Safe Requirement

1. Salient Characteristics

TSA has a requirement for (145) Mesa brand, PIN: SAFE-MHR916E-BLK) safe openings or equal. The safes will be stacked five (5) high and must possess the following salient characteristics

- Safes must have a minimum interior dimension of H 8” x W 17 ¾” x D 12”
- Safes must have a maximum exterior dimension of H 9” x W 18” x D 15”
- Safes must possess the ability to be securely mounted to a wall or floor
- Safes must be able to be locked via input of user determined electronic code (minimum 4 digits). Safes must have an override code and override key.
- Individual safe openings (145) must be serialized for easy identification by users and custodians
- Individual safe openings must be stackable and each safe must have the ability to be individually secured to the wall or secured to each other, with one safe being secured to the wall or floor.

2. Installation

- Installation will be coordinated with the designated Contracting Officer Representative (COR) after the safes are delivered to the TSA, Atlantic City Warehouse.
- The installation of the safes shall include all labor, material, equipment, transportation and supervision for TSA use at airports throughout the United States, Guam, San Juan, and Puerto Rico separately.

3. Warranty Information

- Contractor shall provide Five (5) years warranty (5-year period beginning at the time of delivery) including the following items:
    - Service call
    - Repair Keypad
    - Replacement of Door and / or Hinge
    - Lock
    - Key Replacement
    - Parts and labor for safe maintenance
- Contractor’s five-year manufacturer warranty shall include repair or replacement of all safe components with the same or comparable model and shipping cost to the original purchase address, at no additional cost to the government.
- All warranty issues must be approved by the COR and contractor before replacing the safe or having repair work done.

4. Maintenance

- The contractor shall provide a 5 (five) years' service agreement to cover maintenance on the 25 safes. The service agreement shall include a detailed service call price for repair and/or maintenance of door/hinge, lock, key replacement, battery replacement, safe removal, and any additional safe maintenance items for all base and option periods. At no time will the repair price exceed the original purchase price.
- Maintenance calls for safes not covered under 5 years' warranty will be handled separately.

5. Place/Location of Performance/Delivery

The safes will be delivered by the contractor to:

Transportation Security Administration

Egg Harbor Township N.J. 08234

Subsequently, these safes will be shipped by TSA to the airports as needed.

6. Travel Requirements

No travel anticipated; local service and installation anticipated.
