Project

Removal and Disposal of hazardous waste

General Information

1.0 Scope of Work

The objective of this requirement is to safely remove, transport, and dispose of all hazardous waste generated by Six Rivers National Forest. This includes waste identification and classification, collection and packaging, transportation, treatment and disposal, and finally documentation and reporting.

This is a one-time pickup of waste oil in 55-gallon drums that were left over from a fire incident in 2023.

2.0 Background

This is a one-time removal and disposal of hazardous waste material from a previous fire incident that occurred. This removal and disposal includes: (1) 55-gallon drum of ethanol, (2) 55-gallon drum of oil, (9) 55-gallon drums of gasoline, kerosine, and oil, and (5) pails of unleaded fuel that contents will be moved into an empty 55-gallon drum.

Contractor Requirements

3.0 Technical Requirements / Tasks

The Contractor shall:

Waste Identification & Classification

• Inspect, identify, and categorize hazardous waste in accordance with federal, state, and local regulations (e.g., EPA, DOT, OSHA).

• Provide Material Safety Data Sheet (MSDS) review and labeling as required.

• **Collection & Packaging**

• Supply all necessary containers, labels, and packaging materials.

• Ensure proper segregation of incompatible wastes.

• Securely package waste to prevent leaks, spills, or contamination

Transportation

• Provide licensed and insured transport vehicles compliant with DOT hazardous materials regulations.

• Maintain chain-of-custody documentation from pickup to disposal site.

Treatment & Disposal

• Dispose of waste at licensed and permitted facilities.

• Utilize approved treatment methods (e.g., incineration, neutralization, stabilization) based on waste type.

Documentation & Reporting

• Provide manifests, certificates of disposal, and regulatory compliance reports.

• Maintain records for a minimum of 3 years.

Compliance Requirements

• Adhere to all applicable federal, state, and local environmental regulations.

• Maintain current permits, licenses, and certifications for hazardous waste handling.

• Ensure all personnel are trained in hazardous waste management and emergency response.

4. Safety & Emergency Procedures

• Implement spill prevention and control measures.

• Maintain emergency response equipment on-site during collection.

• Report any incidents immediately to Contracting Officer Representative.

4.0 Deliverables / Schedule

Waste Inventory Report: The contractor is required to provide a waste inventory report and signed manifests along with the disposal certificates within 5 days. The original and {1} copies are required. The report shall cover all work completed during the specified period and shall present the work to be accomplished during the subsequent period. This report shall also identify any problems that arose and a statement explaining how the problem was resolved. This report shall also identify any problems that have arisen but have not been completely resolved and provide an explanation.

Key Deliverables

Item No.	*Deliverable*	*Objective*	*Due*
1	*Waste inventory report*	*To provide a waste inventory report to the COR*	*No later than five (5) business days after contract award*
2	*Signed manifests and disposal certificates*	*To provide signed manifests and disposal certificates to the COR*	*No later than five (5) business days after contract award*
