

**Market-
Frankford Line**

SEPTA cordially invites contractors and vendors to an outreach forum in preparation for the upcoming procurement opportunity related to the MFSE ATC Replacement Project

DESCRIPTION OF PROJECT & CONTRACT OPPORTUNITY

The existing Automatic Train Control (ATC) system in service on the Market-Frankford Subway Elevated (MFSE) is approaching its end of life and SEPTA is planning for its replacement.

The current ATC system was completed in 2003 as part of a major upgrade of the MFSE that included extensive improvements to the elevated structure. This project aims to replace the current ATC system.

SEPTA envisions this Forum to provide preliminary details about the project and create excitement about this upcoming procurement. This meeting offers an INFORMAL forum for questions. Some areas of this procurement include (but are not limited to):

- ➔ Replacement of the Existing Train Control System
- ➔ Train Control System Facilities
- ➔ Track Work
- ➔ Rail Operations Control Center
- ➔ Train Control Communications System

Time will be allowed for Questions and Feedback

Wednesday, March 19, 2025

2:00-2:30PM | SEPTA Presentation
2:30-3:00PM | Q&A

SEPTA Office

1234 Market Street
3rd Floor Conference Room
Philadelphia, PA
