STATEMENT OF NEED

Project Title: Poly/Wire Cassette Refills for Runway Snow Brooms

Requiring Activity: 55th Civil Engineer Squadron (55 CES), Offutt Air Force Base

1.0 Introduction

This document outlines the requirement for the procurement of six (6) Poly/Wire Cassette Refills for runway snow brooms. These refills are essential for maintaining the operational readiness of the 55th Civil Engineer Squadron (55 CES) in its mission to ensure airfield safety and availability.

2.0 Background

The 55 CES is tasked with the critical responsibility of snow and ice removal from all airfield pavement surfaces at Offutt AFB. This mission is vital to support Higher Headquarter Level (HHL) missions on a 24/7/365 basis. The broom bristles on the runway snow brooms are wearable and consumable items that require periodic replacement to ensure effective snow and ice removal operations. This procurement is necessary to replenish the stock of these essential components.

3.0 Requirement

The contractor shall provide six (6) new Poly/Wire Cassette Refills for runway snow brooms that meet the salient characteristics outlined in Section 4.0 of this document.

4.0 Salient Characteristics

The required items must possess the following salient characteristics:

- Product: Eagle & Myslik Inc. Cassette Poly/Wire Refills
- Manufacturer Part Number: #4021595
- Material: Broom Core Combination Poly/Wire Mix
- Compatible Equipment Model: Oshkosh

5.0 Delivery Information

The contractor shall deliver the specified equipment to the following address:
Offutt Air Force Base
106 Peacekeeper Dr.
Building 301
Offutt AFB, NE 68113

Furthermore, the contractor is required to provide all manufacturer's owner's manuals for the delivered equipment.
