Final Date for Question Submission	July 21, 2026, at 12:00pm
Bid Opening	~~July 28, 2026, at 2:00pm~~ August 11, 2026, at 2:30pm
Bid Due Date	~~July 28, 2026, at 2:00pm~~ August 11, 2026, at 2:30pm
Notice of Intent to Award	August 10, 2026
Proposed Award Date	September 2026

The following clarifications were requested and answered as follows.

- Who is the current contractor?
 - ANSWER: This request must be submitted for each requestor to GovQA as a Public Records Act request for information. Each requestor will receive their answer in about 2-3 weeks and will come from a different office.
- What is the current contract amount?
 - ANSWER: This request must be submitted for each requestor to GovQA as a Public Records Act request for information. Each requestor will receive their answer in about 2-3 weeks and will come from a different office
- What is the contract not to exceed amount for this IFB?
 - ANSWER: The estimated budget for this project is \$49,500.00 (Instructions to Bidders, Section 1.B, page 3), but we understand that bids may come in higher than expected. Any decision to award at a higher amount is the prerogative of CDFW and the Contract Manager.

- What is the chemical usage data for the following:
 - a. 12.5% Liquid Chlorine
 - b. Hach CL17 C12 Free DPD Reagent
 - d. Liquid Polymer
 - ANSWER: Chemical usage varies by time of year and water quality provided by Westland's Water District.
 - Chlorine usage during the summer can be up to four (4) gallons a month.
 - Reagent usage is unknown but may be needed up to every thirty (30) days.
 - Liquid Polymer usage is unknown.
- It would appear the Onsite Logbook referenced in SOW Section 16.C and the Reports referenced in SOW Section 17 are redundant. Are these separate items, if so please provide an example of this report?
 - ANSWER: No, these items are not separate. The report is a summary of the work completed. The logbook should provide the same information for the operator's reference of what was completed last.
- There is a 7-Day Chart Recorder referenced, who changes the charts on a weekly basis?
 - ANSWER: The Contractor is responsible for this item.
- Does the site or CDFW have the calibration kit for the "HF Scientific HF MOTL 28028 Turbidimeter"?
 - ANSWER: No.
- Can you please provide a copy of the SWRCB permit for this facility?
 - ANSWER: The plant does not provide drinking water and therefore there is no SWRCB permit required.
- Bid Item #2: What is the Diagnostic Fee meant to be?
 - ANSWER: A diagnostic visit will be requested by the Contract Manager when any problems are brought up by the Contractor, or in the event that something stops working correctly. No actual repairs will be completed as part of this contract.

Please acknowledge receipt of this addendum in the space provided on Attachment 3 Bid Form in the Bidding Documents. Failure to do so will result in rejection of the bid.

Sincerely,

Otis-Drowne, Dawn
