HONO Survey Services (Request for Qualifications)

Question and Answer #1

**Question - We have a question regarding preparation of "land survey plat will be prepared and recorded"—the parcel & easement is already recorded in the State of Hawaii Land Court System (adjudicated by DAGS)—is the purpose of the map to depict boundary corners found or set? These maps are not normally recorded with DAGS.**

Answer - *"Land survey plat will be prepared and recorded" - This parcel and easement is recorded in the State of Hawaii Land Court System (adjudicated by DAGS), as shown on the recorded Land Court Maps but the parcel is unsurveyed, the creation of the parcel is based on a calculated metes-and-bounds description. A Record of Survey that shows set monuments and descriptions on a plat and incorporates the components required in the SOW is needed and can be filed at whatever the appropriate repository is for a Record of Survey of this nature.*
