	RFQ 12760426Q0005B Aircraft Computer Maintenance Management System

#	Document (PWS, RFP, Attachment)	Reference Paragraph	Questions	Government Reponse
1	RFQ 12760426Q0005B Aircraft Computer Maintenance Management System Amendment 0001 - Questions and Answers	Government Response to Question #1	In a prior question answer released on 7 July 2026, the Government indicated prior proposals failed to address "critical requirements regarding Airworthiness Directives, Service Bulletins, and technical directives". The RFP requested that vendors address the following items in the PWS: •Aircraft Maintenance Management (PWS 4.1-4.1.9) •Supply Management (PWS 4.1.10-4.1.16) •Operations Management (PWS 5.) •Technical Information Management (PWS 6.) •CMMS Operations and Maintenance (PWS 8.) •User Training (PWS 11.) •Help desk availability and help desk functions •Products offered meet the technical requirements of the bill of materials. However, the RFP did not specifically request offerors to address PWS 4.2 Traceability which includes some requirements related to ADs, SBs, and TDs. It is unclear whether this requirement was intended to be addressed in the RFP. Would the Government consider clarifying the intent to address this element? Additionally, since we just received the answers to the first round of questions, would the Government consider a 7-day extension to the due date?	The critical requirements regarding Airworthiness Directives, Service Bulletin and technical directives is 4.1.8 of the PWS. 4.2 - Traceability is not intended to be addressed In the RFP. The response date is extended to July 20, 2026 at 3pm est.
