Question	PWS/Attachment Reference	Answer
The Performance Work Statement (PWS) requires the removal of five (5) designated palm trees. However, Drawing C1.01 appears to depict a larger number of palm trees within the projected area. To ensure an accurate and complete proposal, would the Government please identify the specific five (5) palm trees that are to be removed? If available, please provide a revised or marked-up drawing (or other identifying information) clearly indicating the designated trees.	PWS para 5.7 and PWS Attachment 0001 Drawing C1.01	The Government has revised PWS Attachment 0001, Drawing C1.01, "Site Mowing/Mulching Plan." The five palm trees designated for removal are located at the southwest corner of Building 22 and are marked with a red "X."
