COEFFICIENT PRICING SCHEDULE

This attachment must be submitted with your proposal. The Coefficient you list below in Table T-1 will be the Coefficient of record. You must also complete Table T-2, as the Total Evaluated Price for the seed Task Order will be used to determine low offer.

1. A "Coefficient" is the Contractor's pricing factor which is multiplied against the bare cost in calculating Task Order (TO) prices. Refer to the SABER Statement of Work, Section A, Part 3 for additional information about calculating Coefficients.

2. Failure to propose reasonable coefficients or include costs for all items required to be included within the coefficient is the fault of the Contractor; adjustments to the coefficients will NOT be made. Please thoroughly review SABER Statement of Work prior to proposing.

TABLE T-1 OFFEROR'S PRICE COEFFICIENTS (ROUND TO TWO DECIMAL PLACES):

COEFFICIENT TYPE	OFFEROR'S PRICE COEFFICIENT
Standard Hours / Unrestricted Areas	
Standard Hours / Restricted (Controlled) Areas	

3. For the purpose of assessing pricing and understanding of applying the coefficient, Offerors are required to place the technically evaluated price of the Seed Project with the proposed coefficient applied for Base Option, Standard Hours / Unrestricted Areas:

TABLE T-2

PROJECT	ESTIMATED PRICE	PROPOSED COEFFICIENT	TOTAL
Repair ATCALS, Building 5505			

NOTE: Please see Table T-3 below for a sample as reference only to provide guidance on how to apply the proposed coefficient to the projected price of a project.

TABLE T-3 (REFERENCE ONLY)

PROJECT	ESTIMATED PRICE	PROPOSED COEFFICIENT	TOTAL
Repair Bathrooms, Building 251	$230,000	1.23	$282,900

4. Initialing of this document serves as acknowledgement and acceptance of the Coefficient terms outlined in the SABER Statement of Work
