Arlington, VA 22204-1373

I. OVERVIEW

a. Program/Equipment Name

IDS 1528

b. Amount *(Total price/cost to include options.)*

[redacted]

c. Authority

10 USC 3204(a)(1) or 41 USC 3304(a)(1) as implemented in FAR 6.302-1 Only one responsible source and no other supplies or services will satisfy agency requirements.

d. Technical Representative

Name	Title	Email	Phone	Date
Talbot, Kevin G. SSgt	124 Security Forces Squadron	kevin.talbot@us.af.mil	(208) 422-6301	11 August 2026

e. Contracting Officer *(Populates from the KO signature field.)*

Name	Title	Email	Phone	Date
	Contracting Officer			

Requirements Representative *(If different from Technical Representative.)*

✓ Prepared by *(If different from Contracting Officer.)*

Name	Title	Email	Phone	Date
Treyvlin Jones	Contract Specialist	treyvlin.jones@us.af.mil	208-422-5270	August 11, 2026

II. REVIEWS

I have reviewed this justification and find it adequate to support other than full and open competition.

Program Manager *(If applicable.)*

Program Executive Officer *(When item is Program Executive Officer managed.)*

Justification for Other than Full and Open Competition

Instructions

Local Control Number: PANNGB-26-P-0000 039907

NGB Control Number *(if applicable)*:

1a. CONTRACTING ACTIVITY: W50S73

b. Requiring Activity: 124 FW/SFS

c. POC: TALBOT, KEVIN

2a. NATURE OF ACTION: Only one responsible source.

b. Contract Action: New Contract

c. Contract Type: Firm Fixed Price

d. Fund Type: Other

3a. ESTIMATED TOTAL PRICE OF REQUEST *(including options, if any)*: [redacted]

b. If Applicable, Estimated Price of Supplies/Services: [redacted]

4a. Name of Requirement

IDS 1528

b. Description of Requirement

The 124th Fighter Wing, Idaho Air National Guard, has a requirement for the installation of an Intrusion Detection System in BDG 1528 for SATAF conversion.

c. Demonstrate, in Detail, Why This Specific Item or Service, is the Only One That Meets Your Requirements

The Air Force has standardized on Advantor for Fighter Wing Security Forces Squadron (SFS) IDS/VMS across the enterprise, and Gowen Field's system is part of this standard. Our existing security infrastructure is an Advantor system, which is proprietary in nature.

Proprietary System and Technology: Advantor is the original designer, developer, and manufacturer of the current system. They utilize proprietary software and hardware that are not compatible with other systems. As one of only three USAF-certified providers of IDS/VMS, Advantor's technology is highly specialized.

System Integrity and Warranty: To maintain the warranty and the operational integrity of the existing, certified system, all upgrades and enhancements must be performed by Advantor. Using another vendor would void the warranty and could compromise the entire security system. Advantor will not install or integrate components procured from other sources, as they cannot guarantee the quality and compatibility of those components.

Cost and Infrastructure: Utilizing an alternate vendor would be prohibitively expensive. It would necessitate the complete replacement of the existing system, as components are not interchangeable. This would require a significant increase in funding to cover the costs of new hardware, software, and the associated infrastructure changes. A complete system replacement would also lead to significant operational disruptions.

Risk of Catastrophic Failure: Attempting to integrate non-Advantor components into the existing system would be technically infeasible and could lead to catastrophic system failures, rendering our security systems inoperable. This is an unacceptable operational risk. Only Advantor possesses the detailed knowledge of the system's architecture required to ensure proper integration and functionality.

In summary, only Advantor has the capability to provide and properly integrate the necessary components into the existing system at Gowen Field without compromising security, voiding warranties, and incurring substantial additional costs.

5a. HAS THIS BEEN PREVIOUSLY PROCURED?

○ Yes, details are below. ✓ No.

6a. AUTHORITY CITED

10 USC 2304(a)(1) or 41 USC 3304(a)(1) as implemented in FAR 6.302-1 Only one responsible source and no other supplies or services will satisfy agency requirements.

b. Reason for Authority Cited

Advantor Systems Corporation is the original designer, developer, and manufacturer of the existing physical security infrastructure at Gowen Field. The proposed Intrusion Detection System (IDS) and Video Management System (VMS) would be required to operate on Advantor's proprietary software and hardware. Under FAR 6.302-1(a)(2)(ii), these supplies and services are considered available only from the original source because integration of non-proprietary components by an alternate vendor is technically infeasible, would immediately void existing system warranties, and would compromise the cybersecurity and physical security integrity of this USAF-certified system. Furthermore, utilizing an alternate vendor would require a complete system replacement, resulting in an unacceptable escalation of cost of approximately that is not expected to be recovered through competition, as well as unacceptable mission delays to the Fighter Wing's security posture.

7. POSTING REQUIREMENTS

None.

8. CONTRACTING REQUIREMENTS

a. Efforts to Obtain Competition

Due to the proprietary nature of the Advantor hardware and software, full and open competition is not feasible for this specific requirement. However, in accordance with FAR 5.201, a Notice of Intent to Sole Source (Synopsis) will be published on the Government Point of Entry (SAM.gov) for a minimum of 15 days. This notice will state the Government's intent to award a sole-source contract to Advantor Systems Corporation. Any capability statements or proposals received from other interested parties as a result of this synopsis will be evaluated by the Government to determine if alternate sources can meet the requirement without voiding warranties or requiring a full system replacement.

b. Actions to Increase Competition

For this specific requirement, the government cannot increase competition because we must maintain the technical integrity, certifications, and warranties of the existing, proprietary Advantor physical security system. However, for future requirements, the government will continue to conduct extensive market research to monitor the security industry for emerging open-architecture technologies and alternative USAF-certified providers.

c. Market Research

see contract file

d. Interested Sources

one

e. Other Facts

n/a

9. REQUIRING ACTIVITY CERTIFICATION

Technical and Requirements

I certify that the supporting data under my cognizance, which are included in the justification, are accurate and complete to the best of my knowledge and belief.

Name	Date	Title
Talbot, Kevin G. SSgt	11 August 2026	124 Security Forces Squadron / ESS

Phone	Email	
(208) 422-6301	kevin.talbot@us.af.mil	TALBOT.KEVIN.GERALD.1548857437 Digitally signed by TALBOT.KEVIN.GERALD.1548857437 Date: 2026.08.11 07:57:15 -06'00'

11. APPROVAL

Contracting Officer (KO)

1. I hereby determine that the anticipated cost to the government for this contract action will be Fair and Reasonable.
2. I certify that this Justification is accurate and complete to the best of my knowledge and belief.

(This certification shall be made by the contracting Officer who will sign the contract resulting from this Justification and Approval.)
