seat back supporting personalized lumbar support
   - Headrest (for high angle monitor viewing)
   - Hard floor castors
   - 350-pound rated weight capacity
   - Rated for 24/7 heavy-duty use (MUST be clearly indicated by manufacturer)
   - Quantity - 164 Chairs

Warranty

- 12-year warranty for all structural/mechanical materials and mechanisms
- 10-year warranty for upholstered materials
- Labor costs included in the warranty

Shipping/Delivery

- Chair delivered fully assembled (ZERO assembly time and ready for use)
- Chair delivered with minimal packaging
- Shipping costs included
