Brand Name/Sole Source Justification under $350K

PID Number: 26-SIMACQ-PHD-D30-0010

Department: D35

Company Name/Brand: Jonathan Engineered Solutions

Description of Product, Supplies or Services required to meet the agency's needs:

Naval Surface Warfare Center Port Hueneme Division (NSWC PHD) code D35 has a requirement to procure Mechanical Slides, part number 128QD-24 and 1303420 L/R, to support the [redacted]. The mechanical slides allow hardware equipment drawers to retract for internal component maintenance and replacement within a large computer rack.

Identification of Justification Rationale:

☒ The Material or service must be compatible with aspects (Form, Fit, and Function) with existing systems presently installed.

☒ A patent, copyright, proprietary data, or licensing agreement limits competition.

☐ These are "direct replacement(s)" parts/components for existing equipment.

☐ Urgency.

<u>Statutory Authority Permitting Other Than Full and Open Competition</u>

10 U.S.C. 2304(c)(1) . The property or services needed by the agency are available from only one responsible source or only from a limited number of responsible sources and no other type of property or services will satisfy the needs of the agency ***IAW FAR 6.303-2(b)(4)***.

Identification of the Justification Rationale Explained:

The Navy has a critical need for a viability refresh of the [redacted] due to current military threats and obsolescence issues. The [redacted] is a major component of the [redacted] system that not only addresses obsolescence risks but improves the operability and maintainability of the [redacted] hardware to ensure operational readiness of [redacted] for the U.S. Navy and stakeholders. The TEC is built per the specifications in Navy drawing number [redacted]. All fielded [redacted] installed on a [redacted] must first pass Environmental Qualification Testing (EQT) in accordance with the system's Operational Requirements Document (ORD). Once passed, the specifications and configuration of components are included in the drawing, and the fielded [redacted] must be assembled to those drawing specifications without variation. In this case, the mechanical slides (Part number 128QD-24 & 1303410 L/R) manufactured by company Jonathan Engineered Solutions (JES) passed EQT in accordance with the system's ORD and is therefore specifically identified in drawing number [redacted] as a primary component of the assembly. These JES slides are needed as part of the [redacted] as they allow for drawers that house hardware equipment to be retracted from

the [redacted] allowing component maintenance and/or replacement. No other mechanical slides have passed EQT and the technical drawings do not include an alternate part number for use in the [redacted] assembly.

Specific Characteristics of the Item or Service required that Limit the Availability to a Sole Source or Brand Name:

JES confirmed that they are the sole manufacturer of the mechanical slides 128QD-24 & 1303410 L/R, hold proprietary rights to the designs of the mechanical slides, and do not have any authorized third-party distributors or resellers. Therefore, JES is the only source that can meet NSWC PHD's needs. If NSWC PHD were to use a different source, it would incur a substantial duplication of cost of approximately [redacted] that is not expected to be recovered through competition and an unreasonable delay of approximately 1.5 years to identify and test for alternates. Such costs and delay would negatively affect operational availability and mission readiness of the [redacted] onboard [redacted]. These estimates are derived from the costs and time requirements from the initial EQT testing; this estimate includes the costs for labor, travel, non- recoverable materials, test plan development, and analysis of the results.

Market Research Conducted:

The [redacted] is assembled by items specifically defined by Department of the [redacted] Washington Navy Yard, DC 20376-7012 drawing number [redacted]. Item number [redacted], part number [redacted] and item [redacted] number 1303410 L/R from drawing 8749400 references the slides approved for use within [redacted]. Only items identified by official Department of the Navy Naval Sea Systems Command drawings (drawing [redacted]) can be used within [redacted]. Part numbers 128QD-24 and 1303410 L/R are proprietary designs by Jonathan Engineered Solutions and no other company produces these slides.

Statement of Actions, if any to Remove Barriers to Competition in the Future:

NSWC PHD Contracts Office will continue to conduct market research as warranted to provide a broader vendor base as applicable for the types of supplies/services covered by this document. If another potential source emerges, NSWC PHD will assess whether competition for future requirements is feasible.

CERTIFICATIONS AND APPROVAL

TECHNICAL/REQUIREMENTS CERTIFICATION (FAR 6.303-2(c))

I certify that the facts and representations under my cognizance, which are included in this justification and its supporting acquisition planning data, except as noted herein, are complete and accurate to the best of my knowledge and belief.

Technical Cognizance:
