Q&A

1) Will the Government be conducting a pre-proposal site visit for this project? If so, could you please provide the anticipated date, time, location, and any registration requirements?

RESPONSE: The Government can do a site visit on Friday, August 14, 2026, at 0500 at Range Operations, building 56000. We will be leaving at 0510 from building 56000. We are leaving early because of conflicts with other ranges that will be shooting.

Vehicles will need to be high profile because of the terrain we will be driving on. Timothy Bauman will be the likely Escort.

Everyone will need to get a visitors pass from the visitors center to enter Fort Hood. Building 69012, T.J. Mills Blvd, Fort Hood, TX 76544. Each person must present a valid REAL ID-compliant driver's license, state ID, or U.S. passport. Every non-DoD ID cardholder must consent to a criminal history background check. https://home.army.mil/hood/my-fort/visitor-information this link provides information and has a link for Preregister for their visitors pass online.

2) While reviewing the solicitation, we noted that the evaluation appears to include consideration of the offeror's recent past performance. Could you please confirm whether the Government will evaluate only the prime contractor's past performance, or whether relevant past performance of key subcontractors and major teaming partners may also be submitted and considered as part of the evaluation?

   RESPONSE: The Government will only be reviewing the prime contractor's past performance. If they are a Joint Venture, the Government will be reviewing both parties' past performance.
